

TX1
The taxi driver's taxi

TX1. Designed for comfort.

Built for safety.

*"My driving seat
is my office.
I'm in it for eight,
ten or more
hours a day.
I don't just want
comfort - I need it"*

Once you take the wheel of a TX1, you can relax. The TX1 achieves standards of comfort and safety rarely seen in a purpose-built taxi before. This leaflet introduces you to just some of the key features. But, the best way to discover the TX1 difference is to take a test drive. Ask your dealer to arrange one for you.

A more comfortable drive.

You'll be at the wheel for a long time. So, the adjustable driving seat in the TX1 is based on the same advanced seat technology that

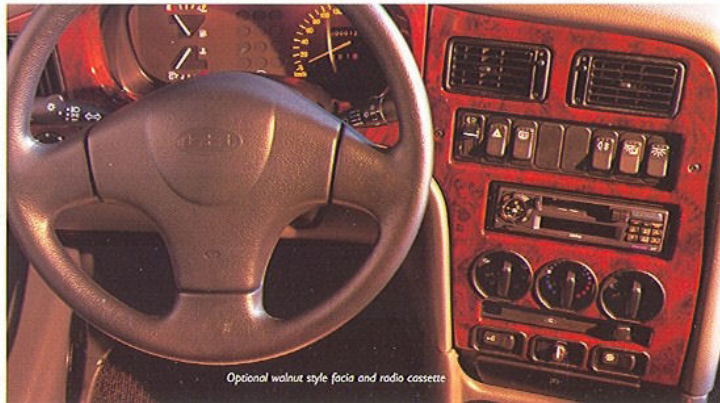

Ergonomic purpose-designed driver's seat

†Adjustable for height/weight.

you find in trucks. That means it's engineered to provide support exactly where your body needs it most.

For ease of use, the ergonomically designed controls are all highly visible and within easy reach. And, just like everything else on the TX1, each button, switch, slider and stalk has been built to withstand heavy everyday use.

The optional driver's compartment air conditioning and our purpose-built suspension system make the TX1 an enjoyable drive.

Optional walnut style fascia and radio cassette

A safer drive.

In the TX1, you're exceptionally well-protected. The body includes crumple zones designed to absorb impact. There are foam-reinforced bumpers to front and rear. The tinted windscreen - 48% bigger than the Fairway for better visibility - is laminated for safety. And, if you are in a bump, front and rear wing panels are bolted on for fast, easy replacement.

The TX1 also helps to protect you in other ways too. There's a security screen between you and your passengers. You have central control of the locks on all doors. And a door mounted switch can be used to lock the front doors only.

48% bigger screen for better visibility

The safety of your passengers is important too. So, passenger seats are all equipped with inertia reel seatbelts. Other features include yellow seat-edge strips and door handles for better visibility and a built-in child seat.

It all adds up to a better drive in a taxi designed for the comfort and safety of both you and your passengers.

Wide rear passenger seat with integral child seat

Passenger information

*"I want to be as
safe in my cab as
I can be.
That means safety
for my passengers
too. I don't want
any compromise
there."*

Specification

Engine - Nissan 2664cc (162.54 cu in.) diesel, four cylinder inline 8 valve OHV. Max power 60.3 kW (81.9 PS) at 4300 rpm. Max torque 165 Nm (119 lb.ft) at 2400 rpm. Gear type oil pump, full flow filter and built in cooler.

Manual gearbox and clutch - Nissan 5 speed all synchro, floor shift - ratios 1st - 3.592, 2nd - 2.246, 3rd - 1.415, 4th - 1.00, 5th - 0.821, reverse - 3.657. Single dry plate clutch 240 mm (9.45 in.) diameter, hydraulic operation.

Automatic transmission - Nissan 4 speed, ratios 1st - 2.842, 2nd - 1.542, 3rd - 1.000, 4th - 0.686, reverse - 2.400.

Suspension and steering - Independent front suspension. Parabolic spring rear suspension. Power assisted steering, turning distance between walls maximum 8.53 metres (28 ft). 5JK x 16 wheels with 175R16C (6PR) tyres.
