

1992

HONDA AUTOMOBILES

While Honda has been manufacturing cars for nearly 30 years, it has also been building something even more important. A reputation for excellence.

This year is no exception. The all-new Civic, which started as a practical, dependable line of efficient cars, is now a model of advanced engineering and style. The totally redesigned Prelude is like no other Honda you've seen, or driven, before. And then there's the Honda Accord. The car that lives up to its name as the best-selling automobile in America.

For 1992, every Civic, Accord and Prelude features a driver's side airbag Supplemental Restraint System (SRS). The Prelude Si with 4WS Option Package™ is also equipped with a passenger's side airbag. And all Civic Sedan, Accord and Prelude top-of-the-line models include a standard anti-lock braking system (ABS).

At Honda, your safety is important. Because we have more than our reputation to protect.

CIVIC VX SHOWN IN MILANO RED

A WHOLE NEW SET OF VALUES.

It began with a new concept in the automotive industry—practical, efficient and fun-to-drive cars—and came to be known for its engineering excellence and outstanding dependability. Now Honda has built on this premise by developing the 1992 Civic.

The new Civic is much more than you'd expect from a car in this class. And everything you'd expect from a Honda. Advanced research and technology have been applied where you need it most. Making the 1992 Civic Sedan and Hatchback more exciting than ever for you to drive.

All of the new Civic engines combine power and efficiency beautifully. Two of them benefit from breakthrough technology. In the VX, the VTEC-E engine yields outstanding fuel economy**

without sacrificing power. The Si and EX engine delivers high performance, while continuing to be fuel efficient. It's called variable valve timing. And it's receiving a lot of attention.

But that's not all. Honda's unique 4-wheel double wishbone suspension has also been refined for remarkable agility and an incredibly smooth ride.

Safety continues to be an important aspect of the Civic. A driver's side airbag Supplemental Restraint System (SRS) is now standard.

The latest in engineering and design bring to this new Civic the kind of advancements usually reserved for more expensive cars. With three sedans and four hatchbacks, ranging from high-performance to high-efficiency, one of them is bound to be the perfect combination for you.

AMERICA IS SOLD ON THE HONDA ACCORD.

Only one automobile has appeared on *Car and Driver's* Ten Best list every year since the list began in 1983.¹ And only one has been the best-selling car in America* for the last two years in a row. The Honda Accord.

This is the automobile other cars are judged by. The standard of quality and value. The 1992 Honda Accord Sedan, Coupe or Wagon. Each is distinctively styled and thoughtfully refined. And each is designed with your safety in mind.

Which is why this year, every Accord includes a driver's side airbag. Standard. The EX models also feature 4-wheel disc brakes with a standard anti-lock braking system (ABS).

The Accord 4-Door Sedan is the car Honda built its name on. The flagship. For 1992, there are

three to choose from. The Accord DX, the Accord LX and the Accord EX.

Then there's the Accord Coupe. It could get by on looks alone. But our engineers would never stand for it. After all, whether it's an Accord DX, LX or EX Coupe, it's still a Honda. A very personal Honda.

And the reasons to drive an Accord keep on growing. Today, there are two more. The Accord LX and EX Wagon. They're everything you ever wanted in an Accord. And more.

Every Accord is as solid as a vault.² And according to the *Kelley Blue Book*, almost as safe a place to keep your money. For the last six years, it has been the number one car in resale value in its class. Just one more reason why buying an Accord could be the smartest thing you could do in 1992. .

THE CAR IS NEW. THE CONCEPT TIMELESS.

The mission was to design and build a totally new Prelude. It would be quicker. Sleeker. Even more seductive.

From the review of the first sketch to the turn of the last bolt, Honda's passion to accomplish this goal never wavered.

One look at the new Prelude confirms this. The body is striking, combining aerodynamic slickness and individualistic style. Inside, the interior blends excellent ergonomics with a very distinct atmosphere for driver and passenger alike. Yet, a quick trip down your favorite stretch of road will tell you this car isn't all looks.

Under the hood, both the new Prelude S and Prelude Si 16-valve engines are technological masterpieces. The 4-wheel double wishbone

suspension has been refined, offering unmatched handling and ride characteristics.

Another advancement can be found on the Prelude Si with 4-Wheel Steering Option Package.** The rear wheels turn in relation to the front, creating an unbelievable feeling of stability and control.

For added safety, a driver's side airbag Supplemental Restraint System (SRS) is standard on all Prelude models, while the Si with 4WS is equipped with both a driver's and passenger's side airbag.

An anti-lock braking system (ABS), standard on the Prelude Si, helps the driver to retain steering control on slippery surfaces.

In total, there are literally hundreds, even thousands, of changes to the new Prelude.

Mission accomplished.
