e-POWER

Nissan X-TRAIL e-POWER with e-4ORCE

Introducing Nissan's latest family adventure SUV, powered by the award-winning e-POWER technology – Nissan's proprietary technology that delivers 100% electric drive without the need for plug-in charging.

A first for the Nissan e-POWER lineup, the X-TRAIL comes with e-4ORCE - a twin electric motor drivetrain that delivers massive 330Nm torque at the front and 195Nm at the rear for an exhilarating drive.

e-4ORCE

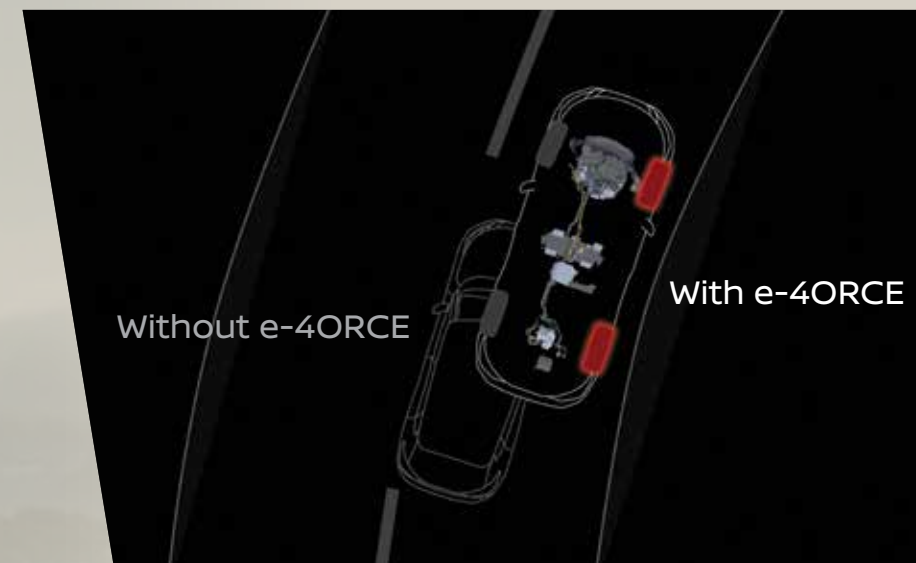

150kW - 330Nm
100kW - 195Nm

Reinvent your all-wheel drive experience.
Now electrified with e-4ORCE.

Meet e-4ORCE: an all-wheel control system with twin electric motors that deliver massive torque, stability, and agility. But it's the new level of control that will truly awaken your drive.

e-4ORCE makes electric driving feel like you're gliding effortlessly. By managing the power delivery and braking to each wheel, e-4ORCE can coordinate the forces working on the vehicle to help reduce cabin motion caused by stop-start driving in traffic to deliver a more comfortable drive for all occupants on board.

Actual specifications and features may vary from images shown.

As you negotiate a bend, you will notice how you don't feel thrown to the outer edges. You flow through traffic on the motorway, accelerating with ease. Pressing the brakes, even weight distribution brings you to a stop in one smooth motion.

With e-4ORCE

Without e-4ORCE

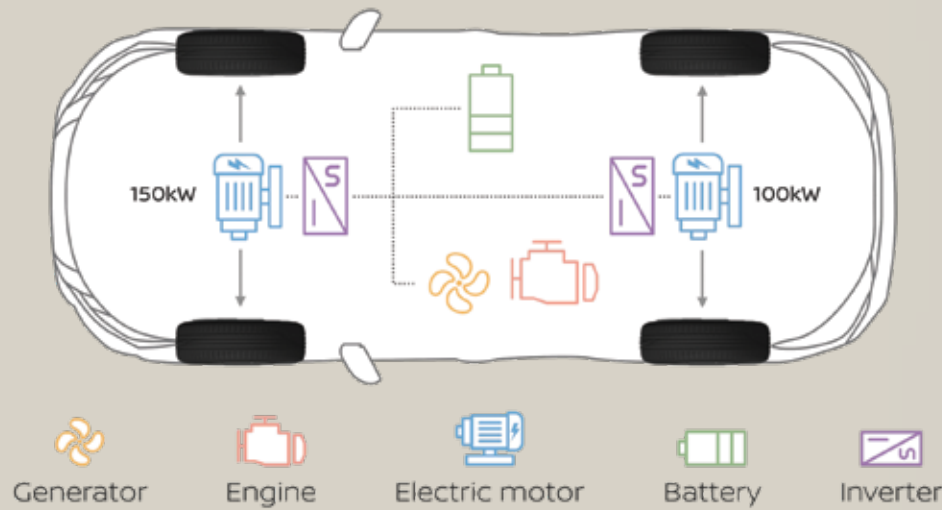

Learn more about Nissan e-4ORCE

Stand out with the Nissan X-TRAIL

Get noticed wherever you go with sleek LED headlights, distinctive and imposing front air vents, and robust yet crafted lines. Up front, the unmistakable Nissan V-motion grille bears the familiar signature of Nissan's exciting design DNA, expressing that this electrified family crossover refuses to blend into the background.

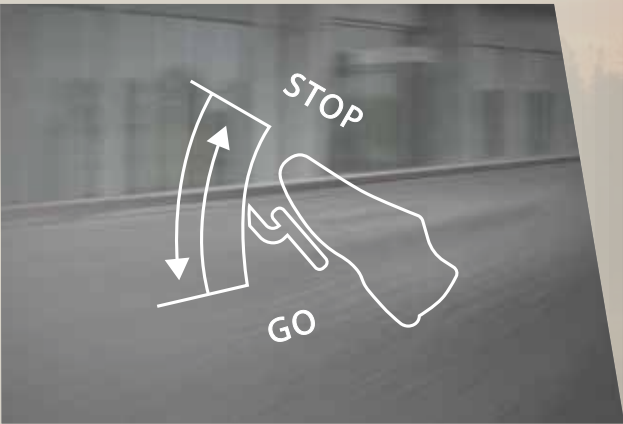

Actual specifications and features may vary from images shown.

With Nissan e-POWER, pioneering doesn't have to pause. e-POWER is a unique electrified technology composed of a fuel efficient petrol engine and lithium-ion battery. Working together, the engine and battery provide power to an electric motor – this alone drives the wheels at all times. The result is a responsive and quiet driving experience without the need to plug in. Just enjoyable driving with no compromise on efficiency.

12.3-inch Full Colour Digital Instrument Display with Energy Flow Monitor

Experience a more intuitive way to drive. Unique to Nissan, e-Pedal Step gives you the option to accelerate and decelerate effectively with just the accelerator pedal at speeds above 10km/h, leaving the brake pedal for harder braking or coming to a complete stop.

Actual specifications and features may vary from images shown.

A unique electrified experience, now unplugged. This is Nissan e-POWER.

Discover the details that make a difference

With three large interior display screens to supplement your drive, you're guaranteed to experience Nissan's technology at its best. Enjoy a 12.3-inch full colour digital instrument display, 12.3-inch NissanConnect infotainment system with wireless Apple CarPlay & Android Auto, and a 10.8-inch Head-Up Display as you settle into your premium Nappa leather seats with diamond quilting*.
