

The Honda Stream 2003

Few things in life are as seductive and exciting as a new car. The moment you see it, your imagination will run as far as the open road ahead, and beyond to what's over the horizon. From dreams to reality is our purpose and our promise, inspiring every car we design and build. We invite you to discover the Stream - and experience the power of dreams for yourself.

Stream seduction

There's an invitation in every line and curve,
something hypnotic in its flawless symmetry.
It mesmerises, draws you irresistibly closer.
But it's when you take the Stream on the road
that the seduction is completed.

Stream combines sports-coupé performance
and handling with estate-car space and flexibility.
It's the definitive sports activity vehicle that adapts
effortlessly to your lifestyle - a serious driver's
car with a new and unique dimension.

Model featured 2.0 i-VTEC SE Sport

pure performance

2.0 i-VTEC engine

An easy right-hander, slightly uphill, clear road ahead. No need to brake, but Stream's all-round discs with ABS and EBD are reassuring anyway. Your hand lightly grips the facia-mounted gearshift. Flick down, and feel the 2.0-litre i-VTEC engine push you back in your seat as the revs soar.

F1-inspired suspension holds the road as though you're on rails. Nail the apex, then the engine kicks again as you power through the exit, hungry for the next one.

Relish every second on the road with Stream's superlative engine and exhilarating handling.

The power to excite. The power to perform.

room with a view

Spacious, luxuriously-appointed accommodation in relaxing surroundings, offering panoramic views in all directions. Superbly equipped, with air-conditioning and seating for seven adults, the Stream is finished in a clean, contemporary style.

With its many unique design features, including flat floor and innovative storage spaces, the Stream will suit the discerning, ambitious driving enthusiast.

Model featured 2.0 i-VTEC SE Sport with optional Stereo CD Tuner

Getting away from it all needn't mean leaving everything behind.

Wherever you're going, whoever - or whatever - you're taking along for the ride, Stream's seven seats fold and flatten, creating huge, flexible load space that extends and expands to accommodate.

Short hop or long haul, you'll find room for everything - except improvement.

give yourself **space**

a driver's delight

a passion for detail

Come closer. Now just look. Take your time.
We did.

Our attention to detail borders on obsession.
Ninety-nine percent right won't do - for that
one percent, we'll go back and start again.

It's painstaking work, but, like you, we won't
settle for anything less than perfection.

Savour the immaculate fit and finish of every
panel, the solid refinement of the interior, and
the reassuring sense of everything looking,
working and feeling exactly as it should.

Share our passion.

Every aspect of Stream's design has safety, as well as style, as its inspiration. The unique triple-deck headlamps throw light further and wider for improved visibility ahead and to the side. The long, high-mounted brake-lights framing the rear window are easier for other drivers to see - and give them more time to react.

Under the smooth bodyshell, Stream's rigid safety cage incorporates side-impact protection beams, twin front airbags and side airbags as standard.

Stream. Design that defies convention, safety without compromise - everything that Honda stands for.

good looks with **good sense**

making a world of difference

The engine is the heart of any car. As the world's largest engine manufacturer, we've spent over 50 years turning dreams into reality in the world's toughest competitive arenas - and developing technology we then apply directly in our production cars. It's a commitment to innovation and excellence that's brought us seven Formula One Constructors' titles, and over 500 bike Grand Prix wins.

But our successes aren't confined to the racetrack. Our engines are the power behind Honda Formula 4-Stroke, widely regarded as the world's leading one-make powerboat series. You'll even find Honda engines in the air, where strength, performance and reliability are put to the severest test.

We're also world leaders in robot technology. Our latest creation is ASIMO (Advanced Step in Innovative Mobility), a compact, lightweight robot designed to walk naturally and smoothly in all directions. Sensors tell the robot exactly where it's placing its feet, and it shifts its centre of gravity as it walks, just like we do. ASIMO can even negotiate stairs and is able to 'see' and avoid obstacles in its path. With almost the same range

of movement as our own hands and arms, it can lift and move a variety of objects with incredible delicacy and precision. ASIMO can interpret the postures and gestures of humans, and can even recognise their faces and address them by name.

In the future, ASIMO's descendants could be living with us in our homes and even helping with everyday tasks. We see this work as an integral part of our business, finding new ways to integrate technology into everyday life, and creating future machines - even cars - with a uniquely human dimension.

This unparalleled experience inspires every engine we design and build. For the Stream, we dreamed of creating something special. Now you can enjoy the reality.

The 2.0-litre i-VTEC engine boasts 16 valves and fuel-injection, and develops a potent 156 PS in the Stream. Engine and exhaust components directly derived from our F1 cars cut noise and vibration, and reduce friction to make your Stream quieter, smoother and more fuel-efficient.

Drive the Stream. Experience the power of dreams.

Caring for the environment

Let's be clear. We're all aware of climate change, pollution and fossil fuel depletion. But we all need transport. The key is how a global corporation like Honda can satisfy this demand in a sustainable way.

Green policies aren't something we've bolted onto our activities – in 1990 we committed to being industry leaders in environmental excellence and we apply our principles daily. These are to implement environmental management systems, minimise space, energy, emissions and waste. We also set goals, like our aim to achieve zero waste to landfill by 2010.

Honda of the UK Manufacturing (HUM) in Swindon is a prime example of our progress. They have now achieved certification to two Environmental Management Standards: ISO4001 and EMAS 2 registration. They've reduced their waste by 50% over the past three years and are well on the way to achieving the zero waste target.

Years of research into new technologies means our products are equally environmentally advanced. All Honda vehicles have aluminium engines to reduce weight, increase efficiency and cut emissions. The Honda Insight, which runs on both petrol and battery power, was voted first in the Sports/Coupé category of the Environmental Transportation Association's Car Buyers guide 2002, and is now widely recognised as the most environmentally friendly production car ever

developed. This year the Civic 4 door SE Executive powered by similar IMA technology will be launched as the most environmentally friendly production car in its category.

We believe the future lies in alternative fuel and after years of development, our FCX fuel cell vehicle made its debut on both the Japanese and American markets in December 2002.

Tokyo and Los Angeles took lease of the first vehicles and there are plans to lease a further

thirty fuel cell cars to both California and Japan over the next three years.

As for our motorcycles, we have committed ourselves to reducing emissions by a third and increasing fuel efficiency by 30% and we are also planning to stop building two strokes in favour of four strokes, even in 50 cc machines.

Our outboard motors are already 90% cleaner than required under regulations coming into effect in 2006 and use no two stroke engines.

Good news for today's customers. Even better news for tomorrow's.

specification

† Fuel consumption.
This brochure contains the results of the official new fuel consumption test which adheres to the EC directive 1999/100/EC. This test is designed to give results that are more representative of actual on-road fuel consumption.
NB. The figures shown in this leaflet are primarily for comparison and will not necessarily be the same as the fuel consumption actually achieved on the road.
Please note that when accessories are fitted to a vehicle fuel consumption and CO₂ figures may differ from those quoted.

* Maximum towing weights are based on the ability of the car, with two occupants of 75kg each, to restart on a 12% gradient at sea level. At altitudes in excess of 1500 metres, engine output may drop with a reduction in towing capability. Extra weight, such as additional passengers or luggage, should also be deducted from the maximum towing weight.

** For further information please refer to "Your Choice In Car Entertainment" brochure.

a perfect finish

An inspiring range of striking colours, carefully selected to show off the Stream's bold, seductive lines to full advantage. The deep, lustrous finish is achieved using our pioneering water-based paints, completing a 13-stage anti-corrosion process that protects both your Stream and the environment.

accessories

Rear Bumper Loading Strip
Protects and guards rear bumper from wear and tear.

Rear Mud Flaps
Front mud flaps also available.

Rear Spoiler
Sporting looks with a rear brake light helps reduce rear screen dirt accumulation.

Centre Dash Trim
Available in Blue Marl or wood effect, the centre dash trim kit enhances the aesthetics of your Stream, providing a stylish classic look to the interior.

Cooling Box Fridge
Cooler box plugs into cigarette lighter socket. Chills to 4°C fridge temperature.

Front Mini Table / Cup Holder

Stamp your unique style and personality on your Stream with our exclusive range of genuine Honda accessories.

There's everything you need to add those essential design details inside and out, upgrade your in-car entertainment, or extend the Stream's load-carrying capabilities. All designed and manufactured to the same stringent standards as the Stream itself - and all backed by the same 3 year/90,000-mile warranty.

15" Spoke Alloy Wheel

15" 5 Split Spoke Alloy Wheel

Surfboard / Windsurfer and Mast Attachments

Snowboard and Ski Attachment
Up to four pairs of skis or a combination can be fitted.

Roof Storage Boxes
350 litre Top Box and 320 litre Roof Box (as shown).

Shouldn't buying a car be a joy too?

?Want to predict the future

The Stream, like all Hondas, is made to our exacting standards. But we take nothing for granted. So the Stream is covered by a 3 year manufacturer's warranty*. You can extend this period of cover with a Hondacare Guarantee and give yourself peace of mind for up to a further 4 years. Hondacare Guarantee is unique and only available from authorised Honda dealerships.

Just choose the period of cover you want - from 4 months to 4 years. Then sit back and relax, knowing that help is only a telephone call away. Unexpected repair bills will be settled immediately.

Further benefits include:

- Repairs carried out by Honda Trained technicians
- Guarantees the use of only Genuine Honda parts
- Fully comprehensive AA cover

Just ask your authorised Honda Dealership for more details.

*Subject to the Warranty terms and conditions listed on pages 6 and 7 of your service book.

?Like beneficial Insurance rates

The Hondacare insurance scheme has been specially designed so that Honda owners receive designed so that Honda owners receive beneficial insurance cover at competitive rates. To obtain details of all the benefits included and to receive a quotation, please contact your authorised Honda Dealer or call 0845 200 8000.

?Is help at hand when it really matters

With Honda it is. Because if you're unlucky enough to have an accident, we have a free Accident Management Service that will sort all the details for you and make it a priority to get your car back on the road. In the event of an accident please telephone 0800 521 728.

Honda Finance

There are many ways in which Honda Finance can help you drive away a new Honda.

We have a range of finance options that can be arranged to your exact requirements on both new and used cars. You can choose the size of deposit, length of repayment period and whether you want us to guarantee the future value of your car. There is no form filling and finance can be arranged instantly - just visit your local dealership. All applications for credit are subject to status. Indemnities may be required. Simple.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from him on request. This publicity material applies to the UK only Trade Descriptions Act (1968). Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer especially if your model selection is dependent upon one of the features advertised.
