e-POWER特點一
結合順滑和強勁的新感覺。由於Serena e-POWER是100%電動摩打驅動，因此順滑而強勁的駕駛與電動汽車相同。具有靈敏反應特性，並具有強大的扭力驅動特性。無論鬧市街道或高速公路的車道變換如何，當油門踩下時它都會敏捷而舒適地加速。

e-POWER特點二
安靜駕乘空間。Serena e-POWER採用100%電摩打驅動，因此行車非常安靜。用於發電的為1.2公升低排量引擎，並且通過根據車輛速度控制引擎轉數，降低噪音來源。此外，車身各處都採取了隔音措施，以減少風噪和輪胎滾動噪音。

e-POWER特點三
「e-POWER駕駛模式」只需操作油門踏板，即可控制加速/減速，大約70%的城市行車，你可以不用踩剎車踏板而減速和停車，油門踏板切換制動踏板的次數大大降低，減少了駕駛引起的疲勞。

e-POWER Feature 1
A new sensation that combines smoothness and strength. Since Serena e-POWER is 100% electric motor drive, the smooth and powerful driving is the same as an electric car. Boasts an instant response when the accelerator is depressed, and a powerful driving characteristic of high torque. Regardless of urban roads stop & go or expressways lane changing, it accelerates smoothly and comfortably as the accelerator is depressed.

e-POWER Feature 2
A surprisingly quiet interior unique to electric motor drive. The engine for power generation has a small displacement of 1.2L and further reduces noise by controlling engine rotation according to the vehicle speed. In addition, soundproofing measures are adopted throughout the body to reduce wind and tire rolling noises.

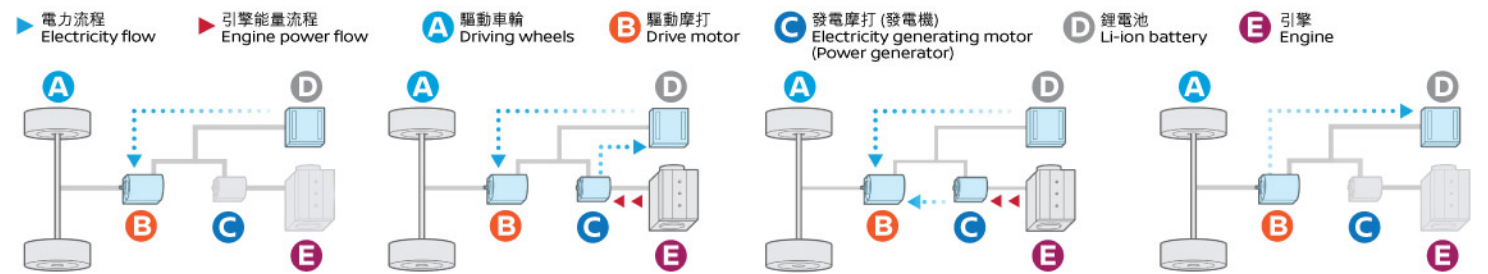

e-POWER Feature 3
"e-POWER Drive" mode realizes acceleration and stopping by just using the accelerator pedal. You can decelerate and stop without stepping on the brake pedal in about 70% of urban drive. The number of times switching between the accelerator and brake pedals is greatly minimized, reducing fatigue in driving.
