

HONDA

jazz

Jazz up your life! Whatever your lifestyle, you'll get it all in the Honda Jazz – the perfect match of style, versatility, economy and performance.

You might live in the city, but you like to get away for the weekend. You love to relax in your garden, or maybe you've got a new house to decorate. You're always on the go and you've usually got company.

2001
2002 Japan Car of the Year Award
Conducted by Japan Car of the Year Committee

British Auto Express Car of the Year 2002.
Christchurch Press Car of the Year 2002.
NBR Small Car of the Year 2002.
Sunday Star Times Small Car of the Year 2002.
AAautocar Small Car of the Year 2003.
BBC Top Gear Small Car of the Year 2003.
Driver Small Car of the Year 2003.

Jazz is all about making life easier. The peppy 1.3 litre i-DSI engine or sporty 1.5 litre VTEC engine will have you zipping around town as easily as it cruises on the open road.

Slippery aerodynamics and incredible fuel efficiency mean fewer stops at the pump. Power steering and a tiny turning circle make parking a breeze.

Wherever you go, Jazz's lively performance and comfortable cabin make it incredibly fun to drive and its ingenious interior design means it's always ready to meet any challenge that comes your way.

Small car. Big thinking

Refined in Germany by our European design team, the Jazz is a little car with a big attitude. The deep front air dam and flared wheel arches emphasise the low, sporty stance. Big multi-reflector headlamps flank a steeply raked, scalloped bonnet, accentuating the sleek lines and distinctive form. There's a choice of colours to match your personality.

Jazz 1.3 Litre

Behind the gorgeous design lies solid Honda engineering

The sweeping windscreen and side windows offer excellent all-round visibility and the doors are designed to hold in three positions, to make getting in and out of the Jazz a breeze. Inside, bold curves and striking metallic accents create an inviting and dynamic driving environment - from the chrome

instrument cluster to the easy-to-use steering wheel mounted audio controls.

Dials and buttons are firm and precise to the touch and every surface has a solid, quality feel. And because a comfortable, relaxing interior creates a better driving experience, the Jazz is thoroughly soundproofed to be

supremely quiet and peaceful. Even the doors have a dual seal to reduce the amount of noise intruding into the cabin.

The Jazz may be cute and compact on the outside, but inside it's one of the world's roomiest small cars. Innovative engineering means there's more than enough room for five

adults and their gear, thanks to the cabin-forward design, near flat floor and compact engine.

Inside the cabin, door panels and handles are scalloped and recessed wherever possible. They're the small details that add up to a huge advance in space and comfort.

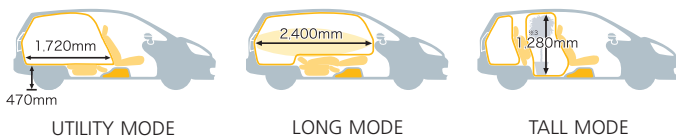

Jazz by Design

The Honda Jazz has an amazing **Magic Seat** system, which opens up a huge range of loading possibilities in seconds. Need to carry tall shrubs? A large canvas? Maybe even a couple of mountain bikes? Just flip up the rear seat cushion and you've got all the room you need behind the front seats. Fold one or both rear seats flat to make space for

large suitcases or bulky items of furniture. And for smaller, everyday objects, there's a deep storage bin in the centre console along with three cup holders.

You'll also find extra storage trays on both sides of the dash and even a handy secret parcel space beneath the rear seats.

*INTERIOR COLOURS DIFFER TO ILLUSTRATIONS. PLEASE ASK YOUR HONDA AGENT.

Enjoy the performance

Jazz 1.3 Litre

Wherever you go in the Jazz, you're assured of superb handling and stability.

Using simulations and prototype testing, Honda engineers have created an amazingly light but rigid new frame that delivers better protection, reduced noise and vibration as well as superior ride and handling. The ingenious design of the compact front and rear suspension frees up interior space while delivering class-leading ride and handling. The Jazz is also equipped with Honda's advanced computer-controlled electric power steering. As you drive, the system senses your speed and continuously adjusts the level of power assistance. Steering is easier at low speeds and firmer at high speeds so you're always in complete control.

Power quartet

Press the accelerator and the Jazz's four cylinder, fuel injected 1.3 litre i-DSI (Intelligent & Dual Sequential Ignition) engine responds instantly with a surge of power.

The engine generates 61kW at a low 5700 rpm and maximum torque of 119Nm at only 2800 rpm, which is great for city and highway driving. You can choose from the sporty 5-speed manual or super smooth,

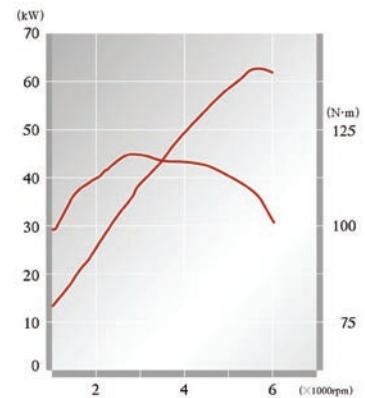

CVT automatic, with 7 speed sequential shift manual mode.

The Jazz is designed to take equal care of people and the environment. Thanks to i-DSI the engine offers not only lively performance, but exceptional fuel economy.

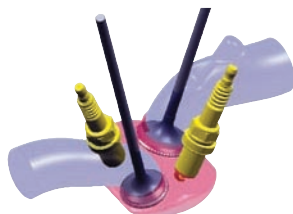

i-DSI uses two spark plugs per cylinder to burn petrol more efficiently. At the same time,

LEV II (Low Emission Vehicle) technology reduces exhaust emission levels to better than 2006 regulations.

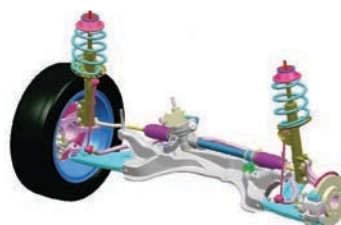

A redesigned combustion chamber, high performance catalyst and improved air to fuel ratio deliver more power and torque with enhanced fuel economy and lower greenhouse gas emissions.

i-DSI uses computer timing to continuously adjust the firing times of each spark plug for maximum fuel burn. The result is better torque and fuel economy throughout the rev range.

Advanced Macpherson strut front suspension with anti-roll bar and offset front springs for smoother damping action.

Torsional beam and vertical dampers mean better handling and increased interior space.

Get sporty. **Totally sporty**

If you prefer something a little more individual, the Jazz Sport will certainly help you stand out from the crowd.

Jazz
Sport

Every detail is a personal statement, from its sporty looks to its powerful handling. At first glance the Jazz Sport oozes attitude. The mesh grille on the front bumper, 15 inch 9 spoke alloy wheels, integrated body skirts, rear tailgate spoiler and front fog lamps. Add the indicator lights on the wing mirror and there's no doubt it looks the part.

But the most impressive thing about the 1.5i Jazz Sport is the performance. Honda's renowned Variable Valve Timing and Lift Electronic Control (VTEC) system

generates 81 kW of power at 6000 rpm and maximum torque of 143 Nm at only 4800 rpm – giving a powerful sporty performance but with excellent fuel economy.

It also features the 7-speed Sequential Shift CVT automatic transmission. Instead of a gear stick, you use all-new F1 inspired steering wheel-mounted paddles. The right hand paddle shifts up and the left hand paddle changes down, in true Formula 1 style. While a "7 speed mode" button on the steering wheel switches

between sequential and automatic modes, so you can choose between the convenience of automatic or the thrill of fingertip shifting. Either way, you'll enjoy a driving experience like no other.

Jazz Sport

Play safe. Really safe

Some small cars skimp on safety, but why should you accept such a risk? In designing the Jazz, we set out to achieve the best possible level of safety and security with extensive testing at Honda's multi-directional crash test facility.

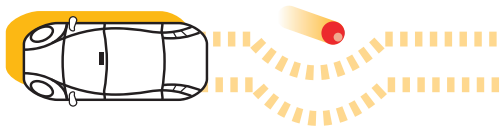

The Honda Jazz has big car safety features. Through repeated stringent crash tests, the protective car body meets the world's strictest government safety standards, obtaining a 4 Star Euro NCAP test crash rating. Inside the cabin, driver, front passenger and side SRS airbags are standard, with head restraints and three 3 point seat belts in the rear. And just in case someone tries to get in uninvited, the Jazz is fitted with remote central deadlocks, a master lock button and an immobiliser.

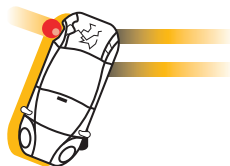

Stay safe. Environmentally Safe

Jazz handles brilliantly on the move and stops safely in all conditions.

With ABS and EBD

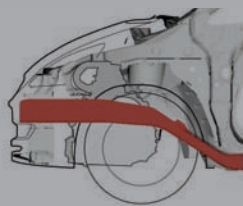

Without ABS and EBD

Four-sensor, three-channel ABS braking is standard, together with Electronic Brake Distribution (EBD). Whether fully loaded or with just one occupant, EBD adjusts the amount of braking force required between the front and rear wheels to stop safely. In addition, Emergency Brake Assist (EBA) applies further power assistance in moderate to heavy braking situations. The combination of ABS, EBD and EBA provides the safest possible

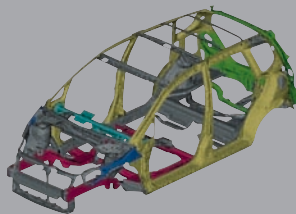

braking under all conditions, while offering a consistent brake pedal feel.

Honda's unique G-Force control is built into the core of the car, moderating the force of any impact and helping to maintain a safety zone around you and your passengers. The passenger compartment is framed by slim but immensely strong laser-welded pillars for maximum rigidity and visibility. Inside, you and your passengers are protected by a ring of

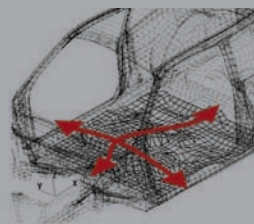

reinforced steel, side intrusion beams, passenger safety zones and seatbelt pretensioners with load limiters. Even the fuel tank has extra crash protection by being located centrally beneath the floor. All these features, combined with Anti-Lock brakes (ABS) are testament to Honda's ongoing commitment to safety.

The G-CON system uses progressive energy absorbing chassis rails to divert energy away from the cabin in a collision.

Key energy absorbing components in the high-strength passenger protection cell.

The arched floor directs impact loads away from the cabin area.

The Honda Jazz makes a bold environmental statement.

In the EnergyWise Rally 2004, the Jazz manual came in second place for the small cars category with 4.85l/100km and the Jazz CVT Auto came in third place with 5.09l/100km. The rally combines driving conditions that people encounter every day,

with two people and luggage in the vehicles.

What's more, 90% of the Jazz's total components are recyclable - the interior is 98% recyclable. Then of course, there's our TreeFund Programme. It was created to ensure that for every

new Honda sold, ten native trees are funded. This adds up to around 70,000 trees per year.

This is all just part of Honda New Zealand's commitment to leading the car industry into a more environmentally conscious age.

Jazz it up

When you drive a Jazz, you automatically set yourself apart from the crowd, but why stop there when there's a full range of genuine Honda accessories to personalise your Jazz just the way you like it.

Accentuate the sleek lines with a colour coordinated body kit and alloy wheels or create your own personal driving space with a 6-disc CD changer or electronic reversing sensors. Your Honda agent can help you select the accessories for your Jazz and have them installed at the time of purchase. And they'll be fully covered by the 36 month or 100,000 kilometre new car warranty.

Jazz Sport

Accessories

Front and rear parking sensors, door side moulding, 6-disc CD changer, Honda mats, door visors, armrest console, tow bar, boot liner, roof rack, leather seats and door liners (front and rear).

Jazz 1.3 only > Alloy wheels, tailgate spoiler, lower skirt (front), lower skirt (rear), lower skirt (side). For further accessory options please feel free to ask your Honda agent.

Jazz Swivel Seat Model

The Jazz Swivel Seat model makes life easier for front seat passengers in need of help. The manually operated swivel seat turns out of the car to help the passenger in and swivels back into the car with their feet on a foot rest. The action is reversed to get out of the car. Visit www.honda.co.nz/swivel to see a short movie demo or ask your Honda agent for more information.

MECHANICAL

8-valve twin spark i-DSI four cylinder in line aluminium engine with Intelligent & Dual Sequential Ignition.	•	
16-valve VTEC four cylinder in line aluminium engine.		•
1.3 litre with maximum power of 61 kW @ 5,700 rpm and maximum torque at 119 Nm @ 2,800 rpm.	•	
1.5 litre with maximum power of 81 kW @ 6,000 rpm and maximum torque at 143 Nm @ 4,800 rpm.		•
LEV II (Low Emission Vehicle) rating.	•	•
91-octane regular unleaded fuel. 42 litre tank capacity.	•	•
5 speed manual transmission.	•	
CVT automatic transmission with 7-speed sequential shift and Grade Logic control.	•	•
Front MacPherson strut suspension with anti-roll bar.	•	•
Rear trailing arm with torsional beam suspension and anti-roll bar.	•	•
Speed-sensitive electric power-assisted rack and pinion steering (EPS).	•	•
Front ventilated disc brakes and rear drum brakes.	•	•
Steel 14" x 5 spoke wheels with 175/65 R14 steel belted low profile tyres.	•	
Alloy 15" x 9 spoke wheels with 185/55 R15 steel belted low profile tyres.		•

SAFETY AND SECURITY

Engine immobiliser and remote central locking on all doors.	•	•
Master door lock switch.	•	•
G-Force control technology body shell for maximum passenger protection.	•	•
ABS (Anti-lock Braking System) with EBD (Electronic Brakes Distribution) and EBA (Emergency Brake Assist).	•	•
Driver and passenger front SRS airbags.	•	•
Side SRS airbags.	•	•
3 point Emergency Locking Reel (ELR) front seatbelts with pretensioners, load limiters and height adjustable anchor points.	•	•
3 x 3-point ELR rear seat belts, rear child seat anchorages.	•	•
Side intrusion beam.	•	•
Child seat restraint 'Auto Locking Reel' (ALR) rear seat belts, rear child-proof door locks.	•	•
Collapsible steering column.	•	•
Safety reverse driver's window.	•	•

EXTERIOR

Sports bumpers, side skirts, rear tailgate spoiler and front fog lamps.		•
Turn indicators on wing mirrors.		•
Front and rear mudflaps.	•	
Twin speed front windscreen wipers with intermittent and flick/wipe/wash feature.	•	•
Rear wiper and demister.	•	•

INTERIOR

Blue/black velour interior.	•	
Black velour interior.		•
Leather steering wheel.		•
Single in-dash CD player with steering wheel mounted audio controls.	•	•
Power windows, auto driver's window with safety reverse cut-out and illuminated driver's switch.	•	•
Power retractable wing mirrors.		•
Manual air conditioning.	•	•
Power steering with tilt adjustable steering column.	•	•
Magic Seat system with rear seat flip-up and fold flat options.	•	•
60/40 fold down rear seat backs.	•	•
Flat floor load bay with the rear seats down. Remote release for front passenger and driver seats.	•	•
Height adjustable driver's seat.	•	•
Driver and passenger vanity mirrors with cover, glove box and centre console.	•	•
Drink holder and tray.	•	•
Rear tonneau cover.	•	•
Under dash parcel shelf.	•	•
Grab handles rear and left front.	•	•

The Honda Price Promise

One sharp, fair price for everyone and better resale values. That's our promise to protect the value of your investment in a new Honda.

Special deals, demonstrator sales and fleet discounts all work to lower resale prices, undermining the value of your new car and speeding up its depreciation. So at Honda New Zealand, we've traded in the old sales model for a new one that is easier, fairer and offers our customers better value.

You don't have to negotiate to get a fair deal on a new Honda. Our Price Promise gives every buyer the same sharp price right from the start and we promise to keep our prices as reliable and consistent as we possibly can. And that means your new Honda will hold its value better than most other brands.

So when you choose a new Honda, you'll drive away with a great car and lasting value. We promise.

See www.honda.co.nz for the full story.

Honda New Zealand is committed to funding 10 native trees for every new Honda sold through the Honda TreeFund. Over 70,000 native trees are expected to be funded every year, as a measurable way of absorbing some of the emissions produced by motor vehicles. See www.honda.co.nz/environment
