

▶ Honda Accord Euro

The dream: to create the most advanced smart sports sedan that's thrilling to drive.

▶ The art of performance.

Sleek lines mark the Euro as a refined premium sedan.

Introducing the all-new Honda Accord Euro, a combination of brilliant design and breathtaking precision.

The most fleeting glance will confirm our engineers' obsessive attention to detail. But there isn't a single feature on the Euro that is there for looks alone. Take the distinctive

V-shaped grille for instance. While it certainly is stunning to look at, its true beauty lies in its ability to smooth the incoming airflow, boosting the aerodynamics and cooling the engine. And while sleek lines mark the Euro as a refined premium sedan, muscular touches lend it a sporty aggressive road stance.

As for performance, a stiff chassis, lowered centre of gravity and advanced dampers deliver a ride to make any sports car envious. And sound-absorbing technology, the famously smooth Honda engine and an incredibly well thought-out cabin combine to create the perfect space in which to enjoy the Euro's precision handling.

Even the most fleeting glance
will reveal our obsession
with detail.

▶ A sporting heritage honoured.

Luxury model shown.

Forty years of international racing experience and five drivers' championships for Formula One legends Ayrton Senna, Alain Prost and Nelson Piquet have taught us a thing or two about creating high performance engines. And you'll find the results of all our learning nestled beneath the bonnet of the Accord Euro.

The 2.4 litre DOHC i-VTEC engine delivers 148kw of power at 7000 rpm and 234Nm of torque at 4300 rpm manual transmission (M/T) yet still manages remarkable fuel efficiency, using just 8.9 litres of petrol per 100 kilometres.*

When it comes to transmissions, the Accord Euro offers two choices: a 6-speed manual transmission, featuring an effortless action and short shift throws, or an optional 5-speed sequential shift automatic which works either as a conventional automatic or can be shifted manually via paddles on the steering wheel.

We've also worked extensively on the Accord Euro's body. The new high-rigidity chassis transmits road feel directly to the driver, making for sportier handling all round. And a newly-lowered centre of gravity, wider track and upgraded suspension deliver agility and high speed stability so you'll never be in doubt that the Accord Euro is first and foremost a true driver's car.

*Fuel consumption figures based on ADR81/01 test results.

Step into a world of luxury.

Standing back looking at the Accord Euro, you can't help but admire its elegant lines. It's not until you climb inside, however, that you truly appreciate the thought that's gone into creating it. After all, it's one thing making a beautiful car, but quite another to design an interior that makes every drive a beautiful experience.

The Accord Euro range features an avante garde cabin appointed with all the interior comforts you've come to expect from Honda, including: six stacker in-dash CD player & AM/FM radio (with ten speakers throughout the cabin); dual zone climate control air conditioning that caters for driver and front passenger temperatures; auto up/down electric windows for driver and all passengers; steering wheel-mounted audio controls and cruise control so your eyes need never leave the road; tilt and telescopic steering wheel adjustable to your ideal driving position and a multi-information display.

The Accord Euro Luxury comes with additional features such as leather interior[†]; eight-way power adjustable driver's and passenger's seat; electric sunroof; heated front seats and auto-dimming rear view mirror.

And for those who demand the complete package, there's the Accord Euro Luxury Navigation which includes all the features of the Euro Luxury plus satellite navigation to keep you on the right track at all times and a reversing camera.

Whichever model you choose you can be sure you'll enjoy unsurpassed levels of comfort and sophistication.

[†]Leather may contain some PVC vinyl.

Luxury Navigation model shown.

Luxury Navigation model shown.

Enjoy unsurpassed levels of comfort and sophistication.

1 Multi-jog dial. With this one very clever button, you can access your audio, driver information and climate controls.

2 LCD multi information displays. Dynamic styling combined with logical, easy-to-read designs create a wonderfully intuitive driving experience.

3 Reversing camera*. A direct visual feed of what's behind your Euro appears on the dash display to keep you and, more importantly, others safe.

4 Paddle shift gears - on automatic transmission. A clear link to Honda's 40-year racing history, these sporty shifters make the Accord Euro experience just that little bit more exciting.

5 Satellite navigation*. This highly sophisticated GPS utilises 24 satellites orbiting the Earth and a map database to guide you to wherever it is that you need to go.

*Available on Accord Euro Luxury Navigation model only.

Bringing precision to protection.

To create the best car in its class, our engineering team designed the Accord Euro to cope brilliantly in case of the worst.

You'll feel even more comfortable once you've seen the Accord Euro's comprehensive list of safety measures. To help prevent collisions, Vehicle Stability Assist (VSA) detects any oversteering or understeering, then brakes

individual wheels and, if needed, reduces throttle to help restore control and put you back safely on the right path. The Accord Euro is also equipped with Motion Adaptive Electric Power Steering (MAE), which works in conjunction with VSA. It detects instability in slippery conditions both during cornering and under braking and automatically initiates steering inputs aimed at assisting the driver to steer in the right direction.

Honda's unique G-Con (G-Force Control) technology absorbs and disperses crash energy throughout the engine compartment and away from the cabin during a collision. Every occupant is surrounded by side curtain airbags filled with helium to provide a softer cushioning. And the exterior panels feature progressive crumple zones to protect pedestrians.

Other safety features in the Euro range include Anti-lock Braking System (ABS) with Emergency Brake Assist (EBA), dual front SRS airbags, driver and front passenger-side SRS airbags, front seatbelt pre-tensioners and load limiters, head restraints in the front and rear, and active front headrests.

Effortless high speed handling,
the greatest luxury of all.

**You're not just
buying a car.
You're also buying
a support network.**

As an Accord Euro owner, you'll have access to personalised online services through our exclusive HondaONE website. This secure site offers an up-to-date service history, vehicle records, maintenance tips and personalised service reminders.

The people at every Honda Dealership who look after every all-new Accord Euro are also constantly updating their knowledge, to build on the factory training they all receive. No one else can service and tune an Accord Euro as well. They also stock a comprehensive inventory of Genuine

Honda Parts and Accessories. For a full list of parts and accessories, be sure to pick up an accessories flyer from your Honda Dealer.

Our commitment to you as a new Honda owner not only includes outstanding after-sales service but also means that you're entitled to receive *Honda. The Magazine*. You will receive three issues per year over a five year period so that you are up-to-date with all of the latest news from Honda.

#Honda warranties apply where due care is exercised by the owner and the vehicle is maintained in accordance with the vehicle's owners manual. Please refer to Honda's warranty documentation for exclusions and conditions.

Regular maintenance of your new Accord Euro is, of course, recommended to make sure you enjoy it for many years, and its value is maintained. Our faith in the Accord Euro's durability, quality and reliability is reflected in the three year/100,000km warranty and a six year rust perforation warranty* we offer with every Honda. Together, we can ensure you are as happy with your Accord Euro in the years to come as you are on the day you drive it out of the showroom.

▶ The Accord Euro is first and foremost a true driver's car.

Dreams do come true.

What if we tested our new technologies in the most extreme conditions possible?

At Honda, we have always believed that racing is fundamental to our development. As our founder Soichiro Honda famously said "Without racing, there is no Honda." A statement that will always hold true. It's the ultimate testing ground and regardless of whether we win or lose, the same question is always asked – how can we improve performance? And you can be sure that for every improvement made on the track, there is an equal improvement made to every Honda vehicle that hits the road.

What if our technology was more...alive?

ASIMO, the World's Most Advanced Humanoid Robot, was born from a dream to create a robot that could benefit people in everyday life. His name stands for Advanced Step in Innovative MObility, a title he's definitely worthy of. Currently, ASIMO's capabilities include: running at 6 km/h, walking on uneven surfaces, turning smoothly, climbing stairs, pushing a cart, receiving and delivering trays and he can even dance if the occasion calls for it. Our dream is that one day, everyone will have an ASIMO of their own to help around the home or office.

What if we had our own solar cell production company?

In recent times, Honda has branched out into mass solar cell production. Honda's unique C.I.G.S solar cell produces the highest level of conversion efficiency in the thin film category and only requires half the energy to manufacture, so it's environmentally friendly throughout its entire life. Why does a vehicle company produce solar cells? Purely so we know that we are doing everything possible to help prevent global warming.

What if there was a car that only emitted water?

Obviously, the world would be a better place and the good news is, such a car already exists: The FCX Clarity. It works by converting hydrogen into electricity, which leaves you with only one emission, H₂O. And in 2008, this totally new fuel-cell vehicle will be in production.

What if a plane had its engines mounted on top of the wing?

Well, it would be a world-first and it would be called the HondaJet. Secondly, the engines would have to be in a special position on the wing we call 'The Sweet Spot'. That would then result in less drag at high speeds, 30% better fuel economy and because there is no need for structural engine mounts on the fuselage, 30% more cabin space.
