

B9 TRIBECA 2007

What makes a Subaru, a Subaru?

Does your car move you? Or leave your spirit stuck in “park”?

If a reawakening is in order, consider the following. Every Subaru has been designed, engineered and tested by specialists with a single vision, fuelled by a shared passion: driving. It's the start of what makes a Subaru, a Subaru. This passion translates into vehicles powered by innovation.

Ingenuity that generates both control and pure driving pleasure. And design that strikes to the heart and feeds the mind. All of which create an experience behind the wheel that is so much more than simply “A to B”.

At Subaru, we strive to redefine the automobile through intellect, emotion and action. It's a philosophy that all comes together when you Think. Feel. Drive.

Think.

Think about what you really want in a sport utility vehicle. About what “sport” and “utility” mean to you and your life. Here’s a thought: Combine the versatility of a true SUV with the agility of an honest-to-goodness sport sedan. Offer seating for up to seven passengers. Then blend in luxurious refinement and streamlined, sophisticated style for good measure. We incorporated all of this thinking to create an entirely new kind of vehicle. The result is the Subaru B9 Tribeca, the progressive SUV that adapts to your life and injects life into your driving.

Built on a platform of intelligence and passion.

Feel.

There is comfort. And then there is comfort that approaches pure harmony. The feeling that you are at one with your surroundings. Not isolated from the road, but in communication with the road. Enveloped by luxury and engaged by technology. Designed with real-world need and ideal-world desire in mind, the passenger compartment of the Subaru B9 Tribeca has much to offer. A gracious, elegant environment. A smooth, flowing cockpit. Functional and thoughtful features. And a calm that washes over you as you travel down the road.

Every feature designed for your driving pleasure.

Drive.

Get in, press the accelerator and go. Your destination: wherever. Wherever your heart desires, wherever your to-do list directs you. Regardless of the specific coordinates or circumstances, the Subaru B9 Tribeca rewards with its unique combination of versatility, comfort and stability. So enjoy its seamless power. Revel in its effortless handling, courtesy of Subaru's symmetrical full-time All-Wheel Drive system. Have confidence in bringing everyone – and everything – with you. And arrive in high style.

Every trip is a new discovery.

SUBARU FIA WRC CHALLENGE

PURE ADRENALINE

SYMMETRICAL AWD + SUBARU BOXER

SUBARU PHILOSOPHY

2002

2003

2004

2005

2006

Rally proven, case closed.

Rules of the road: You can't manufacture heritage. You can't fabricate performance. And you can't simulate the punishment a car takes while competing at the Acropolis Rally in Greece.

All Subaru vehicles share essential DNA with the Subaru FIA World Rally Championship (WRC) car.

In WRC competition, the name Subaru has been synonymous with championship-winning speed, handling and reliability since 1990. In the Subaru B9 Tribeca, this translates into a new breed of SUV.

Rugged to the core yet highly refined. Full of poise, stability and agility. Ready to face the demands of daily driving – on any continent.

SYMMETRICAL AWD

Strike a balance, get a grip, take control. For the past three decades, this has been the core philosophy that has led to the development of every Subaru vehicle. In that time, our engineers have perfected a combination unique to the industry: the SUBARU BOXER engine and the totally linear drivetrain layout called the Subaru symmetrical full-time All-Wheel Drive (AWD) system. In this layout, all drivetrain components – the engine, transmission, driveshaft and rear differential – are logically aligned close to the centre point of the vehicle. This gives every Subaru heightened stability and ideal weight distribution, front to rear and side to side. Why is symmetrical full-time All-Wheel Drive a better solution? Simply: balance, grip, control.

SUBARU BOXER

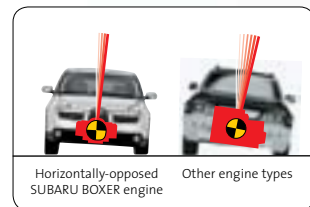

The horizontally-opposed engine, also known as the *boxer*, earned its nickname because its pistons move like a prize-fighter, alternately throwing left and right punches on a horizontal plane. The motion of the right bank of pistons counteracts that of the left bank, thereby balancing each other out and reducing engine vibration.

With respect to the SUBARU BOXER, this intrinsically smooth design is also more compact and sits lower in the engine compartment. Net benefits: seamless power delivery and a lower centre of gravity, which helps the AWD and suspension systems operate at peak efficiency. To further enhance durability, handling, and directional stability, every SUBARU BOXER engine is constructed of lightweight, high-strength aluminum.

DRIVE SUBARU

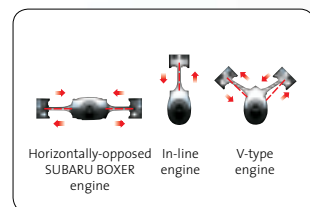

Picture this: A quiet drive in the country is interrupted by a sudden rainstorm. The road – narrow, winding – is slick with fallen leaves and punctuated by blind corners. Now think of you behind the wheel of the Subaru B9 Tribeca. Secure in the knowledge that Subaru symmetrical full-time AWD is always on the job, ever alert and capable of powering over life's little stresses. You: reassured. Calm: restored.

Three distinct advantages.

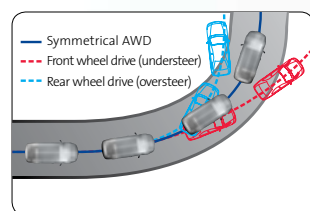

Better balance

During cornering, centrifugal force causes a vehicle to lean; how much depends in part on the vehicle's centre of gravity. Due to the placement of its compact SUBARU BOXER engine, each Subaru vehicle has an exceptionally low centre of gravity. This helps improve handling and stability, while reducing body roll, without having to resort to an overly stiff suspension.

Less vibration

With its 180° configuration, the SUBARU BOXER engine dramatically cuts down on vibration by eliminating the inertia of opposing pistons that exists in V-shaped or in-line configuration engines. The result is smooth, seamless power right through the rev range as well as unprecedented driving comfort.

More traction

Subaru's symmetrical full-time AWD system has distinct traction advantages – especially when cornering. When power is sent to just two wheels, lateral forces tend to make a vehicle understeer or oversteer, which can lead to instability. Due to the way we send power to all four wheels, a Subaru steers neutrally in the direction of the bend, thereby ensuring precise, controlled handling.

Putting the 'sport' in 'sport utility'.

A strong engine note. A wide power band. Surprising acceleration. Qualities normally found in a performance car help to make the Subaru B9 Tribeca an absolute pleasure to drive. Inherently smooth with minimal vibration, the 6-cylinder SUBARU BOXER engine delivers seamless acceleration at traffic lights, highway speeds and everywhere in between. Enjoy the drive even more knowing that fuel consumption and emissions are minimized to better protect the environment.

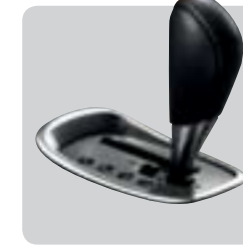

**SUBARU BOXER 3.0-litre DOHC engine**

- Horizontally-opposed 6-cylinder DOHC 3.0L SUBARU BOXER engine
- 245 horsepower @ 6,600 rpm* / 215 lb.-ft. of torque @ 4,200 rpm*
- 6-cylinder engine as compact and lightweight as the average 4-cylinder
- Active Valve Lift System and Active Valve Control System
- Refined and smooth – revs easily to the red line with less vibration
- Drivability supported by a broad torque band

* Peak horsepower and torque values are determined using the new SAE J1349 (Rev. 8/04) standard.

The very definition of a 'power shift'.

The Subaru B9 Tribeca features a 5-speed electronic direct control automatic transmission (5EAT) with SPORTSHIFT™ that delivers incredibly refined performance and superb responsiveness. This transmission incorporates Variable Torque Distribution (VTD), a yaw-rate and lateral-g sensor, and an electronically controlled locking centre differential. These advanced technologies help ensure smooth power delivery, exceptional stability and precise control – at all times, regardless of weather or road conditions.

**Subaru 5EAT SPORTSHIFT™ transmission**

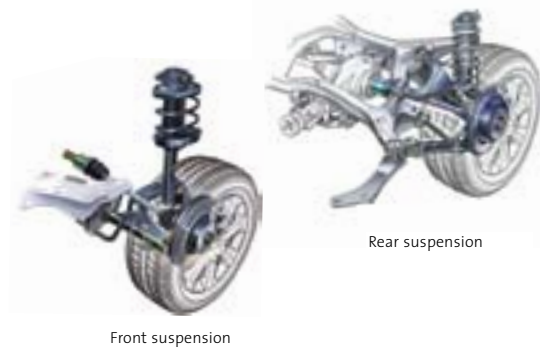

- Delivering superior handling, safety and responsiveness, the 5EAT transmission incorporates Variable Torque Distribution (VTD), Vehicle Dynamics Control (VDC) and three separate driving configurations. *Normal mode* ensures smooth shifting, optimal fuel economy and reduced emissions. *Sport mode* provides improved acceleration especially when cornering. And *SPORTSHIFT™ mode* allows for manual shifting with a simple flick of the gear selector.
- VTD promotes lively, sporty driving with a 45/55 front/rear torque split ratio. It also adjusts to a 50/50 front/rear torque split ratio for maximum traction and stability when driving conditions demand or when VDC engages.
- VDC employs a wide array of sensors that work in conjunction with this transmission to further enhance responsiveness, handling and overall vehicle stability.

The dynamic sensation of driving a sport sedan. Now in an SUV.

Carefully designed to take advantage of its symmetrical drivetrain layout, the Subaru B9 Tribeca's chassis makes light work of driving under extreme conditions. And helps make it fun. A twisting mountain road. A muddy cottage trail. A snow-covered on-ramp. To some drivers, these are hazards; to others, opportunities. Whatever may be around the next bend, the Subaru B9 Tribeca allows you to take it all in stride – safely, securely and reliably.

Performance-minded suspension system

With ample ground clearance and long suspension travel, the Subaru B9 Tribeca offers superb comfort and manoeuvrability over the rough stuff – and adds an unexpected sporty feel to cruising on pavement. The advanced rear double-wishbone suspension was developed specifically to eliminate vibration, allow for superb control and deliver a comforting, luxurious ride. The entire suspension system is also calibrated to react quickly and to maximize tire contact with the road at all times.

Lightweight construction, heavyweight strength

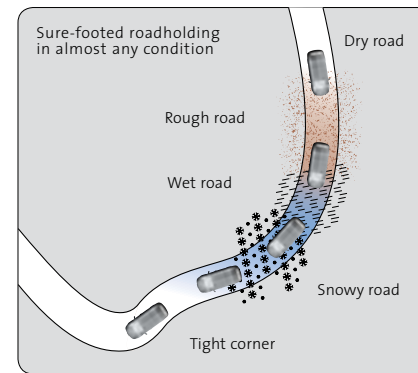

The engineers at Subaru have taken a merciless approach to reducing the Subaru B9 Tribeca's weight without impacting body strength or rigidity. This campaign has led to the extensive use of aluminum, high tensile strength steel and sophisticated production methods, such as hydroforming and tailored blank laser welding. The end result is a surprisingly light and nimble SUV that also offers class-leading passenger safety and security.

Active safety equals maximum safety.

An inherently superior AWD system. Agile handling. Sophisticated active safety technologies. And a clear and commanding view of the road. This is the ammunition with which the Subaru B9 Tribeca battles the hazards of everyday driving.

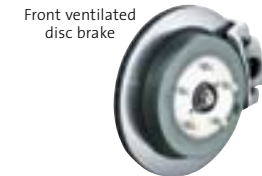

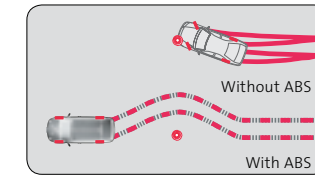

Safety starts with Subaru symmetrical full-time AWD

With its symmetrical full-time All-Wheel Drive system, the Subaru B9 Tribeca delivers sure-footed traction and control over everything from rain-slicked city streets to icy highways and gravel-covered country roads. Used for the very first time on an SUV in this class, this advanced technology enables you to confidently and safely tackle all manner of driving situations and conditions.

Powerful and reliable braking system

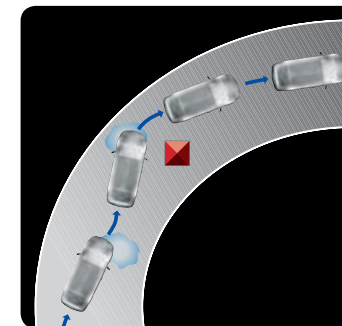

In stop-and-go driving, stopping power is more important than horsepower. The Subaru B9 Tribeca offers an advanced 4-channel Anti-lock Braking System (ABS) with Electronic Brake-force

Distribution (EBD). This system automatically compensates for vehicle load, allowing you to stop safely while you steer clear from hazards. The ABS, which is seamlessly integrated with Vehicle Dynamics Control, also features large ventilated disc brakes for increased braking capacity and sensors that automatically increase brake pressure in challenging situations.

The intelligence of Vehicle Dynamics Control

In the Subaru B9 Tribeca, the benefits of symmetrical full-time AWD are strengthened by Vehicle Dynamics Control (VDC). Working in conjunction with the AWD transmission, VDC is designed to prevent trouble before it happens. Steering-wheel angle, engine speed, and gear and brake status are constantly monitored to maintain optimum stability and traction at all times. By controlling engine output, front and rear torque distribution and brake pressure to individual wheels, VDC helps maintain stability to keep your vehicle on its intended path.

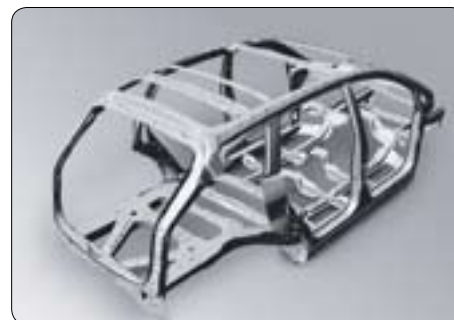

Travel safe, rest assured.

All Subaru vehicles are designed to provide best-in-class levels of safety and a 360-degree barrier of protection. The Subaru B9 Tribeca is no exception; in fact, it builds on our reputation with meticulously executed features such as a ring-shaped safety cage, six airbags and the generous use of high tensile strength metals. This attention to detail has earned the Subaru B9 Tribeca a 5-star rating* for front and side-impact crash testing by NHTSA (National Highway Traffic Safety Administration).

Advanced ring-shaped reinforcement frame

This all-embracing safety cage combines the roof, door pillars, window pillars and floor into one interconnected, energy-absorbing cell. The cell envelops the entire passenger cabin, thereby helping to dissipate impact energy, regardless of the direction from which it originates. To provide even more occupant protection, the Subaru B9 Tribeca's engine is designed to slide under the passenger compartment in the event of a frontal impact. Thoughtful design to make every trip a little more carefree.

All-around protection

Dual front airbags with dual-stage deployment and built-in smart occupant sensors. Dual front side-impact airbags. Dual side curtain airbags for front and second row passengers. Front seatbelts with pretensioners and load limiters. Passive safety headrests that automatically reduce the distance between the passenger and the headrest in the event of a rear-end collision. And, new for 2007, a rollover sensor that can automatically deploy side curtain airbags and lock the front seatbelt pretensioners if the vehicle begins to tip over. All standard, all designed to offer superior occupant protection.

*U.S. Government star crash ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program (www.safercar.gov). A five-star crash rating is the highest government rating for a) Driver and right front seating positions in frontal crash tests and b) Front and rear seating positions in side-impact crash tests.

▶▶▶ The Utility

As flexible and versatile as you'd like to be.

The interior design philosophy for the Subaru B9 Tribeca is simple: the more you can get into it, the more you'll get out of it. The 40/20/40-split, flat-folding second-row seats and optional 50/50-split, flat-folding third row seats create 64 different seating and cargo-carrying configurations. And the second row seats recline and tip forwards to allow access to the third row. With seating for up to seven passengers, it's a rich and relaxing environment with space for all.

5 Passenger

Horizontally-opposed, 6-cylinder, 3.0L, SUBARU BOXER engine with Active Valve Lift System and Active Valve Control System

245 horsepower* and 215 lb-ft of torque*

5-speed electronic direct control automatic transmission with SPORTSHIFT™

Subaru symmetrical full-time All-Wheel Drive with Variable Torque Distribution (VTD)

Vehicle Dynamics Control (VDC) system and Traction Control System (TCS)

Driver and front passenger front and side-impact airbags; side curtain airbags (first and second row)

Engine immobilizer system and anti-theft security system

Power tilting and sliding glass moonroof with sunshade

AM/FM/CD/MP3 audio system with 6 speakers and auxiliary audio input

Automatic climate control (dual-zone)

Power adjustable, heated front seats

Premium cloth upholstery

Fuel economy: SEAT SS (L/100km): City 13.3/Hwy 9.5

*Peak horsepower and torque values are determined using the new SAE J1349 (Rev. 8/04) standard.

Exterior Features

While some SUVs seek to blend into their surroundings, the Subaru B9 Tribeca cuts a bold swath across an otherwise mundane motoring landscape. The dramatic black front grille and swooping body lines. The ingenious light clusters, LED turn signals in the mirrors and stylish rear spoiler. The sporty, 7-spoke 18" alloy wheels. Each element of the design is perfectly integrated to create one dynamic profile. This is next generation styling for a next generation SUV. Stunning.

Rear view camera - This camera shows what's immediately behind the rear bumper on the monitor system. The monitor system also shows distance lines to help you back up safely.

Moonroof - The large moonroof slides and tilts to provide a breath of fresh air and a healthy dose of vitamin D.

Roof-line spoiler - The roof-line spoiler extends beyond the trailing edge of the roof to create a sportier profile and enhance vehicle aerodynamics.

LED turn signals - Integrated into the side mirrors, the stylish turn signals incorporate LEDs for better visibility and enhanced safety in all lighting and weather conditions.

Fog lights - For those times when fog, snow or rain reduce visibility, multi-reflector halogen fog lights illuminate the road surface and bring added safety to the picture.

Alloy wheels - These stylish 18" alloy wheels look great and reduce the weight of the vehicle. They also accommodate a larger tire that can offer increased grip and traction.

Not all features shown are standard on all models. See specifications for availability.

Interior Features

Navigation system - The GPS DVD-based navigation system sends map images and directions to the bright, 7-inch monitor system screen, helping you stay on track at all times.

AUX input - Now you can take your travelling music with you everywhere. With the auxiliary input jack, your portable music player connects to the audio system.

Memory seat - The eight-way power-adjustable driver's seat includes a memory feature that saves the precise seating preferences of two different drivers.

DVD entertainment system - The rear seat DVD entertainment system is complete with a 9-inch screen, wireless headphones and an auxiliary input for gaming consoles.

Premium audio system - With a total output of 160 watts, a subwoofer and 6-disc in-dash CD changer, this 9-speaker system transforms the interior into an auditorium.

Floor lighting - As you enter the vehicle, you're greeted by cool, ambient floor lighting. This feature helps you get settled in your seat and sets the stage for a great driving experience.

The interior of the Subaru B9 Tribeca is tailor-made with comfort and convenience in mind. Within its 4,015 litres of usable space, you'll discover a variety of smart storage compartments, 10 cupholders, four 12V power outlets and four tie-down hooks in the back. The cargo area also features a low floor height to make it easier to load heavy items. All told, the Subaru B9 Tribeca is filled with features to make life easier – in other words, it fits.

Not all features shown are standard on all models. See specifications for availability.

Some people call them accessories, but for the typical Subaru B9 Tribeca owner, they are, without a doubt, necessities. Whether you need extra storage for weekend getaways or you just want to enhance the driving experience, these options suit your purposes – and make a personal statement at the same time. For the individual who already stands out from the crowd just by driving this distinctive SUV, it's all about pride of ownership.

Satellite radio - The Subaru B9 Tribeca comes prewired for XM® Satellite Radio. This service allows you to access entertaining radio programming and 100% commercial-free music.

Trailer hitch package - Complete with a transmission oil cooler, the trailer hitch package features a hitch tucked neatly out of sight and a towing capacity of up to 1,587 kg.

Roof cargo bin - For those rare times when you can't fit everything into the Subaru B9 Tribeca, this roof cargo bin can provide up to 485 litres of additional storage space.

Reverse sensing system - Sensors located on the rear bumper provide an audio signal as you approach potential hazards – an intelligent way to protect against annoying bumper scrapes.

Crossbars/ski rack - Winter weekend getaways are easier to organize with these optional crossbars and a ski rack designed to hold up to 6 sets of skis or 3 snowboards.

Cargo tray - This cargo tray protects the carpeted storage area from damage when carrying loose items.

SUBARU C.A.R.E.

CUSTOMER ASSISTANCE FOR ROADSIDE EMERGENCIES

Every vehicle Subaru makes is designed and engineered to give you peace of mind and keep you safely on the road. However, Subaru Canada, Inc.'s commitment to your peace of mind doesn't end there. With the convenient SUBARU C.A.R.E. (Customer Assistance for Roadside Emergencies) program, members are guaranteed not only quick, courteous emergency roadside assistance in Canada and the United States, but also other benefits designed to ensure an extraordinary experience with your Subaru – 24 hours a day, 365 days a year.

Best of all, the extensive SUBARU C.A.R.E. program – which is sponsored by Subaru Canada, Inc. and backed by Canada's leading automobile roadside assistance organization, the Canadian Automobile Association (CAA) – is offered free of charge for the first three years from date of purchase on every new Subaru vehicle or as part of a Subaru Protection Plan. As a SUBARU C.A.R.E. member, you will receive a personalized SUBARU C.A.R.E. membership card and have access to a dedicated SUBARU C.A.R.E. toll-free telephone number (in English or French). This 1-800 number will allow you to take advantage of over 20,000 roadside assistance contractors and 1,000 CAA and American Automobile Association (AAA) offices throughout Canada and the United States.

Subaru Canada, Inc. is proud to be the first vehicle manufacturer to have a direct relationship with CAA, giving our customers the benefit of CAA's unparalleled level of experience and service.

Subaru Warranty Coverage

Every Subaru vehicle is designed and built to offer our customers the highest possible level of quality and reliability. We are proud of our vehicles and are also proud to stand behind them with a comprehensive warranty. For 2007 model year vehicles, the warranty on all Subaru vehicles consists of:

New Vehicle Limited Warranty (36 month/60,000 km)

This warranty covers basic and major components for 36 months or 60,000 km.

Major Component Warranty (60 month/100,000 km)

This warranty extends coverage of major components (more than just powertrain) up to 60 months or 100,000 km.

Surface Corrosion Limited Warranty (36 month/60,000 km)

This warranty covers surface corrosion to visible painted body panels for 36 months or 60,000 km.

The above information is an overview of warranty coverage and is not a warranty statement. If you wish to see more details regarding our Subaru warranties please refer to your Subaru warranty booklet, contact your local Dealer or visit our Web site at subaru.ca. On our Web site you will also find additional information regarding different options for an extension to your warranty – delivering peace of mind at a very competitive price.

Subaru Protection Plan

As a Subaru owner, you have expectations for a pleasurable, trouble free ownership experience – now and into the future. Once your 36 month/60,000 km New Vehicle Limited Warranty period ends* our Subaru Protection Plan can prolong your hassle free ownership experience with 3 levels of extended service contract coverage tailored to your needs:

- Power Protection
- Major Protection
- Complete Protection (best level of coverage to complement the 60 month/100,000 km Major Component Limited Warranty)

This extended service contract offers comprehensive mechanical and electrical coverage and is designed specifically for new and near-new vehicles (vehicles still within 36 months and 60,000 km from original in service date). Other features and benefits of the

Anti-Perforation Limited Warranty (60 month/unlimited km)

This warranty covers perforation due to corrosion to body sheet metal panels for 60 months, regardless of kilometres.

Emission Control System Limited Warranty

This warranty covers the majority of emissions components for 36 months or 60,000 km and the major parts of the emission control system for 96 months or 130,000 km.

Parts and Accessories Limited Warranty

This warranty covers Subaru parts and accessories installed by the dealer prior to retail delivery of the vehicle for 36 months or 60,000 km and Subaru parts and accessories installed by the dealer after the retail delivery of the vehicle for 12 months or 20,000 km from the date of the installation.

Subaru Protection Plan include:

- Inflation protection – for parts and labour costs;
- Budget protection – reduces unexpected repair bills;
- Rental allowance when your vehicle is kept overnight for covered repairs;
- Many time and km options tailored to your driving needs
- Normal wear coverage on covered components;
- Tire Road Hazard Coverage on all plans;
- SUBARU C.A.R.E. (CAA) service throughout the term; and
- May increase resale value of your Subaru vehicle.

Your Subaru Dealer will be pleased to review the terms and level of coverage that suit your budget and driving needs. Be sure to ask your Dealer for details or visit subaru.ca for more information.

**If you already own a Subaru vehicle and it is still within the 36 month, 60,000 km New Vehicle Limited Warranty period, you are still eligible.*

All roads lead to driving pleasure in the Subaru B9 Tribeca.

subaru.ca

The Supplemental Restraint System (SRS airbags) affords the driver and passenger additional protection in some collisions. This system provides supplemental protection only, and seatbelts must be worn in order to avoid injuries to out-of-position occupants upon airbag deployment. The combination of SRS and seatbelts provides the best protection in a serious accident.
