

NEW THINKING.  
HYUNDAI NEW POSSIBILITIES.

**TUCSON**

# Conditions That Excite

The Tucson complements the dynamism of the city. Its drivability and flexibility to respond to ever-changing road conditions let you take the open road, freely. From the beautiful sounds that move your heart to the airy space that gives you freedom. Some things you can only experience when you take off into the horizon.

## Radiator Grille

Hyundai Motor's iconic hexagonal radiator grille projects a bold and vibrant image while conveying the family look.

## Rear Spoiler with High-mounted Stop Lamp

An aerodynamic rear spoiler that enhances Tucson's rugged SUV look improves its driving experience while helping maintain vehicles in the back at a safe distance with a high-mounted stop lamp.

## Rear Combination Lamp

Rear combination lamps featuring a design that is even more elegant and sophisticated than before add the perfect finishing touch to Tucson's stylish rear.

## Outside Mirror Repeaters & Puddle Lamps\*

Outside mirrors were lowered 10 mm to provide better visibility and side repeater lamps were incorporated to project a more solid and sophisticated image. Puddle lamps light up automatically when the vehicle is approached with the smart Key.

## LED Daytime Running Lights (DRL) & Fog Lamps\*

LED Daytime running lights (DRL) remain illuminated during the day while the vehicle is being operated to warn pedestrians and other drivers about the presence of the car. A 3-dimensional front bumper comes with integrated fog lamps that complement the headlamps to improve visibility in bad weather.

## Projection Headlamps

The Tucson's technologically advanced projection headlamps found on leading luxury vehicles, light the road with sharp, highly-defined beams, bringing a new level of illumination and detail to night time driving.

# Moments of Surprise

Embrace the sleek lines and elegant hues of Hyundai's newest compact crossover. Everything from the switches to the seating and cabin space are optimally designed with your convenience in mind. Savour every unique experience that it provides.

## Child Anchors

Easy mounting feature with locks allow convenient anchoring of child seats to the vehicle in compliance with ISO standards.

## Audio Visual Navigator (AVN)\*

The Android operating system allows social networking based navigational systems to be used to avoid heavy traffic.

## Electronic Parking Brake (EPB)\*

A state-of-the-art, space-saving switch conveniently activates the parking brake.

## Auto Cruise System\*

The auto cruise function can be activated using steering wheel-mounted controls making it safe and easy to set your speed.

## Supervision Cluster with 4.2" Colour TFT LCD\*

The highly visible supervision cluster comes with a colour TFT LCD to enable the driver to identify diverse driving information more easily, and the trip computer comes with a remote control on the steering wheel to facilitate its operation.

## Auto Light Control\*

The auto light control senses changes in light intensity surrounding the car and automatically turns the lights on or off. With this function, drivers do not have to operate the switches.

# Shape It To Your Comfort

Step into the Tucson and notice the careful attention to details. From quality material that you can feel to aesthetically classy trims, and refined finishing that are practical. Also have the choice to configure seating arrangements to suits your unique lifestyle.

## Driver's Power Seat\*

Drivers can adjust their seat in 8 different ways to fit their body shape and posture, while 2-step lumbar support provides more solid support for their lower back.

## Rear Seat Reclining

The Tucson's rear seats now recline, providing passengers with an extra degree of comfort that makes a big difference on long journeys.

## Seat Variation

Rear seats can be folded in a 6:4 formation to fit objects of diverse shapes and sizes, while a generous 488-liter cargo space easily accommodates large amounts of luggage. A 1,094 mm-wide opening of the tailgate makes loading and unloading easier.

# Powered to Perform

Feel the true power of an SUV through Tucson's agile handling yet calm composure on the road. With our 2.0 MPi gasoline engine mated to a seamless 6-speed automatic transmission, you get to feel one with the road.

## 2.0 MPi Gasoline Engine

Tucson's gasoline engine, with a maximum output of 155 PS at 6,200 rpm and maximum torque of 192 Nm at 4,000 rpm, delivers a dynamic yet quiet performance ideal for an urban SUV. Coupled with fuel efficiency, everyday driving becomes more fun.

## 6-speed Automatic Transmission

A smooth, 6-speed automatic transmission is easier to operate than ever before thanks to a newly designed boot-type lever that adds a nifty design touch. It also delivers better acceleration and fuel economy while emitting less CO<sub>2</sub>.

## Drive Mode Control System\*

A button on the centre console conveniently offers a choice of 3 driving modes – normal, sports, and eco – to match drivers' mood and driving conditions.

## Front Suspension – McPherson Strut

Steering wheel feel, maneuverability and stability are greatly improved through a new geometry setup. SLC type springs replaces current conventional springs in the front wheel suspension. It absorbs impact well by minimizing movement to one side and reducing friction.

## Rear Suspension – Multi-Link

Component spring design maximizes interior space and impact absorption for convenience and an improved ride. Multi-Link suspension improves the responsiveness and quickness of suspension dampening compared to the current dual-link set up.

# Sophistication Inspired by Safety

Hyundai features smart technologies that react to instinctive moments in perfect unison. So, when danger, no matter how small brushes by, the Tucson takes charge and ensures your safety before you even know it.

## 6-airbag System\*

A driver's airbag, passenger's airbag, 2-side airbags, and curtain airbags protect passengers in the event of a collision.

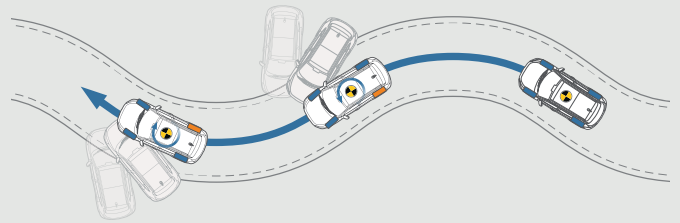

## Advanced high-strength steels (AHSS)

By increasing use of Advanced high-strength steels (AHSS) to 51% of the body and hot stamping the passenger compartment, Tucson offers greater sturdiness and safety. Straightened body connections and installation of load paths improve the vehicle's performance in collision tests, ensuring greater safety in real life situations.

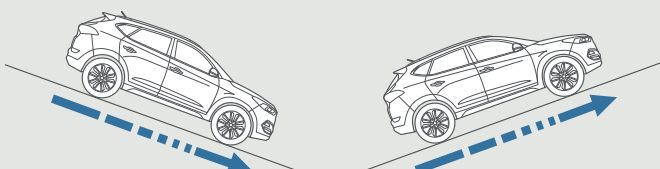

## Vehicle Stability Management (VSM)

VSM helps the vehicle maintain directional stability when suddenly braking or rapidly accelerating under a symmetric (wet / dry) road surface conditions where traction among the four tyres can suddenly become uneven.

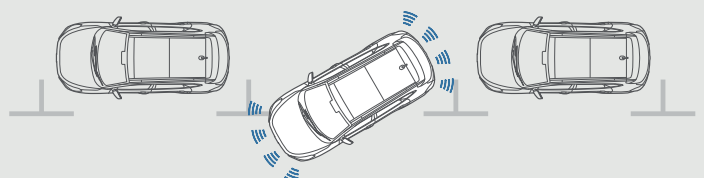

## Down-hill Brake Control (DBC) & Hill-start Assist Control (HAC)

The Tucson can tackle any hill with Down-hill Brake Control (DBC), which automatically applies a braking force when going down a steep road, and Hill-start Assist Control (HAC), which prevents the car from rolling back when starting uphill.

## Front\* & Rear Parking Assist System (PAS) with Rear-view Camera

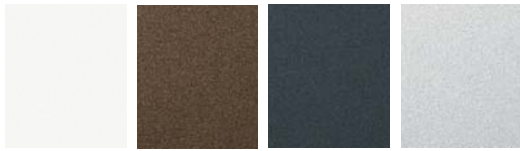

Sensors in the front and rear bumpers help to prevent collisions and to park safely by warning the driver about objects that are close by when the vehicle is in reverse. A rear-view camera promotes safe parking by enabling drivers to see the back of their vehicle through a monitor while backing up or parking.
