

LEVORG

SUBARU

Confidence in Motion

Made by perfectionists, for multitaskers.

That moment when you've reached excellence in life—it feels great. And it feels even better when you're achieving highly in multiple areas. Some call it perfectionism; others consider it living life to the fullest. For those who continually strive to be better at everything, the Levorg was created.

Performance that transcends.
Design that rises above.

Innovation made stylish.

There's a place where design and technology intersect, where form and function stand on equal ground. The Levorg exists in this sweet spot, blending useful functionality with eye-pleasing aesthetics wherever you look.

Illumination

The aggressively styled headlamps have been intelligently redesigned to enhance the Levorg's sophisticated appeal. Powered by LEDs*, these bifunctional headlamps combine low and high beams and are steering-responsive*, ensuring good visibility around turns at night.

Design

The Levorg makes its intentions clear with the redesigned hexagonal grille and muscular front end design for a smooth and refined feel. The fully functional hood-scoop keeps the turbocharged SUBARU BOXER engine's intercooler constantly refreshed with cool air.

* Optional.

**Designed
for the world you live in.
And everything
you'll accomplish in it.**

**Versatility for
the modern world.**

The Levorg is a vehicle built for people with full lives, always living life to the fullest. That's why it's versatile enough for all the activities, passions, sports, and interests that you live for. And with the new 40/20/40 folding rear seats, the Levorg provides you with ample cargo space and flexibility for all your endeavours.

40/20/40 Folding Rear Seats

With four settings to choose from, the 40/20/40 folding rear seats make the Levorg more versatile than its predecessor. Securely carry long objects with the centre seat folded down, even with two passengers seated in the back.

**Wider Opening for
Easier Access**

It's easy to move items in and out of the voluminous cargo area of the Levorg, thanks to its rear door. When fully extended, users have wide open access to the Levorg's storage space.

*1 Cargo room floor length (with five occupants in vehicle)
*2 Cargo room floor width (between wheel housings)
*3 Cargo room height (directly behind rear seats)

Your world. Your space.

Think of it as less of an 'interior' and more of 'your personal space'. No different than an office, home, or any other space where you'll spend a lot of your time, the Levorg interior keeps you blissfully content with materials that are soft to the touch and supportive, with quality that allows it to endure the test of time. It's a place of taste and class—a reflection of your own sensibilities.

Seating Design

The engaging driving experience of the Levorg is accentuated by front seats that support drivers and passengers in all the right places, helping maintain a balance of both comfort and control for a safer, more enjoyable driving experience.

D-shaped Steering Wheel

There's a reason so much thought went into it—the steering wheel is your main connection to the driving experience. Beyond the sporty, D-shaped design, the steering wheel of the Levorg is easily gripped and manipulated, thanks to its sculpted shape and grip-worthy feel.

Always stay in touch.

The Levorg simplifies the driving experience by integrating your life into the vehicle seamlessly so you can stay entertained, informed, and connected, without losing sight of the most important thing—getting there and back safe and sound.

Multifunction Display

Positioned to be clearly visible with minimal distraction as you drive, the redesigned 5.9-inch high-definition colour display shows you a variety of information that puts you in touch with your vehicle.

Touchscreen Control

Using the touchscreen is an easy way to select your music, just as you would on your smartphone. Simply connect your smartphone through Bluetooth®*5 or the USB port, and you can choose your music right on the touchscreen.

Voice Recognition*1 and Siri Eyes Free**2*3

Your Levorg has more hands-free options than ever before, thanks to intuitive Voice Recognition*1 and Siri Eyes Free**2*3 integration. Use Siri to link your compatible Apple*3 product to your Levorg, allowing you to make hands-free calls, play music, check emails and search the web. Even without Siri, you can still have hands-free interaction with navigation**4, telephone, and audio systems for added ease in every drive.

SUBARU STARLINK**6

Like a built-in smartphone for your car, having the SUBARU STARLINK**6 infotainment system lets you access internet radio, entertaining apps, and much more. Control it with the tablet-like 7-inch centre touchscreen, multifunction steering wheel controls, or one-shot voice recognition*1. If you can't find your favourite music, connect your iPhone*3, smartphone or other mobile music device via the USB or standard AUX jack.

Smart Rear View Mirror**4

With a flick of a switch, the Smart Rearview Mirror**4 can double as a display screen that projects a live image of the rear camera installed on the rear gate. This can help give you a clear, unobstructed rear view if passengers or equipment block your view.

Front**4 and Rear**4 View Monitors

The front grille camera**4 can project the vehicle's front view via the multifunction display, increasing front visibility at intersections and when parking facing a wall. The Rear View Camera**4 can assist with parking manoeuvres by projecting a live colour image on the in-dash display.

Front view camera

Rear view camera

*1 Voice Recognition is compatible with select languages only and cannot accept all languages. *2 Siri-compatible Apple product (iPhone, iPad, iPod touch, etc.) required.

*3 Apple, App Store, iPod, Siri, and iTunes are registered trademarks of Apple Inc. *4 Optional.

*5 Bluetooth is a registered trademark of Bluetooth SIG, Inc. America.

*6 Driver is always responsible for safe and attentive driving. Please refrain from operating the touchscreen whilst driving. Package communications fee may be charged depending on your area.

SUBARU BOXER ENGINE

Balanced and composed.

The horizontally opposed configuration of the SUBARU BOXER engine places the pistons 180 degrees apart, for a lower, flatter profile than other engine types. This gives the engine, and therefore the overall vehicle, a lower centre of gravity and better sense of balance.

Naturally Balanced

Unlike traditional 'in-line' or 'V-type' engine configurations, the pistons' opposing movements inherently counteract each other, naturally helping to reduce vibration without the need for counter-balancers, which add weight and complexity.

Low Centre of Gravity

All of the heavy moving components inside a horizontally opposed engine—the connecting rods, pistons, camshafts and valvetrain—are positioned on a horizontal plane, as low as possible. This gives SUBARU vehicles a distinctly lower centre of gravity versus vehicles with 'in-line' and 'V' configured engines, resulting in numerous handling and performance benefits.

1.6-LITRE DOHC DIRECT INJECTION TURBO SUBARU BOXER ENGINE

- MAX OUTPUT:** 125 kW (170 PS) / 4,800 - 5,600 rpm
- MAX TORQUE:** 250 Nm (25.5 kgfm) / 1,800 - 4,800 rpm
- FUEL CONSUMPTION*1:** 7.0 lit./100km*2, 7.2 lit./100km*3
- CO₂ EMISSIONS*1:** 159 g/km*2, 164 g/km*3

*1 Fuel consumption and CO₂ emissions: According to EC 715/2007 - 2016/646ZD.
 *2 1.6GT EyeSight MID / EyeSight BASE
 *3 1.6GT EyeSight HIGH

SYMMETRICAL ALL-WHEEL DRIVE

Traction in all conditions.

There's a reason Symmetrical All-Wheel Drive system is respected around the world. When road conditions are demanding, it delivers control and composure where other vehicles stumble by evenly distributing power to all four wheels. The benefits are immediately apparent—more controlled cornering, better traction in slippery conditions, and enhanced acceleration. The overall sensation is that driving becomes an easier, safer and more enjoyable affair.

LINEARTRONIC CVT:

Shift your expectations.

A passenger car with All-Wheel Drive—it was a totally new concept when SUBARU introduced it to the world. Afterwards, public perception of AWD technology changed forever. The trend continues with the latest Lineartronic CVT found in the Levorg. Responsive and lightweight, this transmission rejects the status quo with unexpected precision and liveliness.

Always adapting, always performing.

Unburdened by having fixed gear ratios like a conventional automatic transmission, the Lineartronic Continuously Variable Transmission of the Levorg uses infinitely variable gear ratios to stay in the correct rev-range at all times, for smooth acceleration and enhanced efficiency.

Active Safety

1, Advanced Safety Package: Subaru Rear Vehicle Detection (SRVD)*1*2

Subaru Rear Vehicle Detection (SRVD) uses sensors placed around the vehicle to alert you of vehicles in your rear blind spots for safer lane changes, and can also warn you of potential collision danger, whilst driving in reverse into a street with cross traffic.

2, Advanced Safety Package: High Beam Assist (HBA)*1*2

High Beam Assist increases visibility and safety when driving at night by toggling the Levorg's high beams on and off automatically, depending on driving conditions.

3, Visibility in all directions

The most important collision avoidance system inside any Subaru is the driver. That's why the Levorg was designed to provide maximum visibility in all directions without compromising structural integrity and safety. More visibility helps the driver stay in control and see potential accidents before they happen.

4, Brakes

The 4-wheel disc brakes feature lightweight aluminium rear calipers for a strong, progressive braking feel. The Antilock Braking System includes electronic brake-force distribution to reapportion front and rear braking pressure when the vehicle is loaded. For more predictable and controlled braking during an emergency, the Levorg features both Brake Assist and Brake Override.

5, Vehicle Dynamics Control System

Vehicle Dynamics Control System monitors and analyses if the vehicle is following the driver's intended course via an array of sensors. If a tyre slips or a high speed turns the vehicle off its intended path, the AWD torque distribution, engine output, and brakes at each wheel are adjusted to assist in keeping the vehicle on course.

Passive Safety

6, Cabin-protecting Layout

Subaru has a tradition of going above and beyond when it comes to your safety, and the Levorg is no different. Achieving excellence in safety requires outside-the-box thinking, and that's why the Levorg's frame and chassis were designed to help the SUBARU BOXER engine and gearbox move safely beneath the vehicle during a head-on collision rather than intruding into the cabin. It's yet another feature that gives you peace of mind whilst driving Levorg.

7, Ring-shaped Reinforcement Frame

The Ring-shaped Reinforcement Frame is like a suit of armor for all occupants of the Levorg. It's a shroud of safety built into the passenger cabin's roof, doors, pillars, and floor. This design helps divert and dissipate impact energy away from the occupants in a collision by use of high-strength materials and strategic placements. Whilst making it stronger with increased torsional rigidity, the overall frame is still lightweight.

8, SRS*3 Airbags

In case of a collision, occupants are protected with an arsenal of standard safety equipment including front SRS*3 airbags, plus front-side, curtain SRS*3 airbags, and knee SRS*3 airbags. To hold passengers firmly in place, the front seatbelts feature height-adjustable pretensioners, and also load limiters that ease peak forces to the chest. In a rear collision, front seats utilise rigid frames, firm headrests, and such details as energy-absorbing mounting of the inner seat springs, all to help reduce the chance of whiplash.

9, Whiplash-mitigating Front Seats

Designed to enhance comfort and help the driver feel more planted for more control, these seats can also help reduce the possibility of whiplash resulting from certain types of collisions.

10, Head Restraints on Front Seats

Adjustable for both height and angle, head restraints are designed to accommodate passengers of different sizes and comfort preferences.

5-Star Euro NCAP Rating

The Levorg sets the standard for passenger protection. Meticulously engineered and scrutinised, it's why the Levorg leads with a 5-star Euro NCAP rating – the highest possible for a motor vehicle.

*1 The driver is always responsible for safe and attentive driving and observance of traffic regulations. Please do not depend solely on the Advanced Safety Package features for safe driving. There are limitations to the features of this system. See Owner's Manual for complete details on system operation and limitations. Please ask your retailer for more details.

*2 Optional.

*3 SRS: Supplemental Restraint System. Effective when used in conjunction with seatbelts.

Field of vision range from EyeSight (Not an actual measurement).

Subaru's World-leading Driver Assist Technology

At Subaru, we believe in ALL-AROUND SAFETY and an important part of that is pre-collision safety, making sincere efforts to ensure an accident never happens. That's why we created EyeSight*¹, Subaru's cutting-edge driving support system. Like a second pair of eyes for the road ahead, EyeSight uses two stereo cameras capturing three-dimensional colour images with excellent image recognition, nearly as capable as the human eye. Using images from both cameras to precisely determine the shape, speed and distance, it not only detects vehicles, but also motorbikes, bicycles and pedestrians.*² When spotting potential danger, it warns the driver and even applies the brakes if necessary, to help avoid an accident. With improved safety performance like this, EyeSight reduces the burden on the driver and enhances your sense of security in the Levorg.

Driver Assist

1, Adaptive Cruise Control

EyeSight*¹ doesn't only maintain the speed the driver sets as traditional cruise control does. When it senses a vehicle in front, Adaptive Cruise Control adjusts the speed to keep a set distance from the lead vehicle by monitoring the distance and the difference of the speed. It adjusts the engine, transmission and brake to keep your speed in line with the traffic flow in a wide range approximately from 0 km/h to 180 km/h. Designed for use on freeways, highways and similar roads, Adaptive Cruise Control actually detects a lead vehicle and its brake lamps and can help keep pace in stop-and-go highway traffic for you, a comfort and convenience on long drives.

3, Lead Vehicle Start Alert

When you're at a stop and EyeSight senses that traffic has started moving again, Lead Vehicle Start Alert prompts the driver to take action with a buzzer and a flashing indicator.

2, Lane Sway and Departure Warning

When you are distracted by fatigue and are wandering or drifting in a lane, Lane Sway Warning helps you stay alert with a buzzer and a flashing indicator. However, Lane Sway Warning only activates at speeds of approximately 60 km/h or more. When travelling at speeds of approximately 50 km/h or more and you accidentally drift to the edge of your lane and begin to depart your lane without signaling, Lane Departure Warning warns you with a buzzer and a flashing indicator before you leave your lane.

4, Lane Keep Assist

Whilst driving on freeways, highways and similar roads, Lane Keep Assist can monitor lane markings with a stereo camera and detects when the vehicle begins to move out of its lane. At speeds of approximately 65 km/h or more, it can assist with steering wheel operation to help prevent lane departure to support safe driving.

Accident Prevention

5, Pre-Collision Braking System*²

When it senses an impending collision with a vehicle or other obstacle in front, the Pre-Collision Braking System can warn the driver with a buzzer and a light on your dash. If the driver still does not take evasive action to avoid the collision, the system can automatically apply the brakes to reduce any impact, or if possible, prevent the collision as well. If the driver takes evasive action to avoid a collision, Pre-Collision Brake Assist can act to aid the driver in preventing the collision. Also, Pre-Collision Steering Assist helps drivers make a sharp turn to avoid a collision when it spots a potential frontal impact.

6, Pre-Collision Throttle Management

When EyeSight sees an obstacle in front of you and you put the vehicle in drive instead of reverse, Pre-Collision Throttle Management sounds several short beeps, turns on a flashing indicator and cuts the engine output to help you avoid a frontal collision.

7, EyeSight Assist Monitor*³

A display that links the operating status of EyeSight and warnings is projected onto the windscreen in a simplified way using LEDs to reduce driver eye movements.

*1 EyeSight is a driving support system which may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving and observance of traffic regulations. System effectiveness depends on many factors such as vehicle maintenance, weather and road conditions. See Owner's Manual for complete details on system operation and limitations for EyeSight including functions in this brochure.

*2 Pre-Collision Braking System may not work in all situations. Depending on the speed difference from objects, the object's height and other conditions, every situation may not meet the necessary conditions for EyeSight to work optimally.

*3 Optional; part of the Advanced Safety Package.

Feature

1, LED Fog Lamps*

The stylishly redesigned LED fog lamps and bezels add to the wide and low stance of the Levorg's more aggressive front face styling, emphasising its performance potential.

2, 18-inch Aluminium-alloy Wheels*

The redesigned 18-inch aluminium-alloy wheels add to its dynamic feel and give the Levorg even more style.

3, Keyless Access with Push-button Start System*

With the key fob in your possession, you can unlock the front doors or tailgate by just gripping the handle and starting the engine with a push of a button. Even without your key fob, a 5-digit PIN code can unlock the doors.

4, Power-sliding Tilt-adjustable Glass Sunroof*

The large, internally-sliding sunroof with a manual sunshade delivers a panoramic view and fresh breezes for front and rear passengers.

5, LED Rear Combination Lamps

The Levorg maintains both style and visibility with LED rear combination lamps, which feature LED tail and stop lamps, rear fog lamps, turn lamps and reverse lamps.

6, Twin Tail Mufflers

The twin tail mufflers on either side of the blacked-out under section leave no doubt of the sporty nature of the Levorg.

7, Tilt-adjustable / Telescopic Steering Wheel

Dial in your driving experience with the tilt-adjustable and telescopic steering wheel, which can accommodate a wide range of preferences.

10, Dual-zone Automatic Air-conditioning System

This feature conveniently helps keep the temperature inside where you want it. It also allows the driver and front passenger to set different temperatures.

8, Adaptive Cruise Control Switch

Conveniently set your cruising speed with the Adaptive Cruise Control Switch on your steering wheel.

11, Rear Seat Armrest with Cup Holders

Enjoy front-row comfort in the second row with the rear seat armrest, which folds down for extra comfort.

9, USB Power Outlet (Front and Rear)

Keep all your electronic devices fully charged and ready to use with easily accessed USB power outlets for both front and rear passengers.

12, Reclining Rear Seats

Inside the Levorg, there are few compromises for rear seat passengers. Reclining rear seats provide surprising comfort and adjustability for relaxing drives.

* Optional

Lineup

LEVORG 1.6GT EyeSight HIGH

DIMENSIONS	L x W x H: 4690 x 1780 x 1490 mm
ENGINE	Horizontally opposed, 4-cylinder, turbocharged DOHC
CAPACITY	1600 cc
MAX OUTPUT	125 kW (170 PS) / 4,800 - 5,600 rpm
MAX TORQUE	250 Nm (25.5 kgfm) / 1,800 - 4,800 rpm
TRANSMISSION	Lineartronic, AWD

Storm Grey Metallic

LEVORG 1.6GT EyeSight MID / 1.6GT EyeSight BASE

DIMENSIONS	L x W x H: 4690 x 1780 x 1485 mm
ENGINE	Horizontally opposed, 4-cylinder, turbocharged DOHC
CAPACITY	1600 cc
MAX OUTPUT	125 kW (170 PS) / 4,800 - 5,600 rpm
MAX TORQUE	250 Nm (25.5 kgfm) / 1,800 - 4,800 rpm
TRANSMISSION	Lineartronic, AWD
