

New Generation
Hyundai i10

HYUNDAI | NEW THINKING.
NEW POSSIBILITIES.

New Thinking. New Possibilities.

We, at Hyundai, are inspired by the passion to create cars that exceed your expectations. Dedicated to the way things should be, not the way they are. Looking for answers before the questions have been asked. We never stop searching for better solutions that help you get more out of life. It's just the way we are.

What does this mean for you? It means that the Hyundai you drive has been engineered to surprise you with its built-in integrity. To compliment you with its crisply fluid design. To care for you, your family and passengers with its embracing strength, and to minimize its impact on the environment. All of this being the product of new thinking that opens up a world of new possibilities.

Your life. Your city. Your car

You're looking at the city car that brings new levels of style and sophistication to the city streets. The new Hyundai i10. One look is enough to tell you that this car has been designed and engineered in Europe. It's also built in Europe, and is available with features and equipment that you'd normally associate only with larger, more expensive cars. Because it's your life, and we want to make it as enjoyable and fulfilling as possible.

A wake-up for the streets

The athletic stance of the new i10 is the result of its perfectly balanced, dynamic proportions. It looks wider and lower than other cars in this class and it boasts a truly sporty profile combined with the crisp, signature styling lines that typify our “Fluidic Sculpture” design philosophy. The i10 has exactly what it takes to turn heads on every street.

Your personal upgrade

Whatever the length of your journey, you'll appreciate the attention to detail that's evident inside the new i10. High quality materials have been selected not only to look good, but also feel good too. The elegant "white on blue" information on the LCD screens is easier to read in daylight or at night and all controls - including those of the multifunction steering wheel - have been sited for easy, intuitive use.

Seat heating. The front seats have individual heating controls, each with three temperature settings.

Heated steering wheel. For those early starts on cold winter mornings.

Indulge yourself

We asked ourselves why many features are not available in small city cars, and decided that there's no good reason. So, as well as heated seats, smart key and engine start/stop button, you can specify your i10 with automatic air-conditioning, a heated steering wheel, and much more. Oh, and there's lots of room and the feeling of comfort and safety you'd expect only in larger cars.

Engine start/stop button. Keyless starting when the smart key is on board in your pocket or bag.

Automatic air-conditioning. Just select your preferred temperature and the system does the rest.

Cruise control with speed limiter. For stress-free driving on longer journeys.

USB & AUX. Easy connectivity for your iPod or other MP3 device, just plug-in and play.

Audio controls. Adjust volume and change stations or tracks with ease.

Bluetooth connectivity. Steering wheel mounted controls for safe, effortless telephone operation. Bluetooth also enables access to your favourite music via audio streaming.

Everything in its place

And a place for everything. No other car in this class has as much useful cabin storage space as the i10. It's the only car in its class that can store a 1-litre water bottle in the front door map pockets. The whole interior has been designed to be as user-friendly as possible, with easy-access storage places just where you need them.

The front door pockets have been specially designed to accommodate 1-litre water bottles

Between the front seats are 2 cup holders, one of which is large enough for a 1-litre water bottle.

In the Premium model, the practical glove box is also conveniently illuminated.

The central storage bin with foldaway cover (Premium model) is conveniently located just in front of the gear shifter.

As big as your life

Not only is the cabin the roomiest in its class, the boot is also a class winner. With all seats in use, the luggage capacity is 252 litres. Fold the rear seats down and that capacity expands to an impressive 1046 litres. So there's lots of room for carrying whatever your city life demands.

The load cover protects belongings from prying eyes, and lifts with the hatch for easy loading and unloading.

There are 252 litres of useful space behind the rear seats.

For added convenience and flexibility, the rear seats fold separately in the proportion 60:40.

With all rear seats folded, the carrying capacity expands to a class-beating 1046 litres.

What your city's been waiting for

The new i10 brightens up every urban environment.

Making the city safer

It's important to us that you feel comfortably safe in your i10. It is built around a tough safety cell using high-strength steels, while 6 airbags are provided to protect all occupants. Electronic Stability Control (ESC), Vehicle Stability Manager (VSM), Anti-lock Brakes (ABS) and Tyre Pressure Monitor System (TPMS) combine to keep you out of trouble on the move, and Hill-start Assist Control eliminates rolling back on steep hill starts. There are seat-belt reminder warnings for all seats, and the front cowling has been designed to minimize injury to pedestrians. That's a huge amount of safety engineering for such a small car.

Electronic Stability Control (ESC). Sensors monitor speed and yaw data, applying variable braking to individual wheels to prevent uncontrolled skidding in extreme driving situations
Vehicle Stability Management (VSM). Coordinates the ESC and Motor-Driven Power Steering (MDPS), adding subtle steering inputs to maintain stability through corners, in sudden lane changes and on surfaces with unequal grip.

Hill-start Assist Control (HAC). Starting on hills has never been easier. HAC briefly applies the brakes to stop the i10 rolling back when moving off. Standard on the Premium model.

6 airbags. Two front airbags, two side airbags and two curtain airbags for all-round occupant protection.

Height-adjustable seatbelts. Safety that also increases comfort. Premium model only.

A pleasure to drive

However large or small, we believe that every Hyundai should reward its driver with a satisfying and comfortable driving experience. And that applies to all journeys, no matter how long or how far, so travelling in the new i10 feels like driving in a larger car. We've developed optimized suspension front axle geometry that delivers enhanced steering precision and feedback.

The rear axle has also been engineered to provide superior ride and handling.

Our refined engines and transmissions have been developed in Europe to give you all the performance you need combined with low fuel consumption and low emissions. There's even an LPG option. You can choose between a 5-speed manual and 4-speed automatic transmission.

There are three available petrol engines:

the 1.0 Kappa MPI with 66PS (48.5kW), the 1.25 Kappa MPI with 87 PS (64 kW), and the bi-fuel 1.0 Kappa LPGI engine with 67 PS (49.3 kW) that also runs on LPG for enhanced fuel economy. All engines feature Continuously Variable Valve Timing (CVVT) and maintenance-free timing chain.

Transmissions. There's a precise 5-speed manual transmission, or you could choose our smooth-changing 4-speed automatic. Whichever you choose, the gear change is located conveniently high for ease of operation.

BlueDrive. Using the 66PS 1.0 Kappa MPI engine, our BlueDrive model combines integrated Stop & Go (ISG), Alternator Management System (AMS) and low rolling resistance tyres to achieve combined fuel consumption of 4.3l/100 km and 98 g/km CO₂ emissions.

Now you're in the driving seat

Your new generation i10 is available in three versions: Access, Comfort and Premium.

Three kinds of i10

We're all different, with different ideas and preferences. So we've created three different versions of the new i10 for you to choose from.

ACCESS: simplicity itself

If it's the simple things in life that excite you most, then the new i10 Access model is for you. It's a safe, functional car that helps you get on with your city life.

- Interior colour highlights in beige
- Seats in a beige/black fabric combination

COMFORT: almost all you need

There's all the standard equipment you need to enjoy any journey, long or short. And the possibility to add even more by choosing from an extensive range of optional equipment.

- Interior colour highlights in either blue or orange
- Seats in either a blue/black fabric or orange/black fabric combination, to match Interior colour highlights
- Body colour door mirror caps and door handles
- Black b-pillars
- Radio CD MP3 with USB

PREMIUM: you've earned it

It's the i10 that brings a touch of exclusivity to the class. But there are still some tempting options available to help you personalize your car.

- Interior colour highlights and seats as in Comfort model
- Optionally available are red interior highlights together with seats in a red fabric/black leather-look combination
- Body colour door mirror caps and door handles
- Side body mouldings
- 14" alloy wheels *
- Manual A/C

* not with Blue Drive/Eco Package

DIMENSIONS

With you all the way

Driving your new i10 away from the showroom is just the start of a long and happy relationship. We've prepared a number of programmes to make sure that it stays that way.

5 Year Triple Care Unlimited Mileage Warranty

Living proof of our faith and trust in our products is our 5-year new vehicle warranty. You enjoy 5 years carefree driving, 5 years roadside assistance and 5 years annual vehicle health checks to keep your driving trouble-free. All without any mileage restrictions.

MyHyundai

As an owner of a Hyundai, you will have access to this exclusive portal. It opens the door to a world of special offers you won't find anywhere else, the latest news about Hyundai, and it provides a secure zone for the storage of your important vehicle details. Automatic reminders for servicing and vehicle health checks can also be set here. It all makes owning and driving your Hyundai an enjoyable and hassle-free experience.

Finance

Hyundai can help you finance the purchase of your new Hyundai over periods of up to 5 years. Our finance plans can be very flexible - just ask your dealer for detailed information, and choose the plan that suits you best.

12-year Anti-perforation Warranty

In addition to our 5-year new vehicle warranty, we also provide a 12-year warranty against perforation of the bodywork from the inside.

Hyundai Genuine Accessories

Nothing fits better than a Hyundai Genuine Accessory. They are designed and engineered to enhance the looks and capabilities of your i10, and meet the rigorous manufacturing standards demanded of all Hyundai products.

Hyundai Genuine Parts

Produced to the same exacting standards as original equipment, our genuine replacement parts are covered by comprehensive warranties.

What's behind the badge?

The philosophy behind the way we design and engineer our cars is explained at the beginning of this brochure. But we'd also like to tell you some-thing about who we are, how committed we are to Europe, and give you some insight into the future.

Size isn't everything.

Our current market share in Europe may not yet appear very impressive, but we continue to enjoy a consistent history of steady growth, which has resulted in an ever-expanding community of satisfied Hyundai owners across the continent. Seen from a global perspective, Hyundai Motor is now the fifth largest automaker, and that means that a vast array of resources can be concentrated on the development of cars that you will want to drive. That's our commitment to you.

Committed to Europe.

One look at our range of cars immediately confirms that we build cars that you will feel at home in. Actually, that should not be surprising: 95% of all new Hyundai cars on European roads have been designed and engineered at the Hyundai Motor Technical Centre in Rüsselsheim, Germany. Many of them have been built at one of our European production facilities. In fact over a quarter of a million people in Europe are proud to be employed by Hyundai. Annually we pay € 1.7 billion in taxes in Europe, we source 72% of our supplies in Europe, to a value of € 3.4 billion, and our sales and distribution network contributes € 2 billion to the European Gross Domestic Product. We're here to stay.

Building on success.

Standing still has never been part of our DNA. We know that to succeed you must create, innovate and constantly raise standards of quality. Our European investment programme has just seen the opening of the Hyundai Test Centre located at the renowned Nürburgring. This provides us with a state-of-the-art facility where our "Accelerated Durability" test procedures - simulating 180,000 km severe driving in just a few weeks - can be put into practice.

Competitive spirit.

We all know the satisfaction of success, especially as the result of dedicated hard work. It's something we can enjoy after the launch of a new car, but it's even more fun when it involves motorsport. And that's the next challenge we've set ourselves. In 2014, our new i20 WRC rally car will emerge from our purpose-built Alzenau motorsport facility into the media glare of the World Rally Championship. It will be tough going but, as in everything else we do, we're determined to succeed.

Number one.

Not the biggest, but the best! In what is probably Europe's most demanding car market, Germany's authoritative Auto Bild Qualitäts-report ranked Hyundai number one for owner satisfaction in 2010 and 2011. Because we put you first, you put us first. Thank you.
