

 Honda CR-V

The Dream:

To create the compact food that makes your great life even better.

 Meet a new breed
of compact 4WD.

Be excited. Be very excited.

The Honda CR-V redefines what a compact 4WD can be. It's been completely redesigned to deliver a perfect blend of dynamic style, drivability and functionality. And it's also available in three exciting models, CR-V, CR-V Sport and CR-V Luxury.

A swag of features includes a sleek, masculine exterior, a low centre of gravity, exceptional utility and a plush interior. It's responsive, fun to drive, functional and more stylish than ever. So it's perfect for any occasion. Wherever you want to go: the beach, an exclusive

restaurant, a winding mountain road, the office or simply to the corner store, the CR-V is never out of place. It lets you do what you want, when you want. When you're in one, the world is your playground.

CR-V Luxury model shown.

Edgy styling gives it a sporty,
progressive attitude.

CR-V Luxury model shown.

Head out in style.

The Honda CR-V has been enhanced on all fronts. Inside and out it's undergone some edgy restyling giving it a sporty, progressive attitude. With its windshield thrust forward and its remodelled side windows, the CR-V's exterior achieves sleek continuity from front to rear.

The CR-V also boasts an integrated, double-layer front grille. Which, in combination with a chic headlight design gives it a unique, eye-catching presence on any road. The rear of the car has also had a makeover: the spare tyre has been relocated from the tailgate, allowing a clean rear-door

design. Meanwhile the masculine garnish on all lower body sides, 17" wheels and protruding front and rear fenders enhance the car's aggressive, sporty image. No matter what your destination, heads will definitely turn.

Play with power.

If you're an energetic type, the CR-V is for you.

The CR-V's 2.4 litre DOHC i-VTEC engine delivers high levels of torque at all engine speeds. The freshly-tuned engine has improved aspiration, with an increased maximum output of 125kW and maximum torque of 218Nm. Along with this, the CR-V has drive by wire, which enables better communication between the engine and the transmission, all for a smoother drive.

The CR-V also offers a 6-speed manual transmission, or a 5-speed automatic transmission with Grade Logic Control. This unique system monitors throttle position, vehicle speed and acceleration/deceleration to determine when climbing power or engine braking is needed. This prevents gear hunting and improves drivability and fuel economy.

Get a handle on it.

CR-V Luxury model shown.

The CR-V has surprisingly sporty handling.

By adjusting the engine position we succeeded in lowering the vehicle's centre of gravity by 35mm while maintaining a high driver viewpoint. Combine this with a wider stance, broader wheel treads and the use of high-tensile steel throughout the body and the result is dynamic sedan-style performance and stability with agile handling. Adding to this greater drivability are the finely-tuned suspension systems. These systems use high-compliance bushings and longer suspension stroke to improve riding comfort, steering ability and braking.

The CR-V's Real Time 4WD system delivers extra torque to the rear wheels when required. What's more, the CR-V features Vehicle Stability Assist (VSA) in all models. The VSA system controls brake pressure and power delivered by the engine, thereby enhancing vehicle stability and providing greater driving control during acceleration, cornering and emergency manoeuvres.

Sleek continuity
from front to rear.

CR-V Luxury model shown.

CR-V Luxury model shown.

Inner cool.

On the inside, the CR-V exudes style. Solid-moulded metal components provide a tough yet sophisticated finish. The chic instrument panel features two large gauges with self-illuminating, high-contrast displays for outstanding visibility. A large, centrally located LCD panel digitally displays engine coolant temperature and remaining fuel.

Stylish blue ambient LED lights throughout the cabin, with back-lit switches, create a cool ambience. The inner environment is further enhanced by standard inclusions like air conditioning, cruise control, power windows and steering wheel mounted audio controls. The CR-V Sport and CR-V Luxury also boast dual zone climate control and an electric sunroof. Exclusive to the CR-V Luxury are quality leather[†] seats, a leather[†] steering wheel and heated front seats.

Meanwhile, for your listening pleasure, you'll find a single CD tuner with MP3 in the CR-V, and a 6 CD tuner with MP3 in the CR-V Sport and CR-V Luxury models. The CR-V's cabin is super quiet, thanks to ingenious soundproofing and suppression of engine noise. What's more the CR-V boasts more room than ever. With extra front and rear leg room, occupant space now complements the already plentiful cargo space.

[†]Leather interior includes some PVC vinyl material.

1.

Full-on functionality.

Have the best of both worlds. In the CR-V, the comfort and performance of a passenger car meet the everyday practicality of a 4WD. Increased front and rear leg room is matched by improved utility. All models boast plenty of boot space, giving you the freedom to do whatever you desire. Whether you're moving furniture, carrying bicycles, lugging firewood or transporting friends, the CR-V can accommodate any activity. The CR-V Sport and CR-V Luxury also feature a removable double-deck cargo shelf in the rear for even more storage possibilities.

Plus, all automatic models feature a main console box with a capacity of 6.5 litres (enough to accommodate 24 CDs), and all models have eight extra large cup holders and a console sub box with lid or tray to store frequently used items. The CR-V is also easier to get in and out of, thanks to the lowered sill height, and larger rear passenger doors with wider door opening angle. And, on all models, the spare tyre has been relocated to under the floor, enabling

the tailgate to open vertically for improved functionality. The tailgate is also surprisingly light. With so much utility, there are many ways to play in the CR-V.

1 Interior versatility. Change the seating positions to open up the interior and rear space.

2 Removable double-deck cargo shelf. Allows you to arrange the storage area to suit your changing needs. Available in the CR-V Sport and Luxury.

2.

Play safe.

CR-V Luxury model shown.

When it comes to protecting people inside and outside the car the CR-V is equipped with Honda's advanced safety technology. To help steer clear of potential trouble Anti-lock Brakes (ABS) and Vehicle Stability Assist (VSA) are standard. An improved driving position along with strong, multi-reflector halogen headlights help you see everything ahead. Honda's exclusive G-Force Control (G-Con) technology enhances passenger protection. G-Con technology is tested for real life situations and works by dispersing energy away from passengers. Built tough, the CR-V has an all-direction

energy-absorbing body, which combines a rigid cabin with energy-absorbing front and rear structures. This results in an improved protection zone for occupants.

Driver and front passenger are further protected by front and side SRS airbags standard in all models. And in the CR-V Sport and CR-V Luxury, curtain SRS airbags are also included. Plus, in all models you'll find three-point seatbelts in all seating positions. The front seats have pre-tensioner and load-limiter systems for additional safety. Meanwhile, the

front bumper and bonnet are ergonomically designed to minimise injury to pedestrians in the event of a collision. A lower bumper beam and a wide frame also help lower the chance of riding up over a sedan in a collision. All of which confirms that the CR-V is exceptionally safe to drive.

Our faith in the CR-V is reflected in the 3-year/100,000 km warranty.

To show that we really care.

The CR-V was built to be driven. That's why we put just as much work into providing the world's finest after-sales service. The people who look after you and your Honda are constantly updating their knowledge to build on the factory training they all receive. That's why no one can service and tune your CR-V as well as your Honda Dealership. Honda Dealers also stock a comprehensive inventory of Genuine Honda Parts and Accessories, so you'll never need to

accept anything less. Regular maintenance of your CR-V is of course recommended to ensure you can enjoy many years of driving pleasure and maintain your vehicle's value.

Our faith in the CR-V's durability, quality and reliability is reflected in the 3-year/100,000 km warranty we are proud to offer with every Honda. This includes a 6-year rust perforation warranty. As a CR-V owner, you're entitled

to access our after-sales website, HondaONE. This secure site offers you an up-to-date service history, personalised service reminders and vehicle maintenance tips. And on top of all this, you'll also receive a 5-year subscription to Honda. The Magazine. So together, we can ensure you are as happy with your CR-V in years to come as you are on the day you drive it out of the showroom.

With so many fresh features and enhancements, the Honda CR-V really is in a league of its own. No other 4WD delivers such a perfect balance between dynamic style, sedan-like drivability and 4WD functionality.

So get ready to make the world your playground.

Honda warranties apply where due care is exercised by the owner and the vehicle is maintained in accordance with the vehicle's owners manual. Please refer to Honda's warranty documentation for exclusions and conditions.

Dreams do come true.

What if we tested our new technologies in the most extreme conditions possible?

At Honda we have always believed that racing is fundamental to our development. As our founder Soichiro Honda famously said "Without racing, there is no Honda". A statement that will always hold true. It's the ultimate testing ground and regardless of whether we win or lose, the same question is always asked – how can we improve performance? And you can be sure that for every improvement made on the track, there is an equal improvement made to every Honda vehicle that hits the road.

What if our technology was more... alive?

ASIMO, the World's Most Advanced Humanoid Robot, was born from a dream to create a robot that could benefit people in everyday life. His name stands for Advanced Step in Innovative MObility, a title he's definitely worthy of. Currently ASIMO's capabilities include: running at 6 km/h, walking on uneven surfaces, turning smoothly, climbing stairs, pushing a cart, receiving and delivering trays and he can even dance a little boogie if the occasion calls for it. Our dream is that one day, everyone will have an ASIMO of their own to help around the home or office.

What if we had our own solar cell production company?

In recent times Honda has branched out into mass solar cell production. Honda's unique C.I.G.S solar cell produces the highest level of conversion efficiency in the thin film category and only requires half the energy to manufacture, so it's more environmentally friendly throughout its entire life. Why does a vehicle company produce solar cells? Purely so we know that we are doing everything possible to help prevent global warming.

What if a plane had its engines mounted on top of the wing?

Well, it would be a world-first and it would be called the HondaJet. Secondly, the engines would have to be in a special position on the wing we call 'The Sweet Spot'. That would then result in less drag at high speeds, 30% better fuel economy and because there is no need for structural engine mounts on the fuselage, 30% more cabin space.

What if there was a car that only emitted water?

Obviously the world would be a better place and the good news is, such a car already exists: The FCX Clarity. It works by converting hydrogen into electricity, which leaves you with only one emission, H₂O. And in 2008, this totally new fuel-cell vehicle will be in production.
