THE 2021 RAV4 & RAV4 HYBRID

Every day deserves more adventure.

Squeeze more out of modern life.

The 2021 RAV4 and RAV4 Hybrid. Their stylish design paired with responsive driving dynamics and rugged capabilities open you up to a world of excitement, while keeping you prepared for the demands of modern life. With the reliable LE and XLE, refined Limited, capable Trail and TRD Off-Road Package, and Sporty Hybrid options, there's a RAV4 for every appetite to help push you to your limits.

Click to Learn More

2021 RAV4

STYLING

Inspiring design.

Looking good is also about feeling good.

RAV4 features a striking and rugged style that exudes strength and inspires you to challenge every part of your day. Its bold front end, imposing stance, and large fender flares show off its aggressive off-road side, while its aerodynamic lines and sleek silhouette accentuate its sophisticated street feel. Inside the refined interior are premium materials, soothing textures, and high-tech features designed to elevate any driving experience. And with a cavernous cargo area, there's plenty of useful storage space to bring along whatever your adventure requires.

Click to Learn More

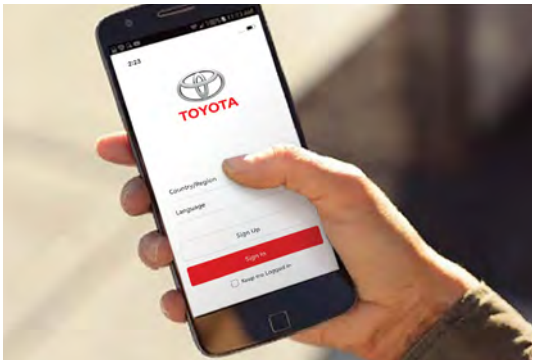

The future of user-friendly.

INTUITIVE TECH

RAV4 offers a host of available tech-focused features that include an 8-inch touch screen display with 11 JBL® speakers, 7-inch TFT Multi-Information Display, Apple CarPlay™[1] and Android Auto™[1] compatibility, and Bird's-Eye-View Monitor.

CONNECTED SERVICES BY TOYOTA[1]

Staying connected has never been easier with a suite of available connectivity features including Remote Connect, Safety Connect®, Service Connect, and Destination Assist to help enhance your driving experience.

Qi WIRELESS CHARGING[2]

Simply place your Qi compatible device on the available Qi wireless charger for a quick and easy charge.

ENERGY MONITOR

Tracking your efficiency is easy with RAV4 Hybrid's energy monitor. As driving conditions change, the monitor uses both the multimedia display and available Head-Up Display to show you how power is being routed to the drive wheels or how otherwise wasted energy is captured to charge the battery.

PERFORMANCE

Powered by efficiency.

Discover the potential in every day.

RAV4 delivers power and intelligent efficiency so that you can feel the freedom of the open road or secluded trail. The Dynamic Force 2.5 litre in-line four-cylinder engine delivers responsiveness and fuel efficiency for a smooth and sporty drive. The multilink rear suspension offers exceptional handling and control by working with its natural body rigidity to keep traction steady. RAV4 also has the capabilities you need, like available AWD to give you greater control and confidence when facing demanding road conditions. When off-roading, the available Multi-Terrain Select tailors the RAV4's driving characteristics to specific driving conditions by adjusting the transmission's shift points, throttle pedal sensitivity, and brake force to give you maximum traction and control on a variety of surfaces.

Click to Learn More

More capable. More fun. More memories.

HYBRID CAPABILITIES

The RAV4 Hybrid will never compromise on power and capability. Its Toyota Hybrid System engine produces an ample 219 combined net horsepower for impressive acceleration all the way to highway speeds.

TOWING POWER

The RAV4 offers the necessary towing strength and power to take on whatever your day has in store. For bigger hauls, the RAV4 Trail and TRD Off-Road have the power and torque to tow up to 1,587.5 kg (3,500 lb)[3].

DYNAMIC TORQUE-VECTORING AWD WITH REAR DRIVELINE DISCONNECT

Enjoy an upgrade in performance that is paired with impressive fuel efficiency. The intelligence of available Dynamic Torque-Vectoring All-Wheel Drive improves handling by sending up to 50% of the power to the rear and then distributes more power to the wheel that needs it. To boost fuel efficiency, Rear Driveline Disconnect will stop sending power to the rear when it isn't necessary.

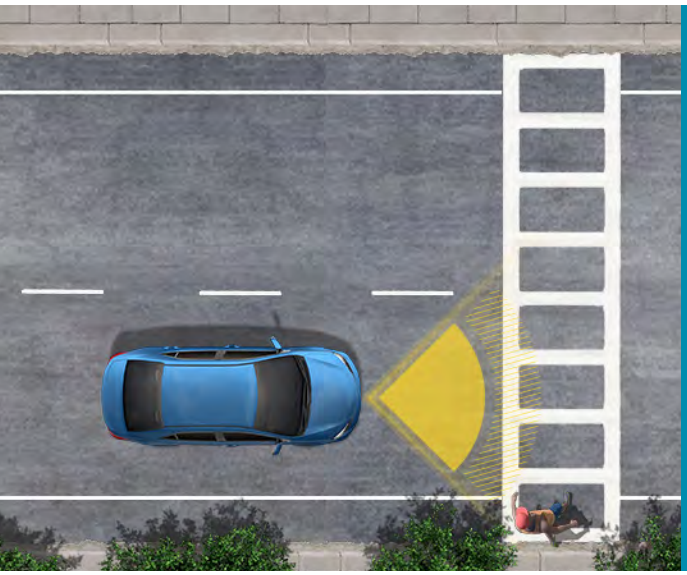

MULTI-TERRAIN SELECT

Multi-Terrain Select takes RAV4's highly evolved four-wheel drive performance to a new level. The system allows you to select from four modes, then it regulates wheelspin spin accordingly to give you maximum traction on the most challenging terrain - including mud, sand, rocks, and dirt.

SAFETY

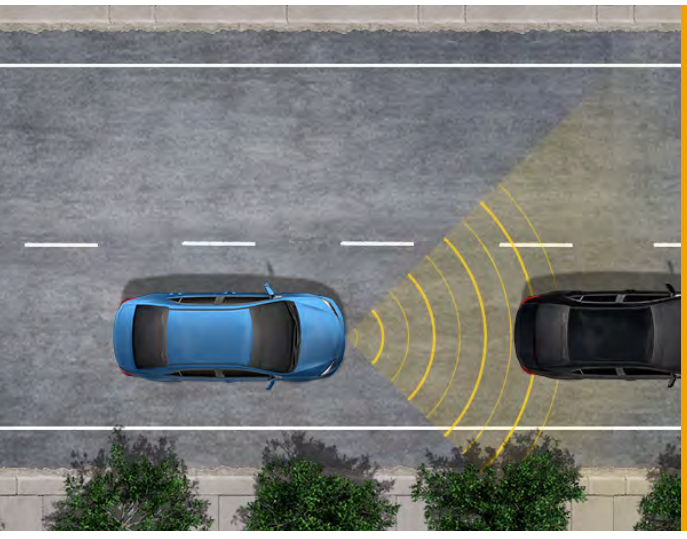

Toyota Safety Sense™

No matter what roads you travel, Toyota Safety Sense™[4] 2.0 is always there to help keep you as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2021 RAV4, and it is designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

PRE-COLLISION SYSTEM WITH PEDESTRIAN & BICYCLE DETECTION[5]

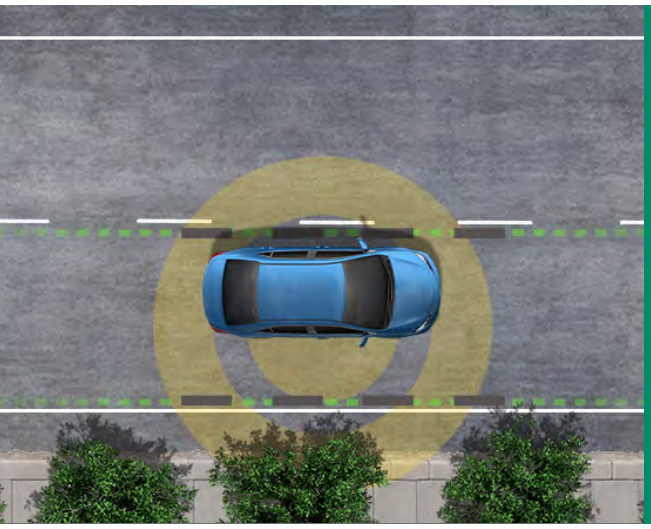

Provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. The latest system has enhanced low-light capabilities to help detect pedestrians at night. In certain conditions during the day, the Pre-Collision System with Pedestrian and Bicycle Detection may also help to detect leading and crossing cyclists and help prevent or mitigate a collision.

FULL-SPEED RANGE DYNAMIC RADAR CRUISE CONTROL[6]

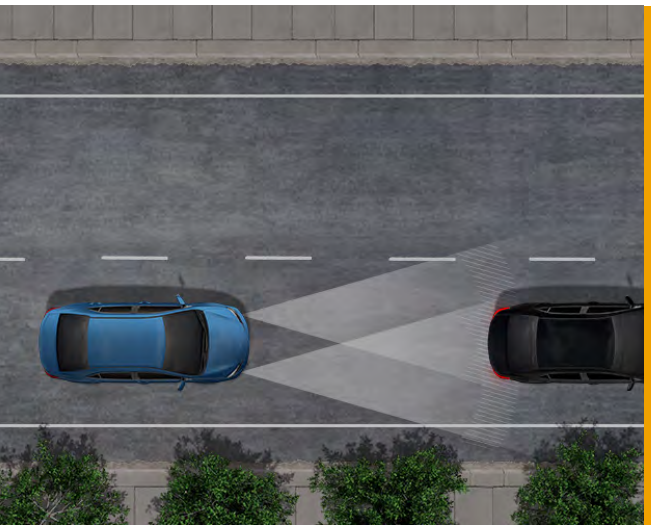

Dynamic Radar Cruise Control (DRCC) uses vehicle-to-vehicle distance control, which adjusts your speed, to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance.

Click to Learn More

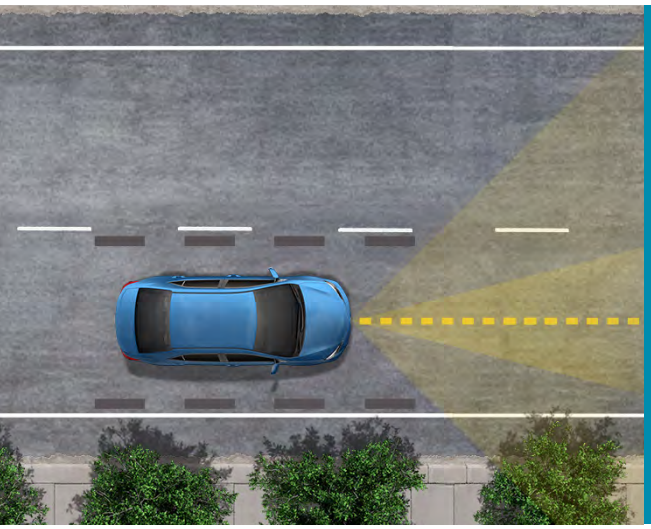

LANE DEPARTURE ALERT WITH STEERING ASSIST[7] & ROAD EDGE DETECTION

Alerts you if you start to drift out of your lane when visible lane markings or the road edge is detected. The Steering Assist function may also provide small corrective steering inputs.

AUTOMATIC HIGH BEAMS[8]

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

LANE TRACING ASSIST[9]

Provides steering support to help the driver keep the vehicle centred in its lane when Dynamic Radar Cruise Control is in operation.

— NEW VEHICLE WARRANTY COVERAGE —

Every Toyota Car, Truck and SUV is built to exceptional standards.
And that's not idle boasting. We back it up with these Limited Warranty Coverages:

BASIC

36 months/60,000 kms whichever comes first (all components that are defective in material or workmanship excluding normal wear and maintenance items).

36 MONTHS
OR
60,000 km

HYBRID-RELATED COMPONENT COVERAGE

Hybrid-related components, including the battery control module, hybrid control module and inverter with converter, are covered for 96 months/160,000 kms.

96 MONTHS
OR
160,000 km

HYBRID BATTERY

HV battery is covered for 120 months/240,000kms, whichever comes first. Warranty coverage is subject to terms and conditions.

120 MONTHS
OR
240,000 km

POWERTRAIN

60 months/100,000 kms, whichever comes first (engine, transmission/ transaxle, drive system, seatbelts and airbags).

60 MONTHS
OR
100,000 km

CORROSION PERFORATION

60 months/unlimited kms (corrosion perforation of sheet metal).

60 MONTHS
OR
UNLIMITED km

EMISSIONS

Coverages vary under Federal and Provincial regulations.

REFER TO APPLICABLE OWNER'S MANUAL SUPPLEMENT FOR DETAILS.

— DISCLAIMERS —

(1) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges. (2) Qi wireless charging may not be compatible with all mobile phones, MP3/WMA players and like models. When using the wireless charging system avoid placing metal objects between the wireless charger and the mobile device when charging is active. Doing so may cause metal objects to become hot and could cause burns. (3) Before towing, confirm your vehicle and trailer are compatible, hooked up and loaded properly and that you have any necessary additional equipment. Do not exceed any Weight Ratings and follow all instructions in your Owner's Manual. The maximum you can tow depends on base curb weight plus the total weight of any cargo, occupants, and added vehicle equipment. "Added vehicle equipment" includes additional standard/optional equipment and accessories added by the manufacturer, dealers, and/or vehicle owners. The only way to be certain of your vehicle's exact curb weight is to weigh your vehicle without passengers or cargo. Installation of a tow hitch receiver or other accessories located near the rear bumper may require disabling or removing the kick sensor, and the sensor operation setting in your vehicle should be turned off. See Owner's Manual for limitations. (4) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (5) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions. (6) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (7) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (8) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (9) Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions. (10) Not all exterior and interior colour options are available for every model. (11) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors.

Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of publication. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website **toyota.ca** – or your Toyota Dealer is your best source for up-to-date information.
