

 Honda Odyssey

The Dream: To create a dynamic and prestigious car that makes everyone in the family happy.

Odyssey model shown.

Last year's best just went one better.

Our family's new adventure.

by Karen (Mother of three)

We're forever dropping off and picking up the kids so when my husband, Steve, suggested a family car, it really made sense. Okay, not exactly. It only really started to make sense when we looked at the new Odyssey. We instantly knew it was the perfect seven-seater for our family.

It's got a sexy look – sleek and sophisticated, which immediately impressed me. Apart from being stylish, it's got great functions and touches that make it so practical for us – like I'm really looking after my family. In short, it made me feel like a proud Mum. As indeed I am! Three times over, thank you: three boys – Jeremy - 16, Tom - 9 and Oscar, who just turned 5.

Dealing with the kids is simple in the Odyssey. It's really inclusive. We can interact with the kids regardless of which row they're in, without feeling like we're climbing over bus seats and, trust me, that's a comfortable feeling.

In fact, I'd have to say that everything about the car puts us at ease. We're completely comforted by the comprehensive list of safety features in the new Odyssey. Hmm... comfortable and comforting – that's a pretty good way to describe it.

There are two models, the Odyssey and the Odyssey Luxury. We test drove both and they're each as great a drive as the other. Thanks in large part to the double wishbone suspension that comes standard on both models, they drive as well as any sedan we've ever had.

Eventually we decided to go for the Luxury model, but it's not an ego thing. In the end it won out because it comes with a shopping list of standard features that we love, including fog lights, aero bumpers and aero side skirts. It's also got tri-zone automatic climate control, a Satellite Navigation system with live traffic updates, an electric sunroof, reversing camera and a 6-speaker audio system with the convenience of a 6-stack in-dash CD player and USB connectivity.

My husband just loves wheels too, so he couldn't go past the 17" alloys. And okay, I'll admit, I do love a few little perks and the Luxury's leather[†] seats fit the bill nicely. Honestly, I'd have looked at the Odyssey years ago if I knew it was so well equipped and such a breeze to drive.

Oh, I'm supposed to talk about the engine. Just quickly the Odyssey has a 2.4 litre, 4 cylinder, DOHC i-VTEC engine. But Steve wants to talk about that more so I'll leave that to him, even though I'm the chauffeur around these parts.

[†]Leather includes vinyl material in selected high impact areas. Odyssey Luxury model shown.

Let's go on a trip.

by Steve.

Well as my better half, Karen, mentioned the Odyssey packs a 2.4 litre, 4 cylinder, DOHC i-VTEC engine. But in talking performance, it's not just size that counts. It generates an impressive 132kW of power at 6500rpm and a maximum torque of 218Nm at 4500rpm – impressive for a family car. So getting up hills, with a car full of tykes and cricket bags, isn't a problem.

When you spend your weekends taxiing kids all over the place, two things become very important – ease and economy. The Odyssey comes with a 5-speed automatic transmission with Grade Logic Control as standard, which is perfect for a start. But I was pleasantly surprised that it only uses 8.9 litres of fuel per 100 kms*. So it's pretty clear to me that Honda's commitment to improving fuel efficiency is working. As they say, they 'Drive Every Drop' of fuel. And the added bonus is that it's a Low Emission Vehicle. So we're doing our little bit for the environment too.

Everything's just easy – that's what's so great about it. For example, they've created a first class design and made the powertrain more compact, so that the turning circle is only 10.8 metres from kerb to kerb. What's that mean? Well that's around the same as a Honda Civic so to me it means the Odyssey drives like a sedan. It's like a small car in a family car's clothing.

Aside from the mechanics, it's a pleasure to drive. I particularly notice this on the long drives, thanks to the double wishbone suspension which provides really great stability and comfort.

I was reading up on the car before we went down to the Dealer and I found out they've made improvements to the chassis in the new Odyssey. It's now more rigid, better balanced and has a lower centre of gravity. That all sounds pretty complicated but what it does is reduce the amount of engine vibration and road and wind noise that reaches the cabin. So when you think about that and the fact there's damping and absorption material throughout the car, you can start to imagine the comfortable silence we enjoy. Well anyway I do, the kids always want the music on, of course.

Enjoying the journey. by Jeremy.

I've grown almost a whole foot this year so space was my only concern in the new car. And now with our new Odyssey I don't have to worry anymore.

From the outside it looks so compact but then you get in and there's heaps of room. Sometimes Mum drives my teammates and me to our 'away' games, so the car is pretty full. But that isn't a drama. I reckon it's because of the way the seats are set up.

They're in a V-shape arrangement. The seats are staggered so that the space is maximised and we can all chat without looking at the back of each other's heads or getting left out of the action. It just feels like we're all hanging out, never like we're on a bus.

Plus, thanks to the V-shape design, we can all see out the windscreen on both sides of the head restraints in front of us. Which is cool for me because I love watching the road.

My teammates and I all love the personal space we get, no matter which row we're in. In the second row, there's loads of head-room and a big centre arm rest. And the third row has so much knee-room, legroom and space for your feet under the seat in front, you could almost mistake them for front seats!

How could I best describe it? Basically it feels like going to one of those premium cinemas instead of a normal one. Comfort was definitely a high priority in the Odyssey. So I can just spread out, relax and enjoy the drive.

So yeah, I love it. I'm on my learners' so I especially love it when Dad lets me drive. Well, I love it when my little brothers aren't in the car – they just tease me; saying I'm hopeless. That's pretty distracting. It's good to learn in because it's got a big view out the windscreen – you can see everything. Dad says it's got something to do with the narrowed 'A' pillar that gives it such a huge field of view. Me, I just say give me the keys!

1. **Interior.** The controls on the stylish dash blend into the console and are all perfectly positioned so they're literally at our fingertips.
2. **Satellite navigation.** Say goodbye to maps, and to traffic jams, thanks to the Odyssey's ingenious navigation system. It features SUNA Live Traffic Updates* to inform you of any delays or accidents and suggest alternative routes. (Luxury model only).
3. **Electric third row seats.** We can adjust the third row seats to the position we need, all at the touch of a button (Luxury model only).
4. **Tri-zone climate control.** We each get to choose our own perfect temperature from the front to the back seats (Luxury model only).
5. **Reversing camera.** This nifty device helps us keep a lookout for anything behind the car when we're reversing (Luxury model only).

Odyssey Luxury model shown.

A convenient story.

by Karen.

I have to admit I'm a gadgets girl. So the steering wheel mounted cruise control had me at hello. Any excuse to use the features and I'm there. I'll use cruise control just going to the shops, fiddle with the power windows even when it's cold out and press the keyless entry button when I'm nowhere near the car just to see how far away it's still active, that kind of thing. It's not just the hi-tech buttons; it's how they blend into the interior. It's functional and stylish, so I get to have my cake and eat it too. And that's what I love the most.

I also spend a bit of time on the phone, so I've found the Odyssey's Bluetooth® phone connectivity* really handy. No matter where I've left my mobile in the car, it can detect a call, and automatically turns down the stereo so all my calls are hands-free. No wires, no cradles, no worries.

The Odyssey Luxury has even more to love, especially the Satellite Navigation with SUNA Live Traffic Updates,* which gives real-time information on delays and accidents. It even offers alternative routes which is not only a lifesaver when I'm running late to pick up the kids but it also saves the odd "difference of opinion" with the hubby who always thinks he knows the way without needing the directions.

The Luxury model also comes with reversing camera and electric third row seats, which fold flat at the touch of a button... No more wrestling with knobs or latches to fold the seats down! One of my girlfriends has the previous generation model and noticed that it's easier to get in and out of ours because it's lower to the ground and there's more legroom and space between the seats. So obviously they're always thinking about improving everything, including the small stuff.

It's when I'm driving that it hits home just how thoroughly Honda has considered the family. My husband and I share the driving so the tilt and telescopic steering wheel allows us to adjust the wheel up and down, in and out, to our own perfect height.

Now, it might sound excessive but the six cup holders and four bottle holders are genius. Honestly, they remove so many of those 'oops, sorry Mum' moments. Especially with our youngest who's just learning that cup holders are for cups. Sometimes the drinks go in upside down, but we're working on that. So yeah, I'm eternally grateful for those little touches because seats this comfy should always stay fantastically clean.

Odyssey model shown.

All's well that ends well.
by Steve.

It's amazing how quickly things change. It feels like yesterday when all I wanted was a rally car. But with a family, things like safety happily replace 'speedy and sporty'. And like us, the Odyssey values this above everything. You can just tell from the shopping list of safety features that they care about keeping my family safe on the road. Let me explain what I mean.

There's an impressive array of features included in case of a collision. Its most important attributes are the driver and front passenger, side and full-length curtain airbags.

It's also got driver and front passenger seatbelt pretensioners and active head restraints for a bit of extra neck support. Not to mention, every seat has a 3-point ELR seatbelt.

And with Honda's revolutionary G-Con technology, we know that safety is well and truly covered. What is G-Con? It's an advanced shielding system to help prevent injury. Personally my favourite features are the progressive crumple zones. Simply because they absorb the impact of a crash, which means less impact makes it into the cabin.

Safety outside the car is included as well because the Odyssey is fitted with the innovative ACE (Advanced Compatible Engineering) body structure – a system that disperses the force of impact in real-world situations.

Of course a bingle is the last thing you'd want and the Odyssey has loads of features to help prevent accidents. Things like Motion Adaptive Electronic Power Steering where the steering reacts to help the driver under slippery conditions. This works with the VSA (Vehicle Stability Assist) that anticipates potentially dangerous moves

and corrects them. And there's always the ABS (Anti-lock Braking System) with EBD (Electronic Brake-force Distribution) and BA (Brake Assist) to help you stop quickly, smoothly and safely.

And to top it all off the Luxury model also has automatic on/off HID (High Intensity Discharge) headlights! That may not sound like much, but when you've got a bunch of kids, anything that the car will do on its own is my kind of feature.

The wrap up.

by Steve.

Odyssey Luxury model shown.

With our new Odyssey, Honda gave us a comprehensive range of ongoing service. For starters we got a three year /100,000km warranty, which is great. I was also happy with the six year rust perforation warranty* that comes with it too. Finding time for, or even remembering servicing is sometimes a struggle in a big family so

having access to the HondaONE website for service reminders is great. I can organise the maintenance hassle-free, just by sitting at the computer. And with our complimentary five year subscription to 'Honda. The Magazine,' I'm always 'in the know' about the latest Honda news. Just like our local Honda Dealership, who always

keep up-to-date with the latest training, and stock a seemingly endless supply of Genuine Honda Parts and Accessories. Gee, I really feel like I'm in the best hands with Honda.

* Honda warranties apply where due care is exercised by the owner and the vehicle is maintained in accordance with the vehicle's owners manual. Please refer to Honda's warranty documentation for exclusions and conditions.

Dreams do come true.

What if there was a car that only emitted water?

Obviously the world would be a better place and the good news is, such a car already exists: the Honda FCX Clarity. It works by converting hydrogen into electricity, which leaves you with only one emission, H₂O. And in 2008, this totally new fuel-cell vehicle went into production.

What if a plane had its engines mounted on top of the wing?

Well, it would be original and it would be called the HondaJet. Secondly, the engines would have to be in a special position on the wing we call 'The Sweet Spot'. That would then result in less drag at high speeds, 30% better fuel economy and because there is no need for structural engine mounts on the fuselage, 30% more cabin space.

What if we had our own solar cell production company?

In recent times Honda has branched out into mass solar cell production. Honda's unique C.I.G.S solar cell produces the highest level of conversion efficiency in the thin film category and only requires half the energy to manufacture, so it's environmentally friendly throughout its entire life. Why does a vehicle company produce solar cells? Purely so we know that we are doing everything possible to help prevent global warming.

What if we tested our new technologies in the most extreme conditions possible?

At Honda we have always believed that racing is fundamental to our development. It's the ultimate testing ground and regardless of whether we win or lose, the same question is always asked – how can we improve performance? And you can be sure that for every improvement made on the track, there is an equal improvement made to every Honda vehicle that hits the road.

What if our technology was more... alive?

ASIMO, the World's Most Advanced Humanoid Robot, was born from a dream to create a robot that could benefit people in everyday life. His name stands for Advanced Step in Innovative MObility, a title he's definitely worthy of. Currently ASIMO's capabilities include: running at 6 km/h, walking on uneven surfaces, turning smoothly, climbing stairs, pushing a cart, receiving and delivering trays and he can even dance a little boogie if the occasion calls for it. Our dream is that one day everyone will have an ASIMO of their own to help around the home or office.
