

SONATA

The SONATA. Transformed.

The SONATA has evolved yet again to support our customers' desire for change and their constantly-evolving lifestyles. Its sporty design and innovative technologies that seamlessly care for all of the passenger's needs will make your daily routine feel comfortable and rejuvenating.

Sensuous Gasoline 1.6 Turbo Inspiration Full Option (Flame Red Metallic)

Exterior

The striking, coupe-style silhouette, the bold outline, and the parametric jewel-patterned grille (which was designed to look like cut precious stones) create an image that is both sensuous and sporty.

Sensuous Gasoline 2.0 Inspiration Full Option (Nocturne Gray Metallic)

Sensuous Gasoline 2.0 Inspiration Full Option (Nocturne Gray Metallic)

Sensuous Gasoline 2.0

The sturdy, multi-faceted front-end design features hidden lighting elements for a sleek, futuristic mood.

Sensuous Gasoline 2.0 Inspiration Full Option (Hampton Gray Metallic)

Front design

High-gloss black exterior mirror
18-inch alloy wheel & Pirelli tire

Sensuous Gasoline 1.6 Turbo

The SONATA Sensuous Gasoline 1.6 Turbo, which is characterized by a captivating, powerful design and a vivid driving performance, offers an exciting, finely-tuned driving experience thanks in part to the engine's continuously variable valve duration (CVVD) technology.

19-inch alloy wheel & Pirelli tire (Sensuous Gasoline 1.6 Turbo exclusive)
Single twin exhaust tip (Sensuous Gasoline 1.6 Turbo exclusive)

Sensuous Gasoline 1.6 Turbo Inspiration Full Option (Flame Red Metallic)

Rear design

Inspiration Full Option (Greige)

Interior

All of the SONATA's interior details simultaneously embody innovative technology and meticulous consideration for the passenger. This space has been effectively designed for both driver and rear seat passenger is not only novel but a source of unending wonder.

Inspiration Full Option (Greige)

* The screen layout/design of the infotainment system may change with the regular updates.

A 10.25-inch display is neatly integrated into an interior design based on long, wide-reaching horizontal lines to not only create a “progressive” image but also guarantee a level of driving comfort that is optimum for the driver.

Inspiration Full Option (Camel)

Inspiration Full Option (Camel)

* The screen layout/design of the infotainment system may change with the regular updates.

Convenience & Technology

Blind-spot View Monitor technology, which displays video footage of objects next to or behind the vehicle in the instrument cluster, and Hyundai Digital Key transform the SONATA into a smart mobility device that makes driving easier and simpler.

Blind-spot View Monitor
When using the turn signal, the camera installed at the base of the exterior mirror displays left/right-side postero-lateral videos on the cluster screen. In the case of restricted postero-lateral view (driving during rain, gray areas, etc.), the SONATA offers a clear and wide view to guarantee safe driving.

Surround View Monitor
High-resolution cameras provide clear views of the front and rear blind spots, enabling the driver to park safely.

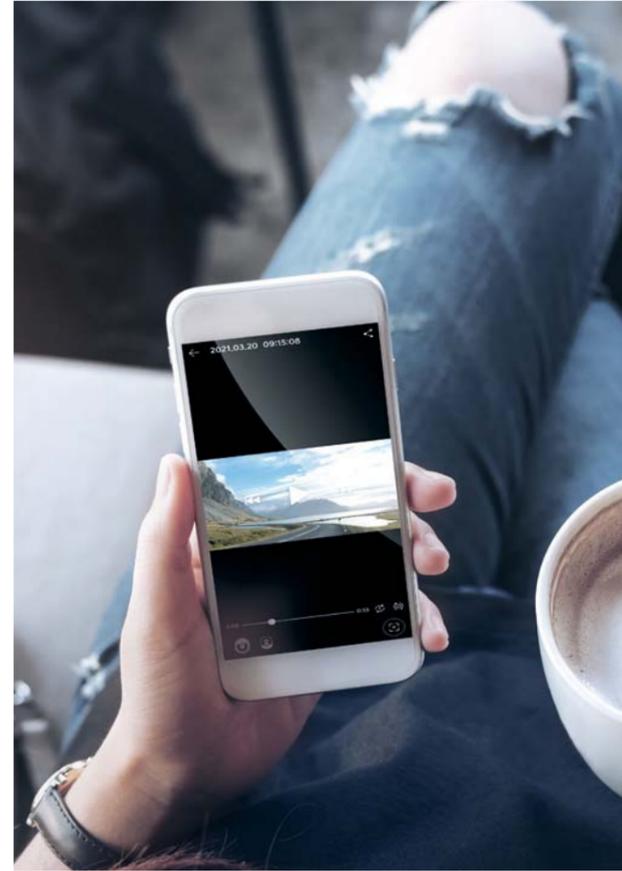

Hyundai Digital key
You can open doors (from outside) and start the ignition—all via smartphone. Depending on preference, you can choose a personalized service, in which the vehicle remembers only one user, or share the use of the vehicles among multiple users.
* The Hyundai Digital Key NFC can only be used via smart phones programmed with this function. For compatible smart phone models, please refer to the Hyundai Motor website. The Apple iPhone blocks the service that enables the NFC function. Therefore, customers who have iPhones may not be able to use a smart phone-based digital key.

The built-in camera presents the new experience of a link between the vehicle and driver's lifestyle.
 The driver can not only see camera-created videos in real time but access other functions (zooming in on the playback screen of saved videos, time-lapse recording, etc.) both inside the car and via linked smart phone.

Built-in cam
 You can now get mementos of beautiful scenery with your car. The video-capture devices, which are embedded in the front and rear of the car and feature high-resolution cameras, are connected to the infotainment system, enabling the user to easily save and play high-resolution videos. Other functions include time-lapse recording and zoom.

* Selecting the built-in cam's secondary battery enables the use of the parking recording function.
 * The screen layout/design of the infotainment system may change with the regular updates.

Linking of built-in cam and smart phone
 By linking with an exclusive smart phone application via wireless Wi-Fi or USB cable, the driver can view real-time screens, replay recorded videos, download recorded videos, and link saved time-lapse videos to social media accounts.

* To use services after linking with a smart phone, the built-in cam application must be installed on the smart phone. Depending on the smart phone model/make, the Built-in cam application may be downloaded from the Google Play Store or the App Store.

Passenger relaxation comfort seat
 The SONATA is the first vehicle in its grade to apply the Relaxation Comfort Seat to passenger seats, allowing passengers to relax comfortably inside the car while in a zero-gravity neutral posture. All of the details in the SONATA's interior simultaneously embody an elegant sensuality and meticulous consideration for the passenger.

* For safety purposes, the Passenger relaxation comfort seat use is recommended when parking or stopping the vehicle.

Hyundai CarPay
 By registering the card on a dedicated app, the driver can conveniently pay for fuel and parking fees, among others, via the touchscreen of the car's infotainment system screen, without having to use a physical card or cash.

Voice recognition vehicle control
 The voice recognition button, which is located on the steering wheel, can be used to control the car's diverse functions (air conditioner, heater, road navigation, etc.).

* Can be used after creating BlueLink account.
 * The screen layout/design of the infotainment system may change with the regular updates.

The BOSE premium sound system gives passengers an exceptional sound experience in the comfort of the vehicle, while the Remote Smart Parking Assist system ensures that traveling in a SONATA is enjoyable until the very last moment.

BOSE premium sound (12 speakers and external amp)
Sound is adjusted based on driving speed. The SONATA offers an entirely new auditory experience via clean multi-dimensional surround sound.

Rear Occupant Alert
When the engine is turned off, the driver's-side door is open, and the car has detected a rear occupant with the opening or closing of a back door, a warning message will be displayed on the instrument cluster and an alert will sound to prompt the driver to check the back seat again.

Wireless phone charger
The wireless phone charging system, which is positioned on the tray below the center fascia, enables convenient charging of any smart phone.

Bluetooth multipoint pairing
The linking of two Bluetooth devices allows the driver and passengers to independently choose the desired function, thereby significantly enhancing convenience.

Remote Smart Parking Assist
For a tight parking space that is difficult to get in and out of, the driver can use the smart key to start the car remotely and move the car forward or backward for convenient parking.

Performance

The SONATA is equipped with a next-generation Smartstream engine and a third-generation platform for enhanced efficiency, resulting in a stable and dynamic driving capability.

Smartstream Gasoline 2.0 engine

160 Max.Power PS/6,500rpm 20.0 Max.Torque kg-m/4,800rpm 12.7 Gas mileage km/ℓ (6-speed A/T, 17", with Built-in cam)

Smartstream Gasoline 1.6 Turbo engine

180 Max.Power PS/5,500rpm 27.0 Max.Torque kg-m/1,500-4,500rpm 13.8 Gas mileage km/ℓ (8-speed A/T, 17", without Built-in cam)

Smartstream Gasoline 2.0 Hybrid engine / Electric motor

152 Max.Engine Power PS/6,000rpm 19.2 Max.Engine Torque kg-m/5,000rpm 20.1 Gas mileage km/ℓ (6-speed A/T, 16", without Built-in cam)

38.0 Max.Motor Power kW 205 Max.Motor Torque Nm

Third-Generation Platform

With its low center of gravity and optimum positioning of front/rear-wheel geometry, the SONATA achieves the ideal structural balance. By minimizing vibration and noise—even during high-speed driving—it embodies an elegant and dynamic level of driving performance.

Sensuous Gasoline 1.6 Turbo Inspiration Full Option (Flame Red Metallic) / Sensuous Gasoline 2.0 Inspiration Full Option (Shimmering Silver Metallic)

Safety

The SONATA has been upgraded with innovative features, from its platform (the framework) to cutting-edge safety features, for significantly improved safety—the vehicle's most basic quality.

Expanded application of hot stamping
Major parts of the SONATA have been hot stamped to prevent alteration in the shape of the passenger section. Omnidirectional crash safety has also been greatly improved.

Multi load path structure
Crash safety is greatly enhanced through the application of a multi load path structure, which absorbs and disperses crash energy through multiple weight dispersal routes.

9 airbag system

A total of nine airbags, including the side airbags and airbag at the knee of the driver's seat, protect passengers from crashes. In the event of a crash at the driver's and front passenger seat, air bags are activated in high or low pressure, depending on the situation. The advanced air bag system detects for the presence of a front-seat passenger, then automatically determines which (and how) air bags should be activated.

Sensuous Gasoline 1.6 Turbo Inspiration Full Option (Creamy White Pearl)

Hyundai SmartSense

The use of a further-advanced active safety system constantly protects passengers from unexpected dangers.

Lane Following Assist

The SONATA uses an omnidirectional camera to detect the location of the road lane and ensure that the vehicle is driven in its center. When necessary, automatic steering wheel control is activated to prevent the car from drifting outside the lane.

Forward Collision-avoidance Assist

After detecting and deciding whether a bicycle appearing in the car's vicinity (omnidirectional perception) is a crash risk, a warning is posted and a warning sounded to notify the driver of potential risk. When necessary, the brake is activated to minimize damage.

Highway Driving Assist

Highway driving assist utilizes information such as distance from vehicles in front and road lane and navigational data, to control inter-vehicle distance and maintain the vehicle's position inside the lane. It also minimizes driver fatigue during long-distance drives.

* The bicycle detection function may be selected (from the omnidirectional crash prevention functions) and activated upon selection of the sensor fusion (camera & omnidirectional radar).

Blind-spot Collision-avoidance Assist

This function detects vehicles approaching from blind spots at the rear lateral end that are difficult to see in the exterior mirror, enhancing crash protection via warnings and brake controls.

Rear Cross-Traffic Collision-Avoidance Assist

This function detects vehicles approaching from blind spots in the rear lateral end when the car is in reverse, after which a warning is conveyed to the driver. When necessary, brake control assists with rear collision avoidance.

Safety Exit Assist

If the driver fails to detect a vehicle approaching from the rear lateral end after stopping or parking and then cancelling the electronic child lock, this function produces a cluster pop-up message and warning sound while maintaining the locked state. This guarantees prevention of a crash caused by untimely opening of the rear door.

Driver Attention Warning / Front Vehicle Start Alarm

These functions enable the SONATA to make a comprehensive analysis of the driver's driving patterns, location of the car within its lane, and other information. When the SONATA detects driver fatigue or inattentive driving, the driver attention warning function recommends by a pop-up message and warning sound that the driver take a break. In the event that the vehicle ahead has departed while the SONATA is standing, the front vehicle start alarm function sends the driver a cluster notification.

Hybrid Inspiration Full Option (Solar roof, Creamy White Pearl)

Driving farther via sunlight: **SONATA Hybrid**

The solar panels on the roof of the SONATA Hybrid allow its battery to be charged with sunlight. The SONATA Hybrid is able to recharge wherever it is sunny, whether it's parked or in motion. It is a smart mobility device that is the quintessence of life-changing innovation.

Hybrid Inspiration Full Option (Solar roof, Creamy White Pearl)

Hybrid Inspiration Full Option (Solar roof, Nocturne Gray Metallic)

Hybrid technology

Sunlight is yet another very viable energy source that is capable of powering the SONATA Hybrid. It is the first vehicle in Korea to be available with a solar roof system (in which the battery is chargeable with sunlight), making it possible to drive up to 1,300 kilometers farther per year. The SONATA Hybrid, which is fortified with various innovative technologies that consider the needs of both passengers and the environment, proposes a new vision for sustainable mobility.

Solar Roof System

Solar roof system

The solar roof system is made up solar panels, a controller, and a battery. The roof, which is equipped with a silicon solar battery, can store up to 200Wh of energy per hour of sunlight exposure. This not only improves the vehicle's fuel efficiency but also drastically reduces carbon dioxide emissions.

Max 1,300km

Based on average insolation levels in Korea / per year

20.1km/ℓ

(with 16-inch wheels)

The SONATA Hybrid guarantees fun and comfortable driving performance thanks to the addition of a more efficient drivetrain to its lightweight, durable body. Its futuristic and aerodynamic design makes it one of the most competitive hybrid sedans on the market by securing the highest level of fuel efficiency (of similarly-sized vehicles in Korea).

Hybrid System

1. Regenerative braking system

When the vehicle slows down, the regenerative braking system converts the car's kinetic energy into electric energy and uses that to recharge the battery, improving the vehicle's overall energy efficiency.

2. Hybrid high-voltage lithium-ion battery

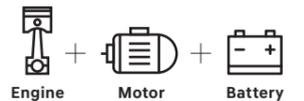

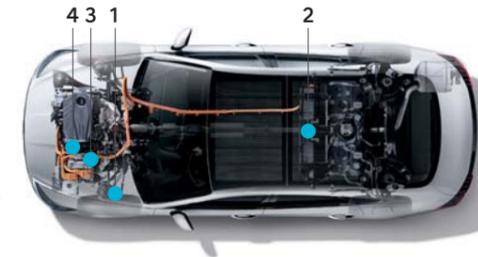

The lithium-ion battery and high-voltage battery (mounted under the second row seats) both makes the vehicle more durable and without compromising trunk space.

3. High-efficiency, permanent-magnet electric motor

The high-efficiency motor assists the Gasoline engine and is capable of taking the vehicle to speeds of up to 120 km/h in electric vehicle (EV) mode.

4. ASC-applied transmission

The world's first use of ASC (Active Shift Control) technology, which minutely controls the transmission via an electric motor, enhances transmission capability, efficiency and durability.

Modern

Maintain a constant speed to drive more efficiently.

-The fuel economy described above is based on the standard model and may differ during actual driving depending on road conditions, driving technique, cargo load, vehicle maintenance, and outdoor temperature. -Some of the images presented here include optional specifications, so their appearance may differ from the car you purchase. -The specifications, colors, and sources presented here may be modified to improve vehicle exterior and performance. -The engine performance described above is the "Net Number," a measure reflecting exhaust resistance that complies with legislation enforced by Korea's Ministry of Land and Transport since 1997. It can be marginally lower than "Gross Output Number," the previous measurement. -Leather seat include some artificial leather. -Vehicle colors presented here may differ from actual appearance. -Some specifications may vary for rented/handicap vehicles and regular vehicles. -All of the measurements in this brochure apply to the Gasoline/Hybrid models. Therefore, the specifications and the features of the LPI models might differ. -Hyundai Motor Company sells cars only through its branches and designated dealers. Hyundai Motor Company is committed to fair trade practices, with the same price and quality of vehicles nationwide. -Use of non-genuine parts (such as engine oil and transmission oil) or poor quality fuel may severely damage the vehicle. -For more information about the new technologies and specifications described in this brochure, please refer to a user's manual.

SONATA Hybrid Warranties	
Warranty for Hybrid parts	10-year/200,000-kilometer warranty - Electric motor, Hybrid high-voltage battery HPCU (Hybrid Power Control Unit)
Guaranteed vehicle trade-in rate program	Customers may choose to apply for this program upon purchasing a vehicle. It focuses on customer satisfaction by providing a high guaranteed vehicle trade-in rate for customers who purchase another vehicle from Hyundai Motor within three years of applying for program membership. - Eligibility: First-time purchasing customers (does not apply to Hyundai Motor employees, customers who are not first-time purchasers, entrepreneurs, procurement-related purchasers, etc.) - Standard guaranteed trade-in rate: Under one year: 77%, Under two years: 70%, Under three years: 64%

※ The benefits offered through the warranties above may be subject to change.
※ Contact a branch or dealership for details.

The advanced technology of Hyundai's BlueLink system helps keep both the driver and the vehicle safe in any situation. BlueLink is always there to keep you safe, regardless of the location or time of day. Experience the unique joy of safe and comfortable driving.

Remote control

In the extremely hot summer or cold winter months, you can link your smartphone to the air conditioner or heater to set and control the temperature inside the vehicle. Enjoy a pleasant driving experience with BlueLink.

Safety security

The BlueLink Center works 24 hours a day, 365 days a year. If an airbag opens due to an accident, the Center automatically detects your location and takes appropriate actions according to the situation, such as contacting the police, ambulance, insurance company, etc.

Vehicle management

Services include real-time trouble detection while the vehicle is running and regular vehicle inspections on pre-arranged dates. In the event of vehicle trouble, immediate professional consulting is available, and you may conveniently make reservations for repair at the time and location of your choice.

Navigation

This function enables the driver to conveniently search for destinations through voice command and suggests optimum routes based on an independent analysis of real-time traffic information. The driver can search a database of up-to-date information to find even newly created destinations.

*Free of charge for five years for customers who have purchased a vehicle and are applying for BlueLink membership for the first time: Remote control, Safety security, Vehicle management, Navigation.

* Inquiries: Blue Link Kakao Talk Customer Service Center (enter "Blue Link" in Kakao Talk search screen and add as friend)
