Forester 2.0D-S

why Forester?

Symmetrical force of power

Our All-Wheel Drive philosophy

Greater balance and control. That's the confidence you get from our unique Symmetrical All-Wheel Drive System, which delivers the drive distribution to all four wheels, all the time. Every Subaru Forester has an innate sense of balance from the ground up, thanks to a near perfect symmetrical layout.

Boxing clever

Our famous Subaru Boxer engine

While most engines stand vertically, ours lay flat. The famous Subaru Boxer engine delivers handling like no other engine can. Sitting horizontally in the engine bay, it moves like a boxer's fists with a punch and counterpunch action. Lightweight, low and flat, it makes for perfect balance and a much lower centre of gravity. It creates less noise and vibration too. All of this means better on-road handling for you. More stability. More performance. More fun. And a more confident drive.

We're looking out for you

EyeSight® driver assist

We were the first and only company to put this camera technology into our cars. A sign of our future-thinking and our commitment to quality, technology and safety, EyeSight® driver assist is like your second pair of eyes, spotting potentially dangerous situations. If EyeSight® detects anything that might be of danger, it warns you audibly, urging you to take action and brake. And it automatically applies the brakes if you don't. Available on Forester 2.5i-S and Forester 2.0XT Premium.

Eyes in the back of your head

Rear view reverse camera

Manoeuvring back into a tight side street? Family driveway littered with toys? Reverse with confidence, thanks to our rear view camera technology. The rear view reverse camera is like having eyes in the back of your head. This greatly improves your visibility and reduces the risk of bumps and scrapes. Rear view camera on every Forester variant.

Finest safety

5 star ANCAP Safety across the range

With spirit, quality and imagination comes some serious safety innovation. We want every Subaru to be amongst the safest cars on the road. Engineered full of cutting-edge technologies and the most intelligent design features. It's not a Subaru unless it carries the maximum 5 star ANCAP Safety Rating¹.

1. The Australasian New Car Assessment Program (ANCAP) gives consumers consistent information on the level of occupant protection provided by vehicles in serious front and side crashes.

Greater vision all around

The one metre rule

We believe that the more a driver can see, the less danger there will be on the roads. Particularly when it comes to reversing out of the driveway amongst small children or when driving in school zones. So our One Metre Rule¹ is a design philosophy based around greater driver vision. Every Subaru¹ is designed so that the driver can see an object of at least one metre high (i.e. the average height of a child) from any window – front, rear, left or right – comfortably from their seat.

1. One metre design rule applies to all MY16 Subaru models, excluding BRZ.

Efficiency without compromise

Auto Stop Start

We're constantly thinking of ways to help the environment and become more fuel-efficient. That's why we developed Auto Stop Start technology. It saves fuel by immediately cutting the engine when you don't need it, like when you're idling or stopped in heavy traffic. The moment you're ready to move again, the engine restarts in a fraction of a second – without you doing a thing. Our Auto Stop Start technology is available on Forester petrol variants.

Excellent fuel efficiency

Subaru makes for better adventures and a healthier planet

With every year that passes, we can do more and more for the environment. Our 2.0-litre turbocharged Boxer engine offers more frugal fuel consumption, without sacrificing performance. It's perfect for taking the road less travelled. With the ability to travel 1,000 km¹ on a single tank, this engine gives you more range than ever. Subaru Diesel – available in Forester 2.0D-L and 2.0D-variants.

1. Based on a highway cycle of 5.7L per 100km and fuel capacity of 64L tested in accordance with ADR81/02.

Yet another world first

Lineartronic™ CVT

Pushing innovation beyond the bounds, we created an automatic transmission with no discernable steps or shifts. We called it Lineartronic™ CVT. And it's the reason our automatic models drive so smooth. It's the world's first longitudinally mounted system for AWD vehicles. Unlike a conventional automatic transmission – which uses fixed gear ratios – our Lineartronic™ CVT provides infinite variability between the highest and lowest available gears. So you now experience a smooth gear change, into any optimum gear for that moment. CVT on all Forester variants, excluding Forester 2.0i.

Get smart

X-Mode

When the going gets tough, engage Forester's intelligent X-Mode, standard on all CVT variants, featuring hill descent control and improved grip and traction in low speed and slippery conditions. It delivers uncompromising performance in challenging terrain.

Intelligently driven

SI-Drive

Heading to the shops? Taking on the Great Ocean Road? Each situation deserves a distinctive driving mode, so we crafted a Subaru Intelligent Drive (SI-Drive) technology available on selected Forester variants to do just that. Switch from smart, to sporty to even sportier. Intelligent (I) mode – perfect for every day driving, Sport (S) mode – for enhanced acceleration and all-round sporty performance and in Forester 2.0XT Premium you can choose Sport Sharp (S#) mode – for a truly thrilling drive.

immerse yourself

It's never been easier to enjoy more of the good stuff with our even smarter infotainment system. Featuring a bigger, brighter design, the display has an expanded 7" LCD screen that lets you make hands-free calls and play your favourite tracks via its voice and touch-screen functionalities. There's also a rear view reverse camera for added safety. Satellite navigation is also available on selected variants.
