PEUGEOT NEW E-2008 ALL-ROUNDED PROTECTION

SAFETY TECHNOLOGY

Active Safety Brake System 主動安全煞車系統

This function, also called "automatic emergency braking", intervenes after the acoustic alert if the driver does not operate the brake pedal quickly enough. The system aims at reducing the speed of impact or avoiding a collision if the driver fails to react.

The system operates subject to the following conditions:

- At reduced speed in an urban environment, when a stationary vehicle, pedestrian or cyclist is detected.
- The vehicle's speed is between 10 km/h and 85 km/h when a moving vehicle is detected.

This warning lamp flashes (for approximately 10 seconds) as soon as the function applies the vehicle's brakes. During the flashing time, the function is not available.

該功能也稱為“自動緊急煞車”，如果駕駛員未能快速及時煞車，車輛則會在發出聲音警報後進行干預。

該系統的目的是在駕駛員反應遲鈍的情況下降低碰撞速度或避免碰撞。

系統運作需符合以下條件：

- 在城市環境中減速時，偵測到靜止的車輛、行人或騎自行車的人
- 當偵測到移動車輛時，車輛速度10 km/h 至 85 km/h 或 140km/h。

一旦出現此警告燈閃爍（約 10 秒）此功能便會把車輛煞車。
閃爍期間，該功能不可用。

Lane Keeping Assistance 車道維持輔助

A system that monitors longitudinal lane markings on the ground. If a deviation is detected across a lane marking, you are alerted by a flashing indicator on the digital instrument panel in the cabin.

此系統能偵測路面的行車線標記，如果偵測車輛偏離行車線標記，車內數碼儀錶板上的提示燈會閃爍，以作警示。

PEUGEOT NEW E-2008 ALL-ROUNDED PROTECTION

SAFETY TECHNOLOGY

Blind Spot Monitoring 盲點偵測系統

Using lateral ultrasound sensors to cover areas out of your field of vision along with the windscreen mounted camera, an LED illuminates in either side door mirror to alert to the presence of a car, lorry, motorbike or bicycle in your blind spot. The system works when overtaking a slower vehicle or when overtaken by a faster vehicle.

橫向超聲波感測器配合擋風玻璃頂部的攝影機，可覆蓋視野之外的區域。若盲點處有汽車、貨車、電單車或單車，兩側車門倒後鏡上的 LED 燈會亮起。在超越較慢的車輛或被較快的車輛超越時，此系統會自動運作。

Adaptive Cruise Control with Stop and Go 主動式定速巡航系統 附自動停車與起步功能

Cruise control as you know it, will never be the same again with PEUGEOT E-2008. Controlled via a radar mounted at the front of the vehicle, the ACC Stop and Go system provides two key functions:

- Automatic maintenance of the vehicles speed, at the value set by the driver
- Automatic maintenance of a set distance between PEUGEOT E-2008 and the vehicle in front, slowing the vehicle to a stop if required and then moving off automatically when conditions allow

The system detects a vehicle driving in front in the same direction and can automatically adapt the vehicle's speed to that of the vehicle in front. This occurs using engine braking and the braking system (in which case the brake lights are lit to maintain a constant distance).

When activated, ACC Stop and Go also incorporates Lane Positioning Assist, to position the car centrally within its lane, particularly useful for motorway driving.

PEUGEOT E-2008 會改變你對定速巡航系統的認知。ACC Stop and Go 系統透過安裝在車輛前方的雷達，提供兩個關鍵功能：

- 自動維持車速在駕駛者設定的數值
- 自動維持 PEUGEOT E-2008 與前車的固定距離，需要刹會將車輛減並停下，然後在條件允許時重新起步。系統能檢測前方往相同方向行駛的車輛，並按前車速度自動調節車速。

此系統利用引擎制動和煞車系統，達致與前車保持固定車距。因此，剎車燈會在特定情況下亮起。

啟動後，ACC Stop and Go 亦包含車道定位輔助功能，可將汽車定位在車道中央，在高速公路駕駛時特別有用。

Speed Limit Recognition and Recommendations 限速標誌辨識及建議

Using the windscreen mounted camera, PEUGEOT E-2008 features speed limit sign recognition, leaving you in no doubt over the speed limit. Upon detecting a speed limit sign this information is read by the camera and displayed in colour on the head-up digital instrument panel.

In addition the driver also has the option to adapt their speed to the speed limit on the particular road via the vehicles cruise control stalk. The vehicle will then adjust its speed accordingly.

Road Sign Recognition and Recommendation 指示標誌辨識及建議

In addition to speed limit recognition, E-2008 can also read and interpret various road signs, including 'Stop', 'One Way' and 'No Overtaking'. These are then relayed through the head-up digital instrument panel, in plain view of the drivers line of sight, reducing the chance of a road instruction being missed.

標緻 PEUGEOT E-2008 擋風玻璃頂部的攝影機能辨識限速標誌，讓你對不同路段的限速瞭如指掌。

偵測到限速標誌後，攝影機會讀取相關訊息，並以彩色顯示在立體平視數碼儀錶板上。此外，駕駛者更可選擇利用車輛巡航控制桿，將速度調整為特定道路上的限速，然後車輛就會相應地自動調整車速。

除了辨識限速外，標緻 PEUGEOT E-2008 還可以讀取和辨識各種路標，包括「停車」、「單行」和「禁止超車」。這些資訊會轉發到平視數碼儀錶板上，讓駕駛者在視線範圍內清晰見到，減少錯過道路指示的機會。

PEUGEOT Smartbeam Assistance (GT Exclusive) 標緻智能光型變化功能 (GT版本獨有配置)

PEUGEOT Smartbeam Assistance gives you one less thing to think about when driving at night. Controlled via a windscreen mounted camera, the system continuously analyses driving conditions, for instance the proximity of other vehicles. PEUGEOT Smartbeam Assistance automatically switches headlights to full beam when conditions allow, allowing you to tap into the full potential of the full LED headlights.

標緻 PEUGEOT 智能光型變化功能讓你夜間駕駛時減少操心。透過擋風玻璃頂部的攝影機，系統持續分析駕駛環境，例如是與其他車輛的距離。標緻智能光型變化功能會在適當時自動將車頭燈切換為遠光燈，充分發揮全 LED 頭燈的潛能。

Driver Attention Alert 駕駛注意警示

Controlled by a camera at the top of the windscreen designed to analyse the vehicles trajectory, this active system evaluates the vigilance of the driver at speeds of over 65 km/h. By identifying deviations relative to the road markings, PEUGEOT E-2008 is able to determine whether the vehicle's behaviour reflects a certain degree of driver drowsiness or inattention. If it is felt that the driver needs to take better care on the road a visual and audible alert will occur. If more than three instances occur, the driver will be advised to take a break

此主動系統由擋風玻璃頂部的攝影機控制，旨在分析行駛軌跡，評估駕駛者在車速超過時速 65 km/h 時的警覺性。透過分析道路標記和車輛實際行駛情況之間的偏差，PEUGEOT E-2008 能藉此判斷駕駛者是否在一定程度上昏昏欲睡或注意力不集中。如果系統認為駕駛者需要更加小心，則會發出視覺和聲響警示。如果警示出現超過3次，系統則會建議駕駛者稍作休息。

360° Around View Monitor* 全景式泊車鏡頭*

In addition to parking sensors, the new HD front and rear camera offers a wide angle view as well as 360° view for added peace of mind. It is useful while reversing out of spaces and near obstacles.

除了泊車感應器外，最新高清的前、後置攝影機提供廣角影像有助駕駛者注意周邊行人或物件，尤其於倒車泊車及迴避障礙物時，倍添安心。
