BEWARE
OF HOT SURFACES

Some art is displayed on walls.
Some on wheels.

A car that defies convention
in every way.

You want sporty styling, yet a spacious cabin. You want a car that has powerful response, yet be fuel-efficient. You want a car that can zip in and out of narrow congested roads, yet be able to fit all your friends for a night out. Is it possible for a single car to satisfy all your contradictory needs in terms of design, performance, utility and quality? Yes, if it's the Jazz.

Outside, the Jazz shows off its sporty lines. Even the forward-shifted body and radically slanted windshield add sharpness to its already-stylish look. The bold face to cut-off tail makes a statement of confidence.

Inside, you get interior space that's the first of its kind with cabin space totaling 384 litres *(Based on VDA measurement)*.

The meter cluster is designed for ease of use and driver accessibility. With a Vehicle Information Display (VID) LCD and an integrated audio player, driving the Jazz is an experience to savour.

† Actual model may vary in detail from images shown.

Spacious and comfortable cabin.

Cabin space has been given more attention with the Jazz, ensuring adequate legroom and headroom to keep you and your passengers comfortable. Space is maximized with the Jazz to the tune of practicality and efficiency. Whilst enjoying the interior space, also take in the advanced and sporty design and the fine attentive cockpit.

Capacity and styling isn't the only thing you get with the Jazz. In order to give you more space and greater comfort, the wheelbase has also been increased. There's now a wider tread and greater knee clearance. While the improved seats give you added comfort, enjoy a quieter drive with enhanced noise and vibration reduction.

Wide & clear field view for better visibility.

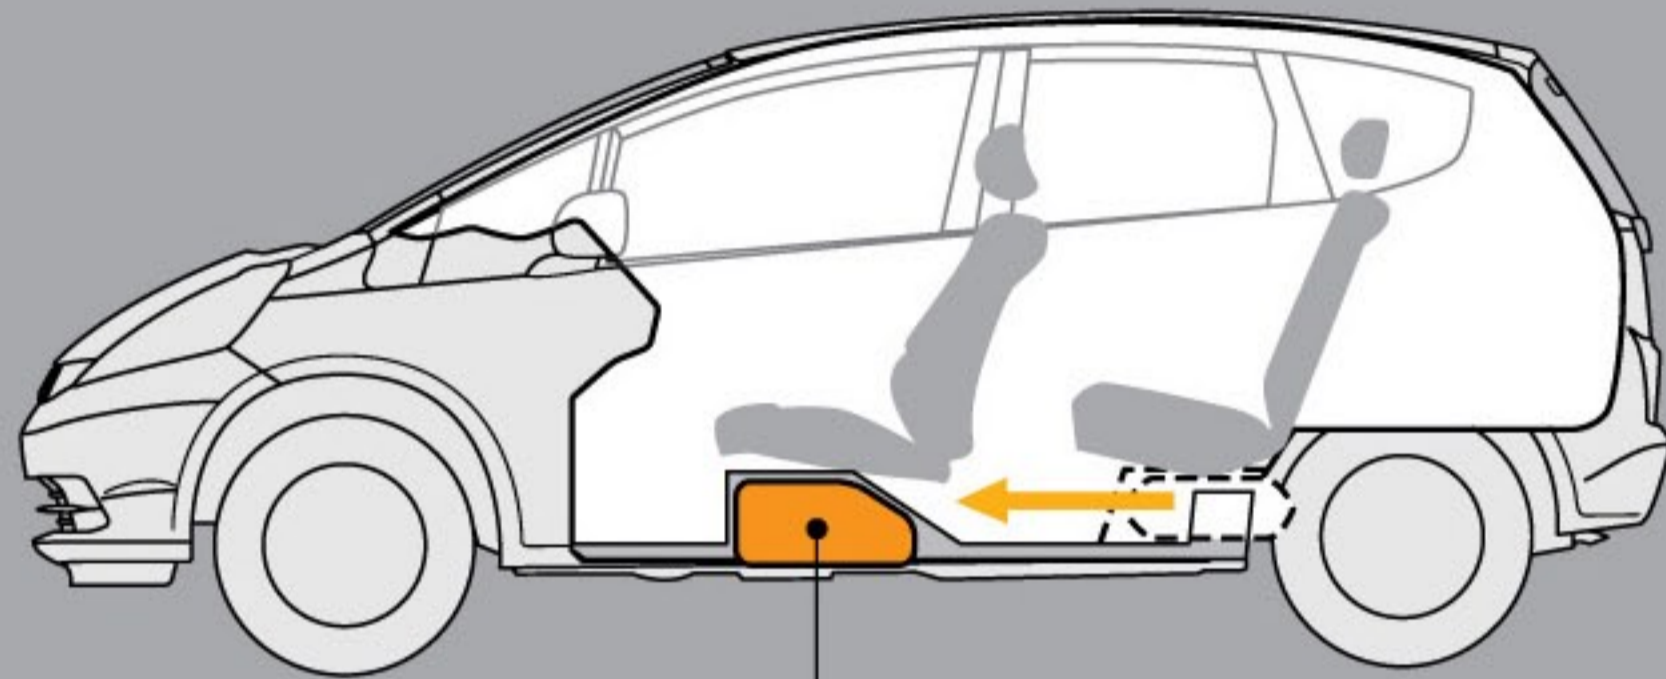

For greater driving pleasure, the integrated headrest is designed to give you unparalleled rear visibility. The front view has also been improved, with thinner A-pillars as well as an extended and larger windshield.

The windshield wiper blades have been redesigned to improve visibility when driving in the rain. There's also a larger side vent window and larger side windows with a miniaturised mirror base for improved driving experience.

† Actual model may vary in detail from images shown.

Ample form to suit any function.

**Unique
central fuel tank
layout**

FUEL TANK

Unique central fuel tank layout

Other sedans have the fuel tank underneath the rear seats which takes up space. In order to create exceptional room, Honda shifted the fuel tank of the Jazz to the center of the chassis, beneath the front seats.

**ULTRA
SEAT**

Utility mode

Lower both rear seats to maximize the cargo area to store large items like bicycles, up to 1,321 litres.

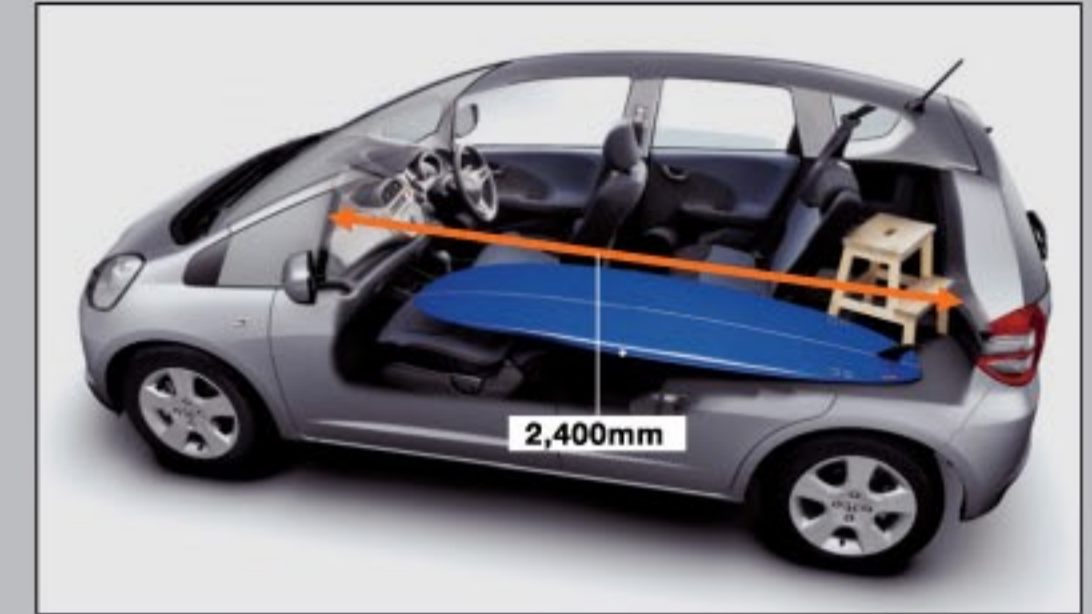

Tall mode

Fold up a rear cushion to create a tall storage area that's perfect for shrubs. The rear cargo area remains unchanged, allowing usage for other purposes.

**The unique three-mode
folding ULTRA Seat**

The Jazz provides all the versatility you could hope for, and more. Simply arrange the seating freely, with swift single-action ease, to meet your changing needs.

Long mode

Recline a front and rear seat to create a super-long storage space. Surfboards can be loaded with ease.

One action!

Ultra versatility

The Honda ULTRA Seat is truly revolutionary. Not only do they fold flat with a single forward pull, but their lower cushion can be folded up to make room for tall items. Best of all, there's no compromise in passenger comfort. It's the ultimate in seating flexibility.

Performance never looked this good.

† Actual model may vary in detail from images shown.

The most powerful engine in its class, yet fuel-efficient.

The Jazz comes with the 1.5-liter i-VTEC engine, with an output of 120PS power at 6,600 rpm, offering a maximum torque of 14.8kg-m at 4,800 rpm. It delivers instant exhilaration and a powerful ride. To achieve unparalleled driving performance, a class-first 5-speed Automatic Transmission was adopted. It is also equipped with Grade Logic Control that enhances drive, reduces gear hunting and provides faster acceleration.

A new technology also applied to Jazz is the Shift Hold Control, a system that adjusts computerised transmission, preventing over transmission that results in low acceleration and speed. With Shift Hold Control, the Jazz is noticeably more agile and smooth, especially on winding roads.

It also delivers class-leading fuel efficiency thanks to its new suspension and lightweight rigid body. This combination of performance and fuel efficiency ensures a pleasurable driving experience for all.

i-VTEC

Honda's responsive 1.5-liter i-VTEC engine outperforms anything in its class.

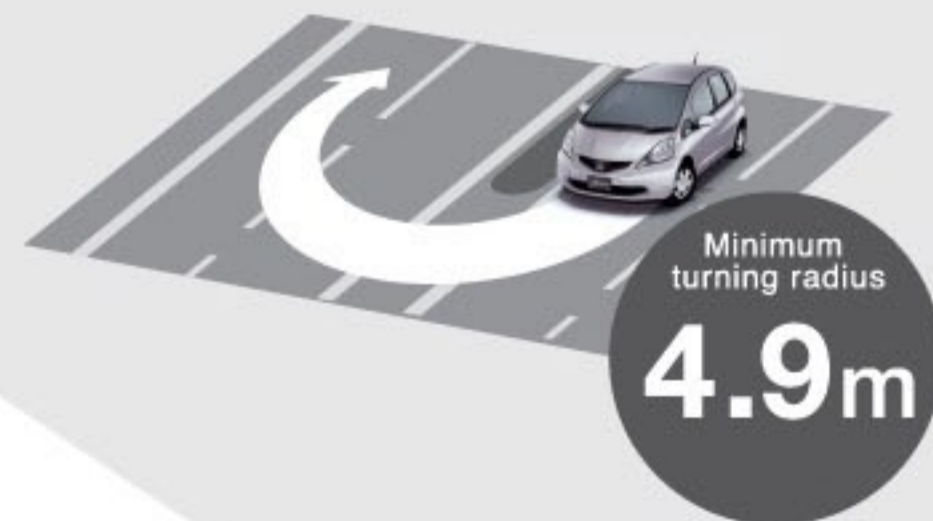

Maximum output : 88kW (120PS)@6,600 rpm

Maximum torque : 145Nm (14.8kg-m)@4,800 rpm

Super easy U-turns

Just turn the steering wheel and the Jazz smoothly complies with super-agile handling. The difference is especially noticeable when making U-turns.

Slashed air resistance

The aerodynamic Jazz slips smoothly through the wind. From flush face to cut-off tail, every detail is refined to reduce air resistance and improve fuel efficiency.

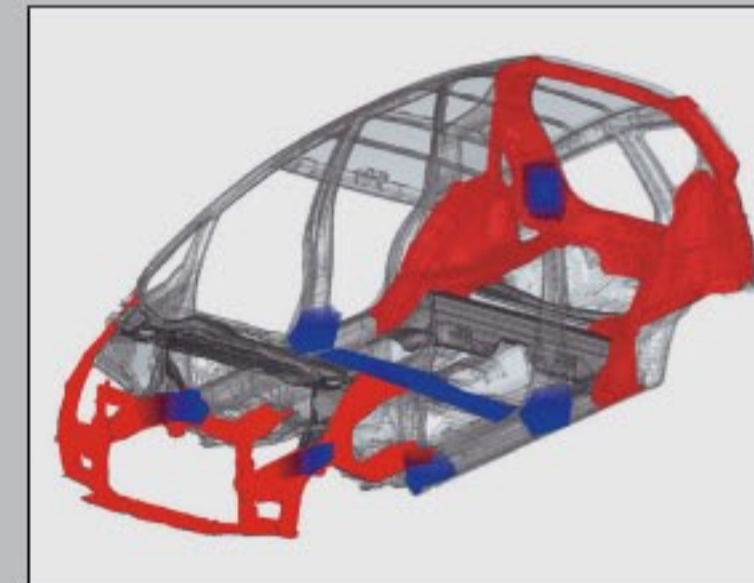

With a paddle shift* feature on the steering wheel, the Jazz is more fun and engaging to drive.

Easy fingertip shifting*

The paddle shift* lets you shift up or down without releasing the steering wheel to achieve desired performance in various driving conditions.

5AT & DBW

The 5-speed Automatic Transmission is the first in its class and works with Drive-by-Wire acceleration control, optimising power and fuel efficiency.

Low noise and vibration

The body is fortified to enhance body rigidity without increasing weight. This solid construction helps reduce noise and vibration, contributing to a quiet, refreshing ride even during high-speed cruising.

- Highly rigid body structure
- Highly efficient reinforcement

Front

Rear

Smooth riding pleasure

The new suspension offers riding comfort wherever you go. Around corners, it minimises roll and maximises stability for a more relaxing ride. The finely tuned geometry also contributes to easier, more linear braking.

* Applicable for Grade V only.

† Actual model may vary in detail from images shown.

One step ahead in safety.

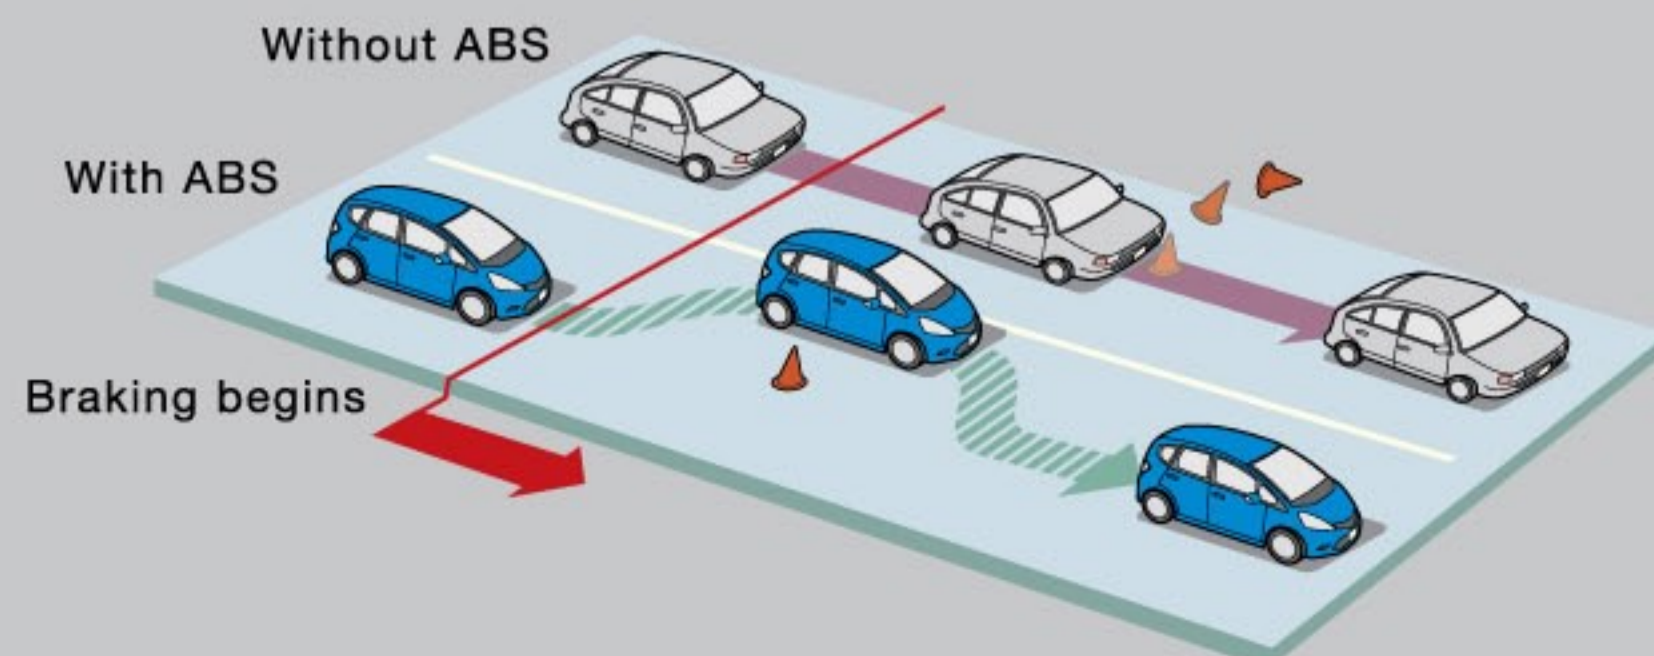

The Jazz keeps you in control with clear visibility, responsive acceleration, agile handling and linear braking performance. ABS (Anti-lock Braking System), EBD (Electronic Brake-force Distribution) and BA (Brake Assist) and a high-mount stop lamp lends to an all-round accident avoidance safety system. But in the event of an accident, advanced safety features and solid body construction with G-Force Control technology comes into play - protecting you and your passengers from harm.

Safety Features.

ABS

Superior braking power is achieved via the active safety system that consists of the ABS (Anti-lock Braking System), EBD (Electronic Brake-Force Distribution) and BA (Brake Assist).

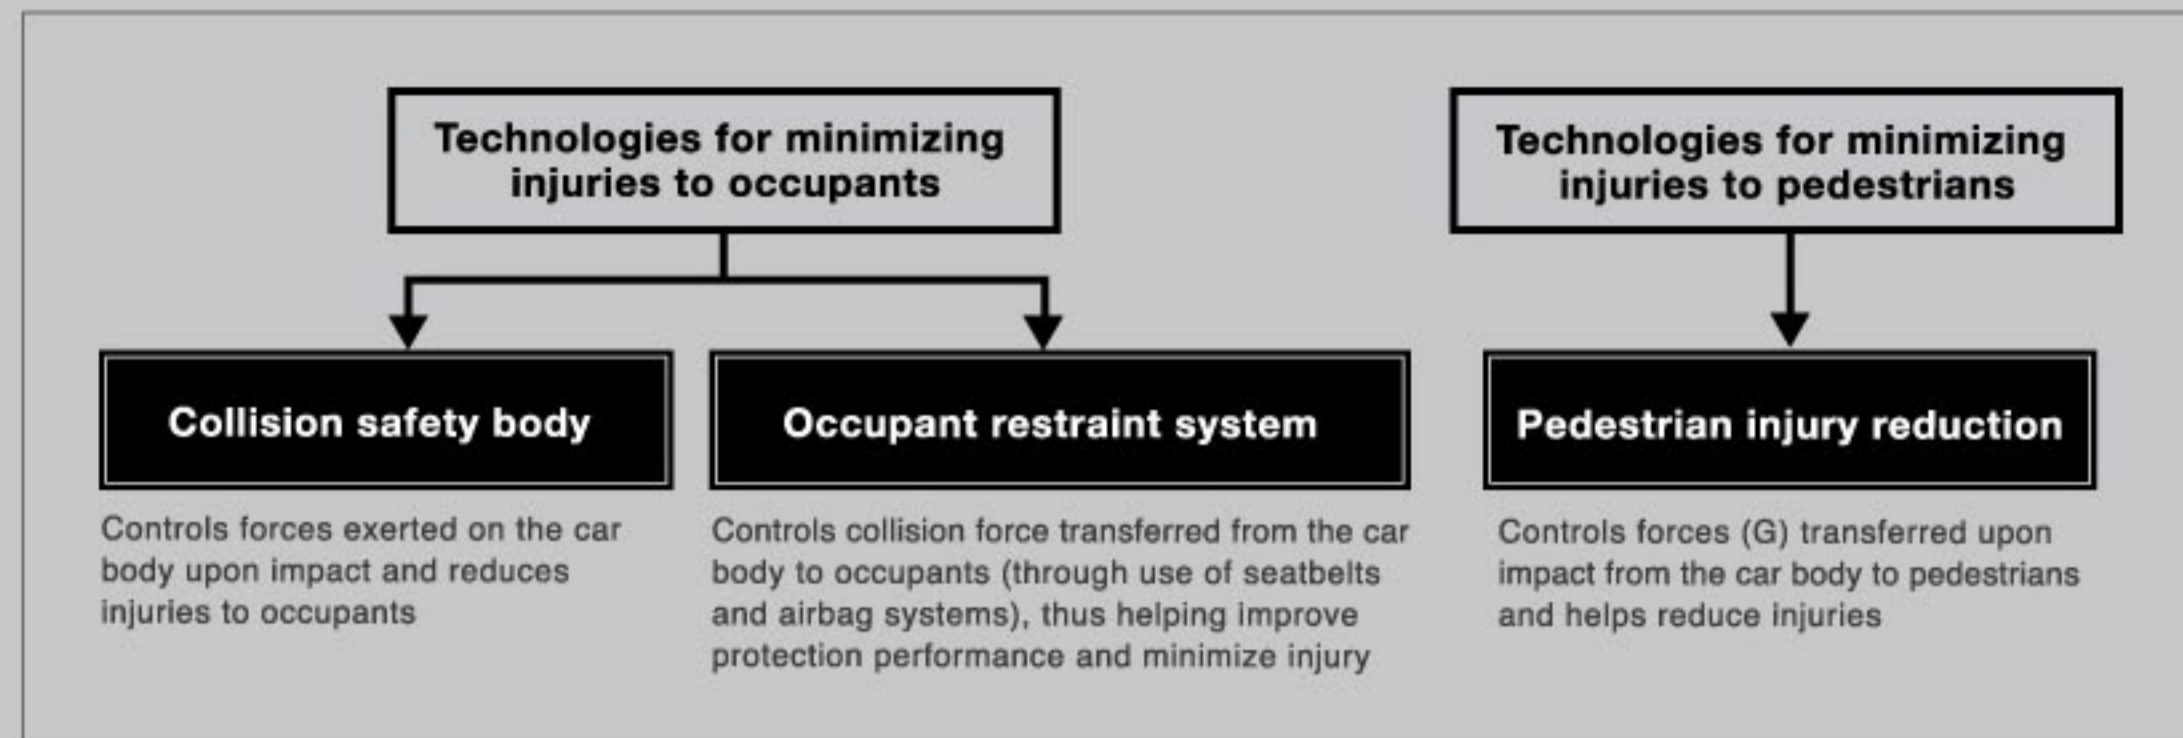

Dual SRS airbags

The airbag system works simultaneously with the seatbelts that come standard with 3-point technology and load limiters.

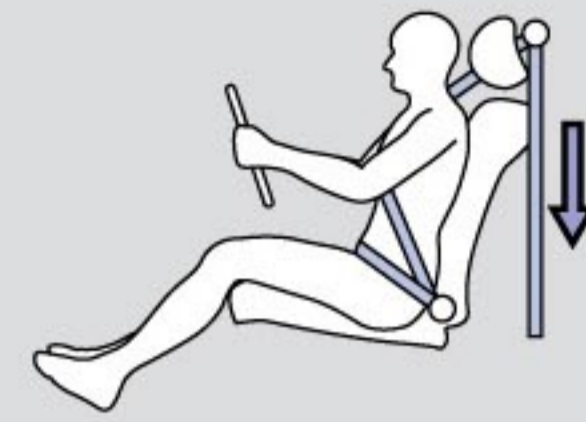

G-Force Control technology

The Jazz is imbued with Honda's G-force Control technology, which effectively absorbs and spreads collision energy during a crash.

Seatbelt

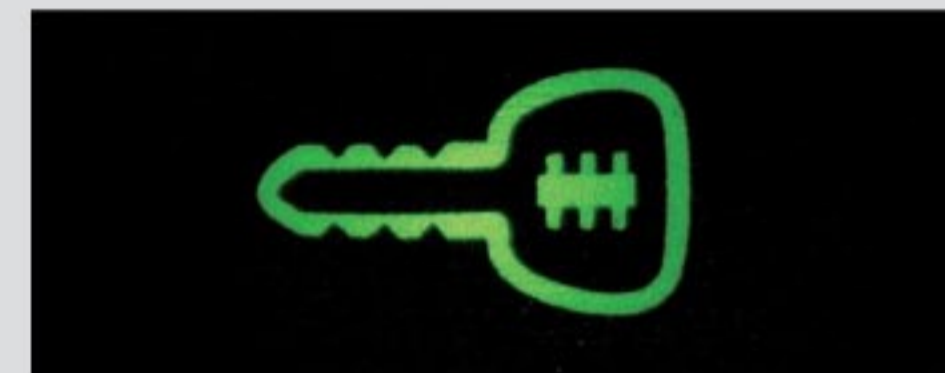

Front 3-point ELR safety belts

The pretensioner tightens to prevent forward motion of the chest.

The load limiter limits excessive pressure on the chest.

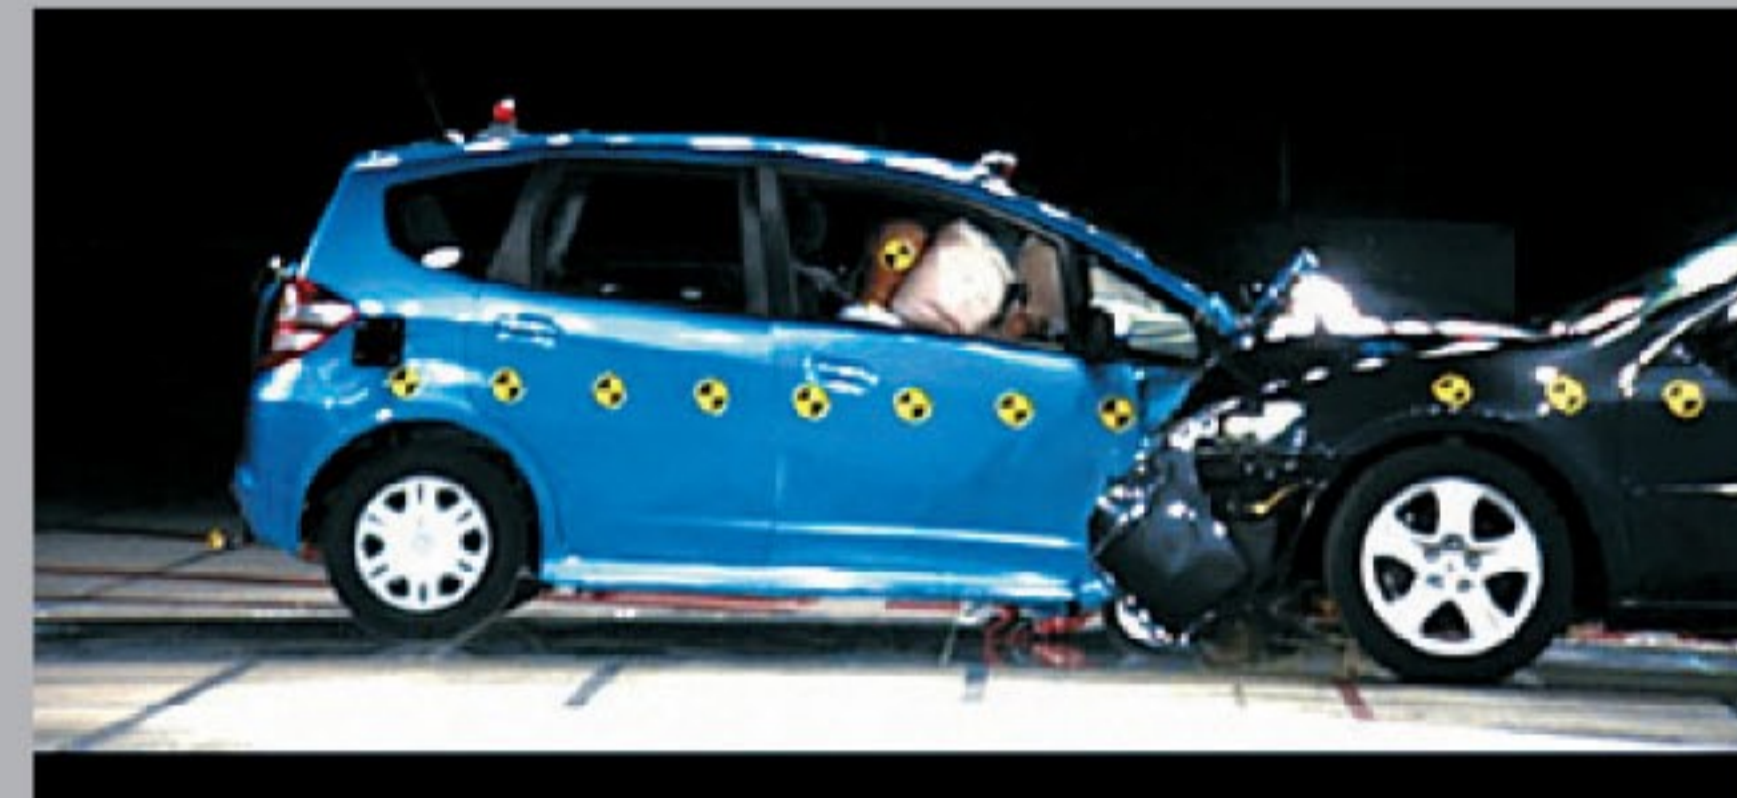

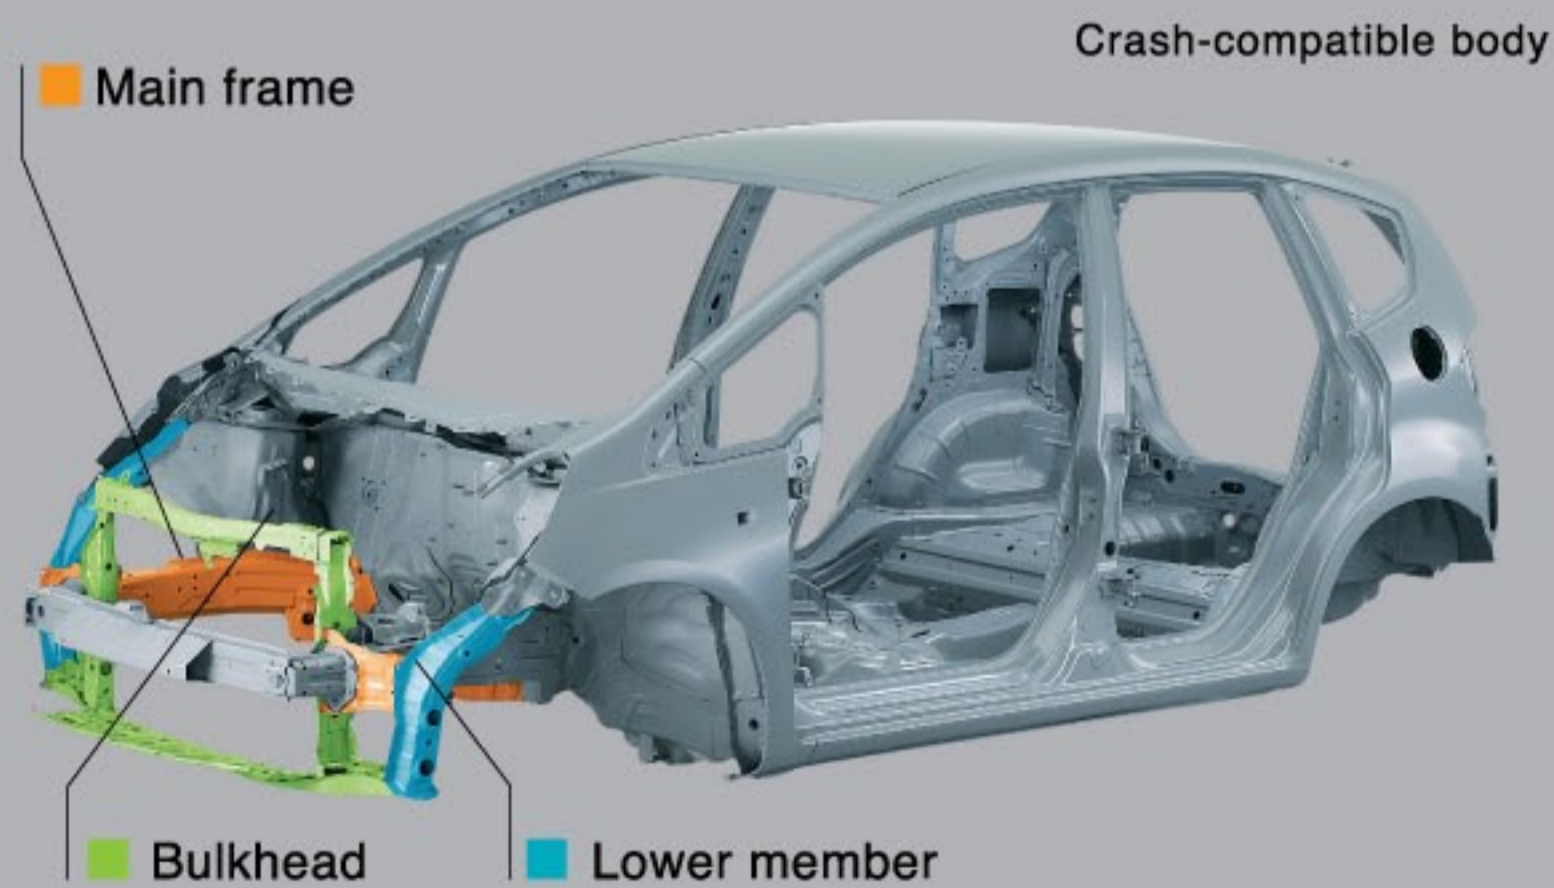

Immobilizer and security alarm

Provided for effective theft prevention.

To make it safer for the passenger, the Jazz is also designed to minimise impact. The pedestrian safety body design includes a windshield base, fender brackets, hood hinges, wiper pivots and engine hood structure.

Protective body construction

Proven real-world protection

The Jazz was extensively crash-tested at Honda's exclusive Real World Crash Test Facility to ensure excellent protection in car-to-car collisions.

The new Jazz. Arrive in style.

Amenities

1. Upper glove box
2. Utility centre console
3. Front centre console
4. Cup holder (Driver side)
5. Fuel lid with push lifter
6. Power retractable door mirror with side turn lights*
7. Rear underseat box
8. Driver armrest
9. Steering wheel audio control*
10. Tilt and telescopic power steering

* Applicable for Grade V only.

† Actual model may vary in detail from images shown.

Other features for your added convenience.

Effortless parallel parking

Compact dimensions combined with nimble handling, panoramic visibility and trimmed bumper corners make parking even in small spaces a breeze. You'll also appreciate the smooth, agile handling on narrow city streets.

Easy Access

Front and rear doors open up to an 80-degree angle for passengers' easy access or exit.

Rear hatch opening is located 640mm from the ground for luggage loading and unloading convenience.

Modulo
Honda Custom Performance

Honda Genuine Accessories

† Actual model may vary in detail from images shown.

Make your Jazz truly yours.

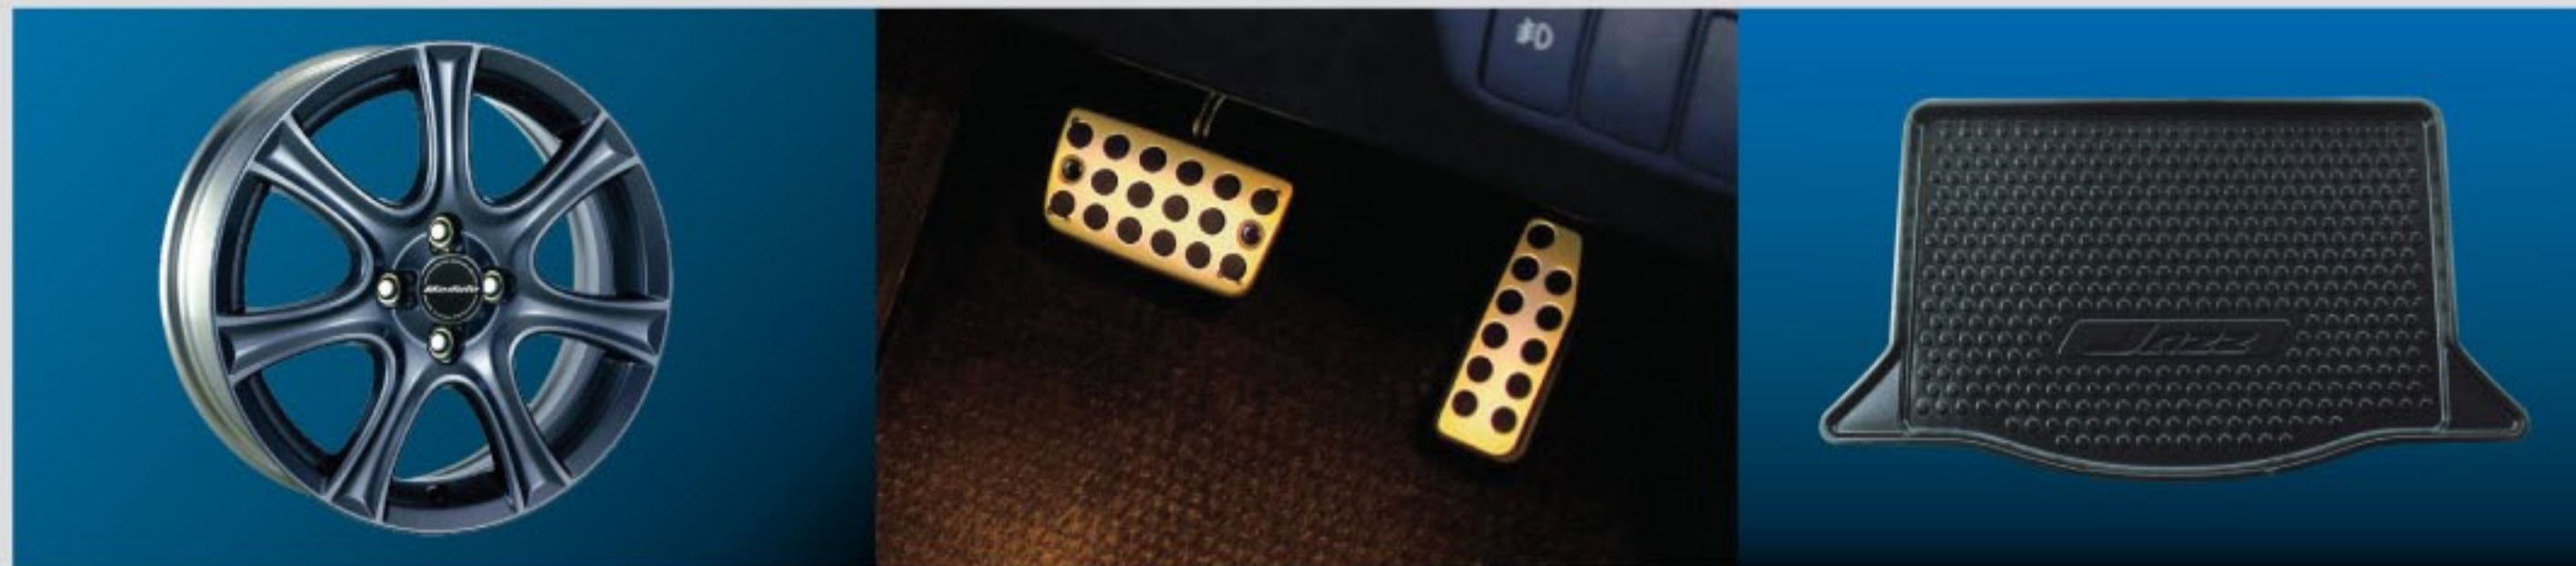

Modulo offers you customisation with Honda Genuine Accessories. No matter if it's classy, aggressive or stylish, there's something to your liking. Crafted by the same team that made the Jazz a reality.

Fog Lights** enhance visibility while driving.*

Tailgate spoiler** design completes the rear end styling.

Illuminated Side Step Garnish** highlights the door sills.

16" Alloy Wheels with Modulo cap.*

Alloy Pedals** with rubber grip sections. **Interior Foot Light**** illuminates when door opens.

Trunk Tray** protects the boot from dirt and spilt liquid.

* Available for Grade V only.
** Available as package.

Premium Utilities

GPS Navigation makes travelling easier. Screen size: 9.7cm(w) x 5.7cm(H)

Child Safety Seats

Child Seat (S) protects infants to babies aged 9 months old.

Child Seat (M) protects 9 month babies to toddlers aged 4 years old.

Child Seat (L) protects toddlers aged 4 years old and above.
