

ACURA

1 9 9 5

As the icon of one of the world's most acclaimed automotive marques, the Acura badge represents the highest standards of achievement in the automotive field. The Acura commitment to excellence is a constant; the NSX, Legend and Integra are, however, very distinctive automobiles, each built to satisfy the needs and desires of their very different drivers. The exuberant Acura Integra, the elegant Acura Legend and the awe-inspiring Acura NSX are prime examples of how far the automobile has evolved – and how far our passion for the pleasure of driving has taken us.

QUITE OBVIOUSLY, THE ACURA NSX IS A STUNNING EXOTIC SPORTS CAR. BUT IT IS ALSO SOMETHING RATHER MORE SIGNIFICANT: It represents the leading edge of automotive design. Like most aircraft, its monocoque unit-body structure is hand-built of aluminum. This lightweight chassis is propelled by a midship-mounted, 270-horsepower, VTEC-equipped, all-aluminum V-6 engine,

N S X which uses titanium connecting rods to help achieve its phenomenal power. The cornering response of the NSX, which has been called "the world's best-handling car,"* is accomplished with racing-inspired 4-wheel

A race-tuned version of the NSX engine powered the Comptech Acura-Spice GTP Lights race car to three consecutive IMSA Drivers' and Manufacturers' championship titles.

independent double-wishbone suspension and innovative, electrically actuated power steering. Anti-lock brakes, traction control and dual SRS air bags also help make the Acura NSX as secure as it is exhilarating. The result is a unique combination of power, precise response and authoritative capability – one that has been called "the best driving experience available anywhere in the world."†

NSX shown in Berlina Black

EVERY ACURA AUTOMOBILE, INCLUDING THE AWE-INSPIRING NSX, THE ELEGANT LEGEND

AND THE EXCITING INTEGRA, IS A DISTILLATION in steel, aluminum and glass of everything we have

learned about the science and art of automotive design. ⌘ The design requirements

of a world-class luxury sedan are very different from those

of an exciting personal sports coupe or sports sedan, or of a

D E S I G N mid-engined exotic sports car.

The knowledge and skills required to meet those disparate requirements are, however,

equally formidable. ⌘ The monocoque unit-body structure of each Acura is first created on the

Cray supercomputer, allowing our designers to investigate the best ways to achieve optimum stiffness

and strength without excessive performance-robbing mass. ⌘ The outer shapes are crafted by

the eye of an artist, but also under the exacting scrutiny of the wind tunnel, enabling us

to achieve high levels of performance and efficiency while

maintaining low wind noise and reassuring stability in gusts

and crosswinds. ⌘ And after the engaging body shape is

finally rendered in metal – either the lightweight, yet exceedingly rigid, aluminum shell

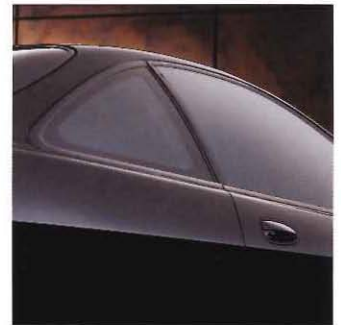

of the NSX or the corrosion-resistant steel form of the Legend and the Integra – it is sheathed in a

durable, multi-coat exterior paint finish designed to help it retain its luster for years to come.

Like every Acura, the NSX is designed to slice smoothly through the air, for optimum stability and enhanced high-speed performance.

The reinforced roof structure of every Acura is designed for optimum strength, using slender support pillars for enhanced driver visibility.

AS THE AUTOMOBILE THAT CHANGED THE WAY THE WORLD THINKS

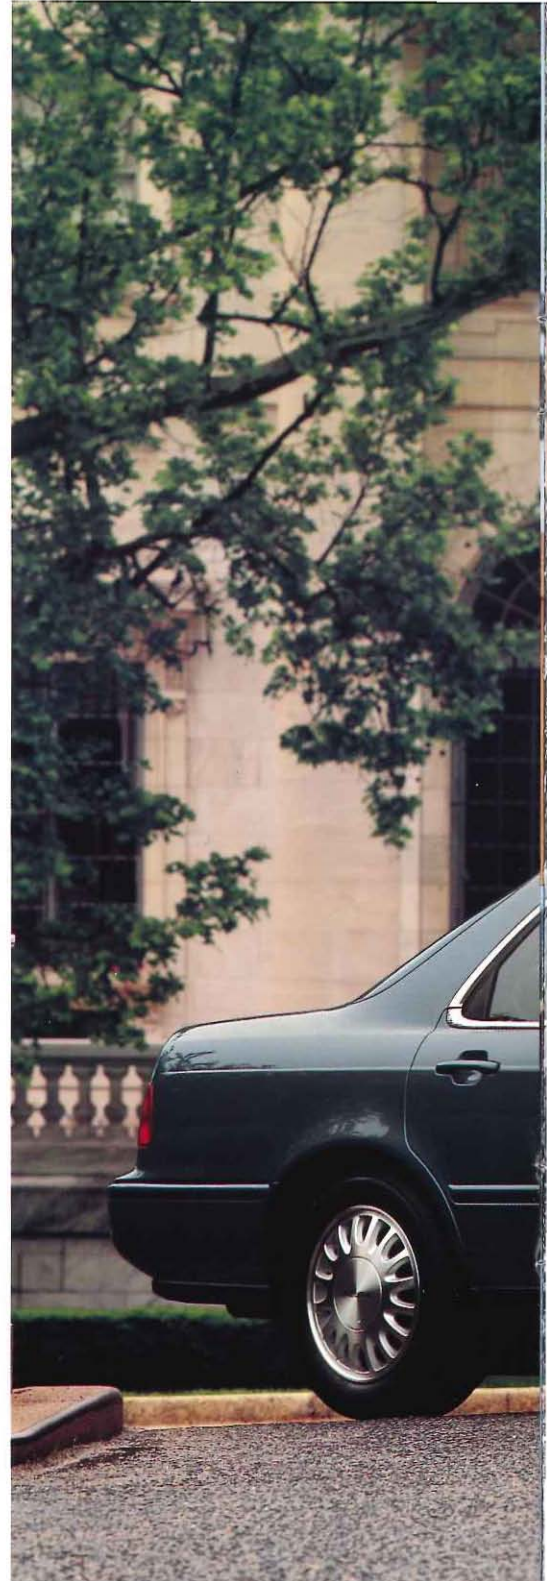

ABOUT MODERN LUXURY CARS, THE ELEGANT Acura Legend Sedan has been the inspiration – and the blueprint – for an ever-growing fleet of imitators. The Acura Legend Sedan L and LS are powered by a remarkably smooth, 3.2-liter, 4-valve-per-cylinder, all-aluminum V-6 that produces abundant low-speed torque and

LEGEND SEDAN 200 peak horsepower. The Legend Sedan GS delivers even more breathtaking performance from its 230-horsepower Type II engine, available 6-speed manual transmission and 16-inch alloy wheels. Every

The Legend Sedan is an island of taste, comfort and elegance. The 8-way power-adjustable driver's seat remembers your preferences, welcoming you every time you enter.

Legend Sedan is equipped with a full complement of luxury features, including an 8-way power-adjustable driver's seat and a tilt and telescoping steering column with a 2-position memory function, a power-operated moonroof, power windows, power door locks, cruise control and a built-in theft-deterrent system. Every Acura Legend Sedan model is also available with supple leather seating surfaces.

Legend Sedan LS shown in Canterbury Green Metallic

AS ONE OF THE WORLD'S MOST RESPECTED BUILDERS OF UPSCALE AUTOMOBILES, WE'VE

DEVOTED QUITE A BIT OF ATTENTION TO THE CONCEPT OF LUXURY. We've carefully analyzed the

subtleties of form, color and texture that combine to establish an ambience of elegance

and refined sophistication. We've also investigated the fine

points of ergonomics, striving to create the most comfortable

L U X U R Y and distraction-free driving

environment possible.  The results of this research can be experienced inside

every Acura, from the meticulously finished burlled walnut panels of the Legend LS and GS to the

supple, hand-selected leather that covers the seating surfaces of the Integra Special Edition. Rich

appointments are important, but the satisfying feeling of driving an Acura is as much a product of

brilliant design as it is of refined taste and expensive materials.  Vital controls and

instruments are clear and intuitive in their operation, re-

ducing the barriers between the driver and the road unfolding

ahead. Sophisticated aerodynamic design and advanced sound

insulation make each Acura seem nearly as silent at speed as it is at rest. State-of-the-art

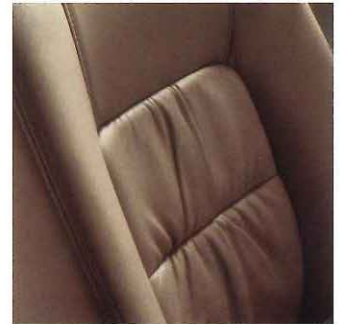

music systems fill that silence with breathtaking presence and clarity. And a full range of power

features lets every Acura driver control his or her driving environment with the touch of a finger.

The Legend LS and GS are equipped with an Acura/Bose® Premium Music System tailored to deliver clear, authentic response.

The supple leather used in the NSX, Legend and Integra is hand-selected, then stitched in a gathered pattern for enhanced comfort.

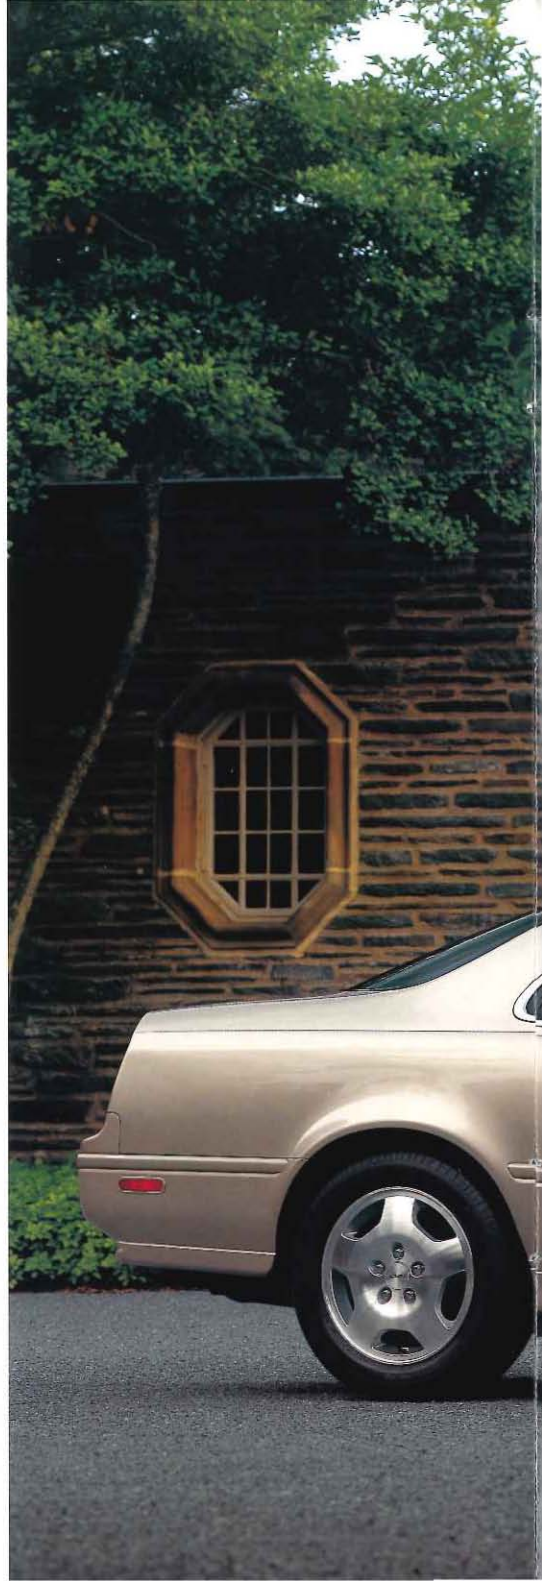

THE LEGEND COUPE L AND LS EMBODY THE AGREEABLE LUXURY AND ELEGANT SOPHISTICATION BUILT INTO EVERY ACURA LEGEND, wrapped in a boldly sculpted, intimate 2-door design. Leather-trimmed seating surfaces are standard, as is a breathtaking Acura/Bose® Music System. And every Legend Coupe is powered by the intoxicating, 230-horsepower, Type II engine, which uses advanced

LEGEND COUPE racing technology to produce 15% more peak power than the Legend Sedan L and LS. Every Legend Coupe is available with a close-ratio 6-speed manual transmission, or the optional, electronically controlled

The ergonomically sculpted seats are constructed of variable-density foam, for the proper balance of comfort and support, then upholstered with supple, hand-selected leather.

4-speed automatic.  The Legend Coupe LS also features enhanced chassis components, making it as impressive in a fast set of corners as it is in a manicured courtyard. Larger-diameter, 16-inch alloy wheels and tires give the Legend Coupe LS quick response, and powerful 2-piston calipers help the ventilated front disc brakes reduce speed with commanding authority.

Legend Coupe LS shown in Cashmere Metallic

WITH OUR IMPRESSIVE STRING OF RACING SUCCESSES, AND THE LEGENDARY ACURA NSX, ACKNOWLEDGED BY MANY JOURNALISTS TO BE ONE OF THE BEST high-performance automobiles ever

built, to our credit, it is safe to say that our performance credentials are nothing less than impeccable. ⚡ But the outstanding performance we build

into every Acura automobile reveals itself in ways much

PERFORMANCE

more complex than quick lap

times, blistering zero-to-sixty runs, and short braking distances. ⚡ It shows in the

way every Acura feels on the open road, from the irrepressible acceleration of the Integra RS Sports

Coupe and RS Sports Sedan to the seemingly limitless power of the top-of-the-line Legend Sedan

GS. To achieve the remarkably high level of overall performance that characterizes every Acura, our

engineers kept to one simple design philosophy: Nothing but the best. ⚡ That's the

reason every Acura automobile is equipped with an advanced-

overhead-camshaft, 4-valve-per-cylinder, aluminum-alloy

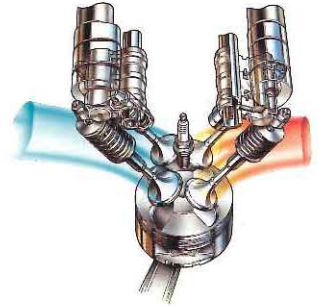

engine, for exhilarating power and optimum driveability.

Computer-controlled Programmed Fuel Injection (PGM-FI), for flexibility and reliability.

Four-wheel disc brakes, for excellent stopping power. And race-proven 4-wheel independent double-

wishbone suspension, for a smooth ride, nearly instantaneous response and impressive roadholding.

The amazing VTEC system gives the Integra GS-R and the NSX abundant low-speed torque, and truly breathtaking peak power.

A racing-inspired, 4-wheel independent double-wishbone suspension system enhances the handling characteristics of every Acura model.

WHEN WE DESIGNED THE INTEGRA SPORTS COUPE, WE USED EVERY BIT OF ENGINEERING SKILL WE HAD AT OUR COMMAND. We also used an attribute that is rather less obvious – our highly developed sense of fun. ☞ The Integra Sports Coupe combines exciting performance, sensuous style, engaging comfort and reassuring safety engineering. And does it with an exuberant personality

I N T E G R A C O U P E that encourages its driver to enjoy each mile to the fullest. ☞ The Integra RS, LS and Special Edition Sports Coupe are powered by a racing-inspired, 142-horsepower, DOHC, 4-valve-per-cylinder,

The Integra Special Edition is equipped with leather-trimmed seating surfaces; the same supple, hand-selected leather is available as an option on the Integra GS-R.

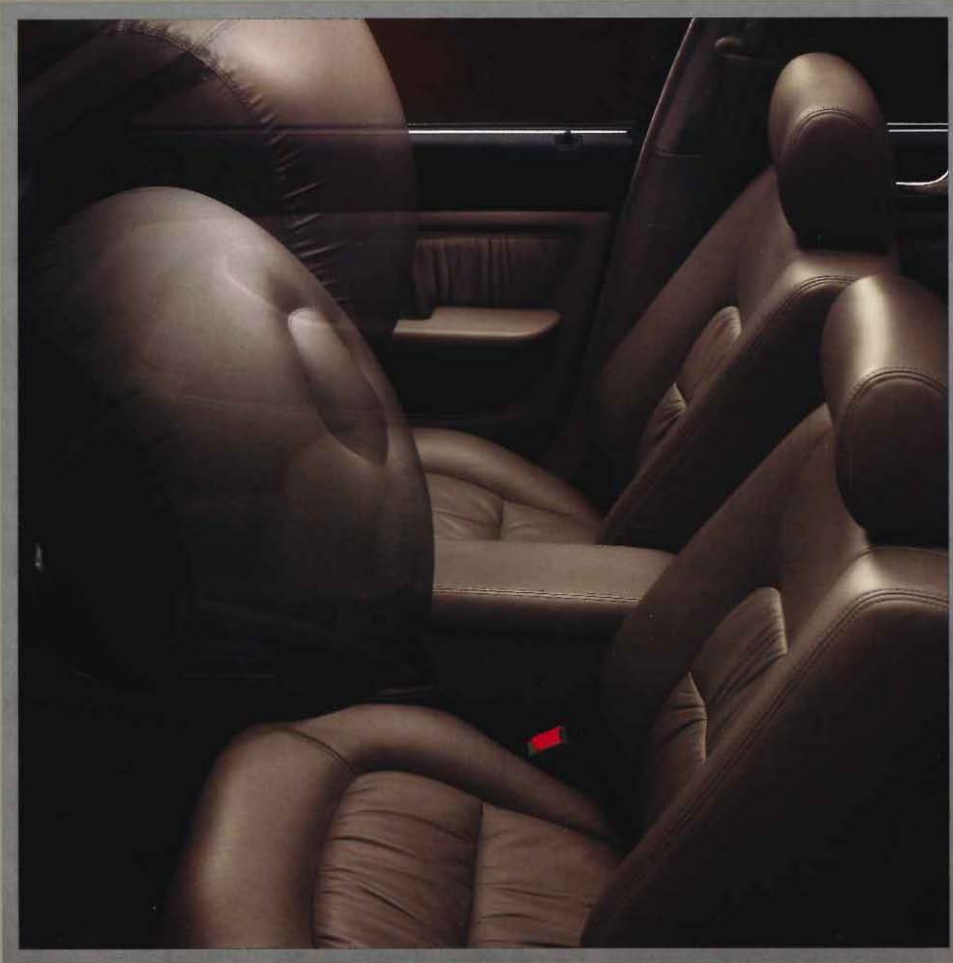

all-aluminum engine. ☞ And the amazing Integra GS-R pushes the limits of technology even further, producing a pulse-quickenning 170 horsepower by using the VTEC valvetrain system introduced in the exotic Acura NSX. ☞ Driving a fast, fun sports coupe doesn't mean giving up luxury; leather-trimmed seats are standard on the Integra Special Edition, and optional on the Integra GS-R.*

**Optional with selected GS-R exterior colors.*

Integra GS-R Sports Coupe shown in Milano Red

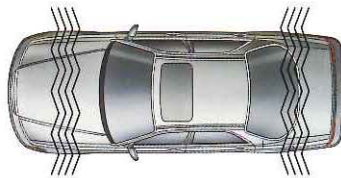

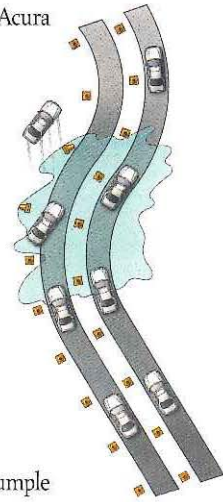

THE FIRST JOB OF A GREAT AUTOMOBILE IS TO GIVE ITS DRIVER AND PASSENGERS A WELL-FOUNDED FEELING OF SECURITY. That's why, in addition to the manual 3-point seat belts, every Acura

is equipped with dual Supplemental Restraint System air bags, which are carefully designed to help front seat passengers withstand the impact of a severe frontal collision. ⌘ Passive safety systems

S A F E T Y such as air bags are important,

but the real safety story of every Acura automobile begins with the monocoque unit-body structure. Each passenger cabin is reinforced for optimum rigidity, and front and rear crumple zones help to dissipate the impact energy of a severe collision before it can harm the central cabin structure. ⌘ The best collision is, of course, the one that never happens. That's why 4-wheel independent double-wishbone suspension and 4-wheel disc brakes are so important, helping to give the immediate response and sure stopping ability that might be crucial in an emergency situation.

Anti-Lock Braking helps retain steering control during hard braking on ice, snow and other slippery, unpredictable driving surfaces.

Front and rear crumple zones are designed to deform progressively, helping to preserve the passenger cabin.

The straight front and rear frame rails of the Legend help to dissipate the impact of a severe collision.

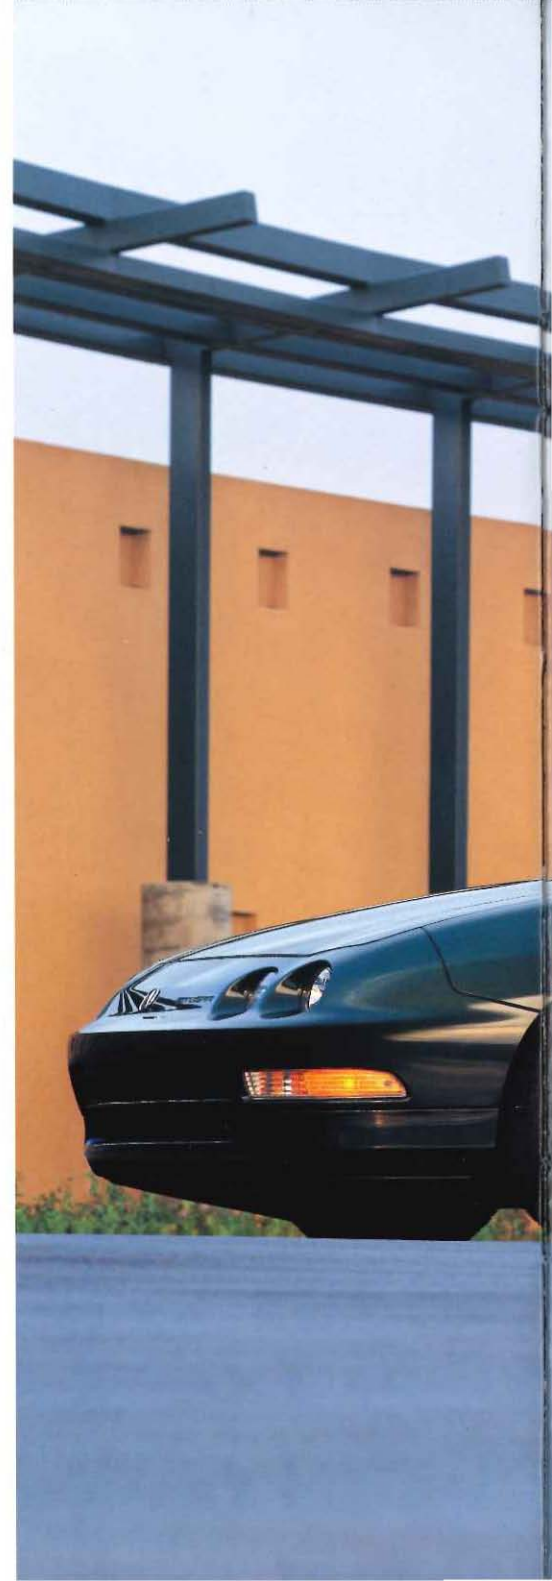

TO CREATE THE INTEGRA SPORTS SEDAN, WE TOOK THE IRREPRESSIBLE PERSONALITY OF THE INTEGRA SPORTS COUPE, and then reshaped it in a slightly roomier, more practical 4-door configuration. When you're having this much fun, we reasoned, it's only natural to want to bring your family and friends along with you. Underneath the shell, the Integra Sports Sedan has all the racing technology

I N T E G R A S E D A N that has made the Integra Sports Coupe such a performance standout. ⚡ The RS, LS and Special Edition models are powered by a 142-horsepower, DOHC, 4-valve-per-cylinder, all-aluminum engine,

The Integra uses large, white-on-black, analog gauges to give you information at a glance. Ergonomically honed controls help the Integra come alive in your hands.

working through a slick 5-speed manual transmission or the optional 4-speed automatic with the Grade Logic Control System, which actually senses and adapts to changing driving situations. ⚡ The exciting Integra GS-R Sports Sedan uses the NSX-inspired VTEC valvetrain design to put 170 horsepower at your command, with a special close-ratio 5-speed manual transmission.

Integra LS Sports Sedan shown in Isle Green Pearl

OWNING A METICULOUSLY CRAFTED ACURA AUTOMOBILE INVOLVES MUCH MORE THAN

DRIVING IT — REGARDLESS OF HOW PLEASURABLE IT IS TO DRIVE. We firmly believe that how each

Acura owner feels about the automobile and the company, throughout the entire period

of ownership, is just as meaningful as how reliably the auto-

mobile performs. ⚙ The dedication of the engineers and

S U P P O R T craftspeople who create every

Acura is reinforced by the professionalism and commitment of every carefully selected

Acura dealer. ⚙ Acura technicians learn the most advanced service techniques by attending an

ongoing series of training seminars. And it goes without saying that every Acura dealer is committed

to treating you with the highest levels of courtesy and respect. ⚙ Your Acura dealer can also

provide you with a loaner vehicle, under certain circumstances, if it becomes necessary

for your Acura to stay overnight for warranty work.* In the

rare case of a needed part not being in stock, a computerized

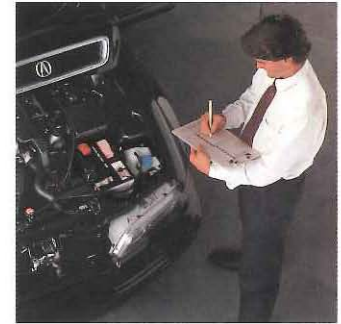

parts network and nationwide warehouse system can rush it

to your dealer. ⚙ Every Acura automobile is covered by a 4-year or 50,000-mile

limited warranty, which states that Acura will repair or replace, free of charge, any factory-installed

part that proves defective in materials or workmanship.*

Every Acura dealer is committed to prompt service, and to treating each Acura owner with the highest levels of courtesy and respect.

Custom Acura cellular telephones are designed to integrate seamlessly with every Acura model, to help you stay in touch while on the road.

*See your Acura dealer for details.
