

ARIYA

ARIYA

100% electric crossover,
refined to perfection.
An exhilarating electric
experience.

The ARIYA brings you into the future right now, with
the highest level of Nissan performance, design,
and technology. A bold expression that goes
against expectations.

Actual specifications and features may vary from image(s) shown.

Your intelligent, connected,
intuitive drive.

Step into the world of ARIYA, and you will never look back. Not just another crossover, the ARIYA is the epitome of refinement, your lounge on the move.

Drive modes

ARIYA comes with 3 drive modes to deliver the best performance in any situation.

3 Drive modes:

STANDARD

Enjoy the perfect balance of responsive performance and efficient driving – ideal for all your day-to-day journeys.

ECO

Go light, with softer acceleration for better energy efficiency. ECO mode is ideal for longer adventures to maximise driving range.

SPORT

Feel the surge of exciting performance, with powerful acceleration for a more dynamic drive.

Timeless Japanese Futurism

A simple, powerful, and modern form.

The evolved beauty of traditional Japan is here.

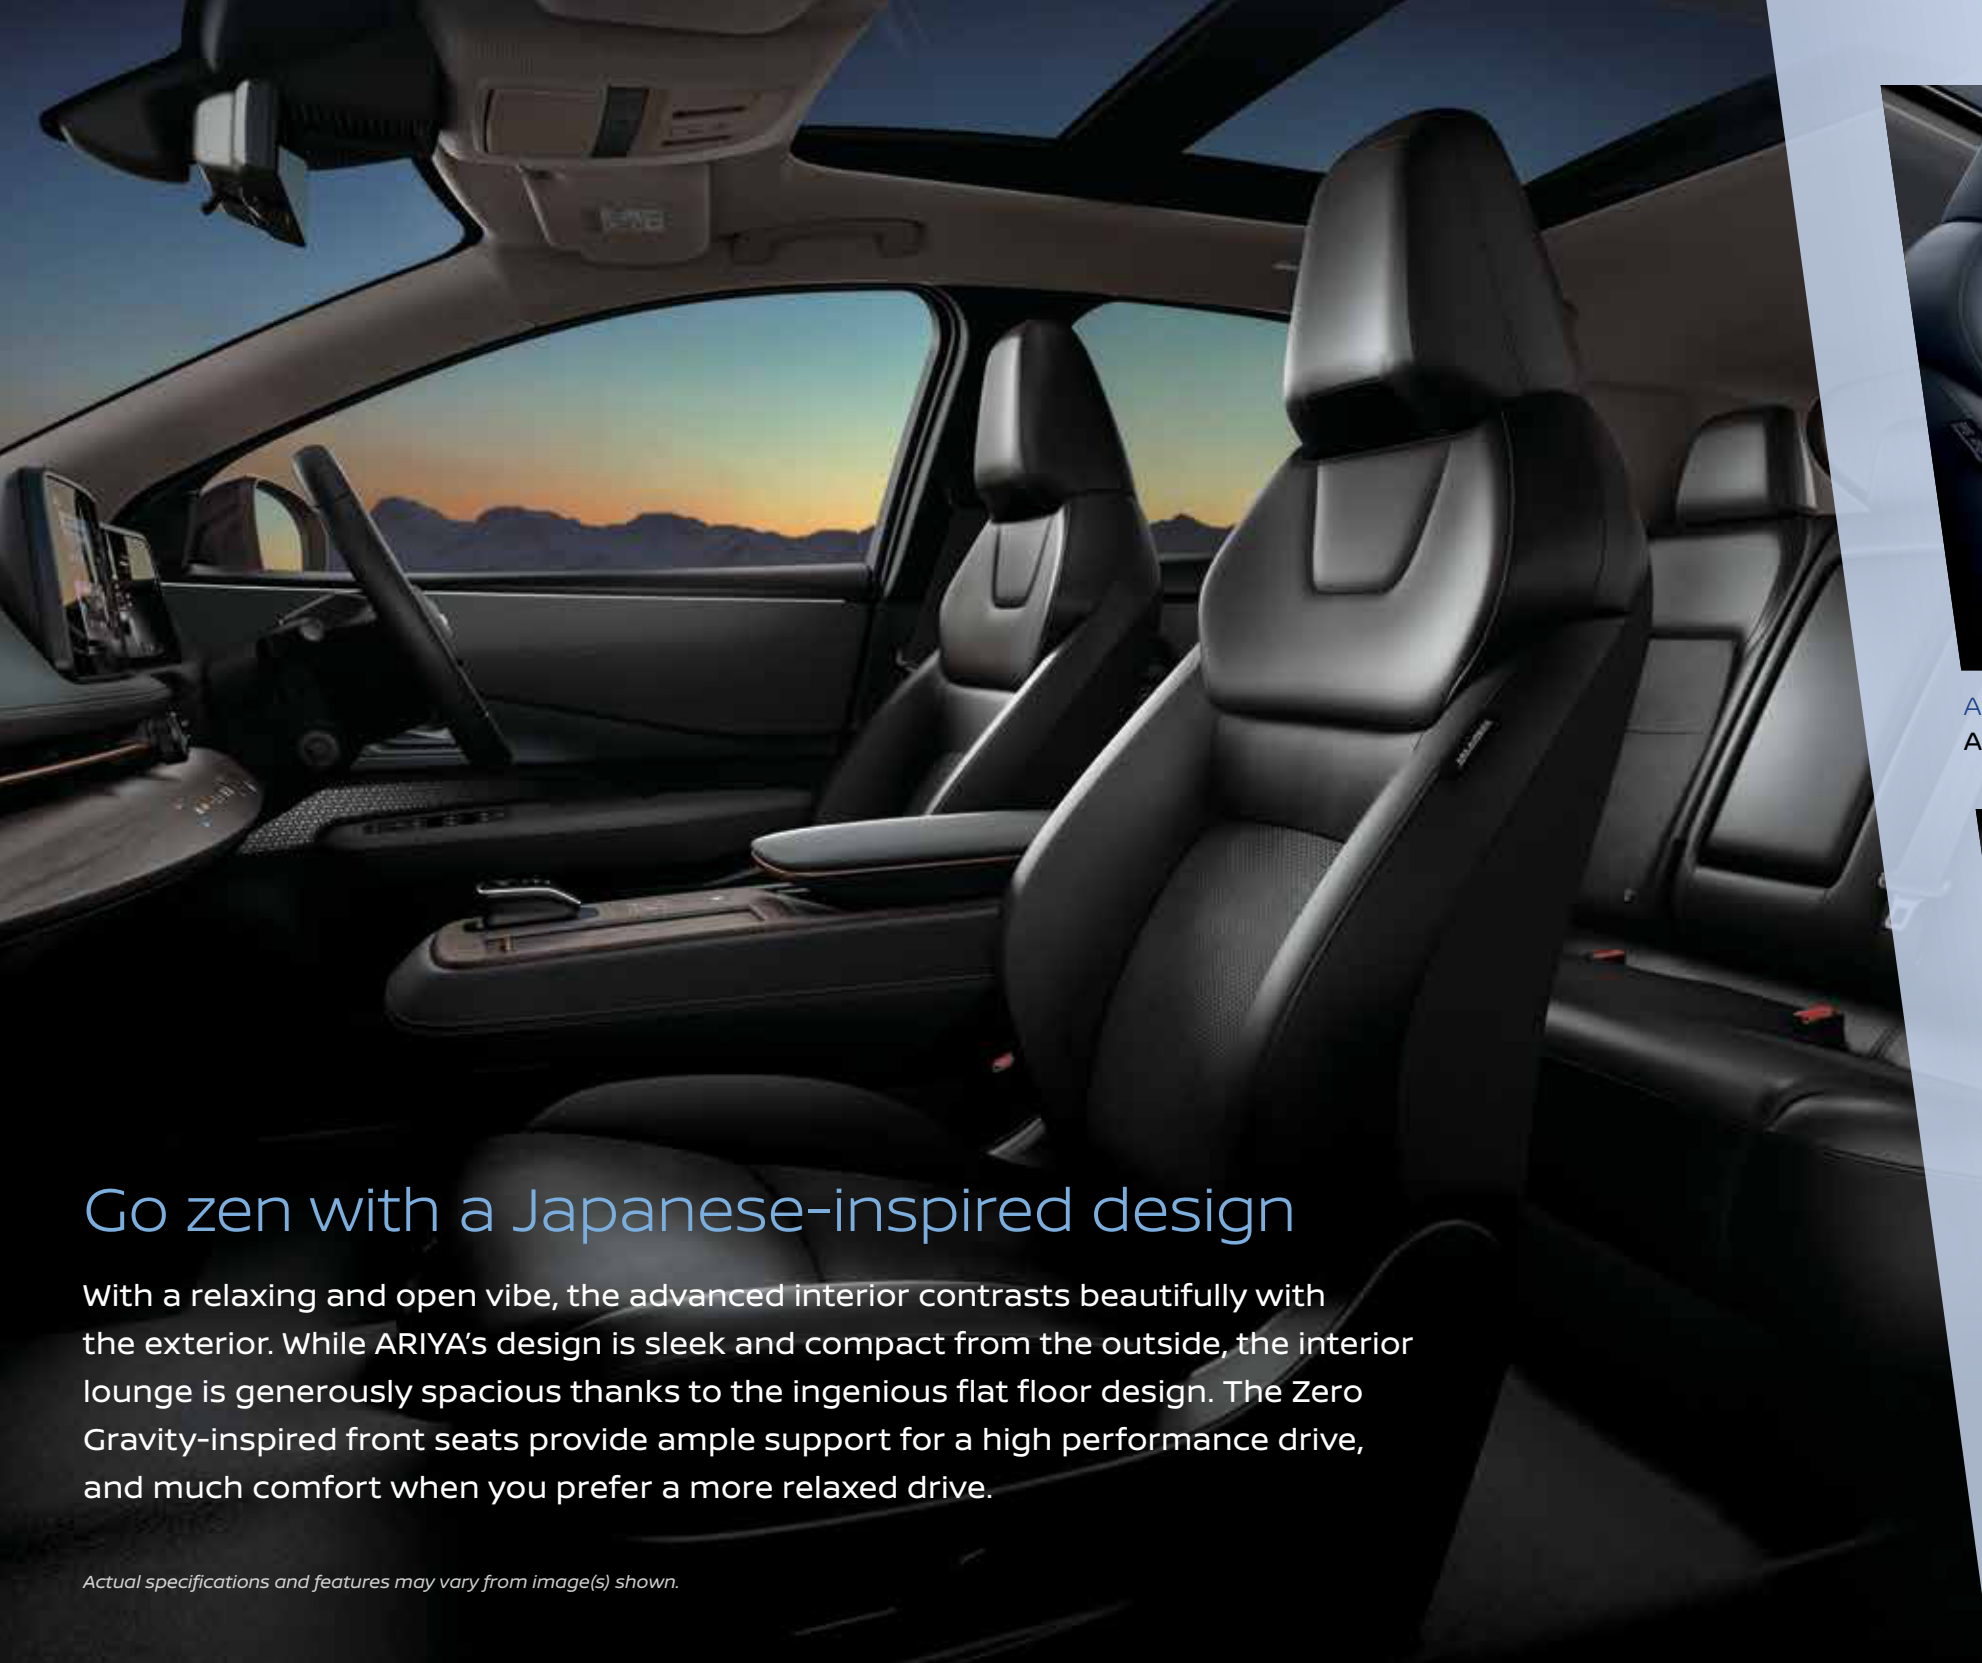

Actual specifications and features may vary from image(s) shown.

The design of the ARIYA was inspired by the traditional beauty of ancient Japan. The smooth front grille features a Japanese geometric pattern called *Kumiko*. This intricate pattern is reproduced in three dimensions using traditional mould processing techniques from Tsubame-Sanjo, Niigata Prefecture.

Simple yet memorable, the highlights on its front fascia and sides reflect the spirit of 粋 (iki). The functional beauty of the line connecting the front to the rear expresses the idea of 整 (sei), which describes how the mastery of space is achieved. The tail lamps are influenced by Japanese minimalism embodied in the character of 間 (ma). Infused with Japanese DNA, the dynamic exterior showcases an evolved fusion of function and form.

Go zen with a Japanese-inspired design

With a relaxing and open vibe, the advanced interior contrasts beautifully with the exterior. While ARIYA's design is sleek and compact from the outside, the interior lounge is generously spacious thanks to the ingenious flat floor design. The Zero Gravity-inspired front seats provide ample support for a high performance drive, and much comfort when you prefer a more relaxed drive.

Actual specifications and features may vary from image(s) shown.

A welcoming start

A Japanese gold standard of hospitality and service, delivered beyond expectations. Only for you.

Lights & shadow

A traditional Japanese *Kumiko* pattern signature is incorporated into several elements of the car. In the interior door inserts, it plays between lights and shadow with *Andon* lighting, a traditional Japanese technique that provides a calming, welcoming ambience.

Technology that plugs into your senses

You've never experienced anything quite like ARIYA. Instead of traditional buttons, ARIYA uses haptic touch controls that reside beneath the dashboard's surface and turn nearly invisible when dimmed. The Integrated Display Interface features dual 12.3-inch screens which are seamlessly connected, offering an intuitive and visually breathtaking experience.

Actual specifications and features may vary from image(s) shown.

Integrated display interface

Experience the stunning dual 12.3-inch screens that offer an intuitive, user-friendly interface, making every interaction a delight.

Haptic touch controls

The Japanese concept of 整 (sei), or "clever treatment of design or function" is represented by haptic touch controls that provide a tactile response and make them nearly invisible on the smooth instrument panel surface when not in use.

Wireless charging

Charge a compatible smartphone while on-the-go with the hidden wireless charging pad, tucked cleverly under the centre armrest, keeping the cabin tidy and clutter-free.

Feel more confident on the road

Behind the technology and refinement of the ARIYA is its innovation infused with Nissan's long history and extensive know-how in EV development. Spend more time on the road with advanced battery technology that allows for fast charging, and go wherever the road takes you with a Singapore-wide network of charging stations.

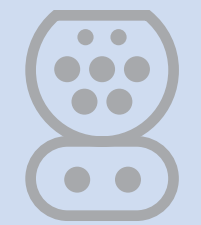

Actual specifications and features may vary from image(s) shown.

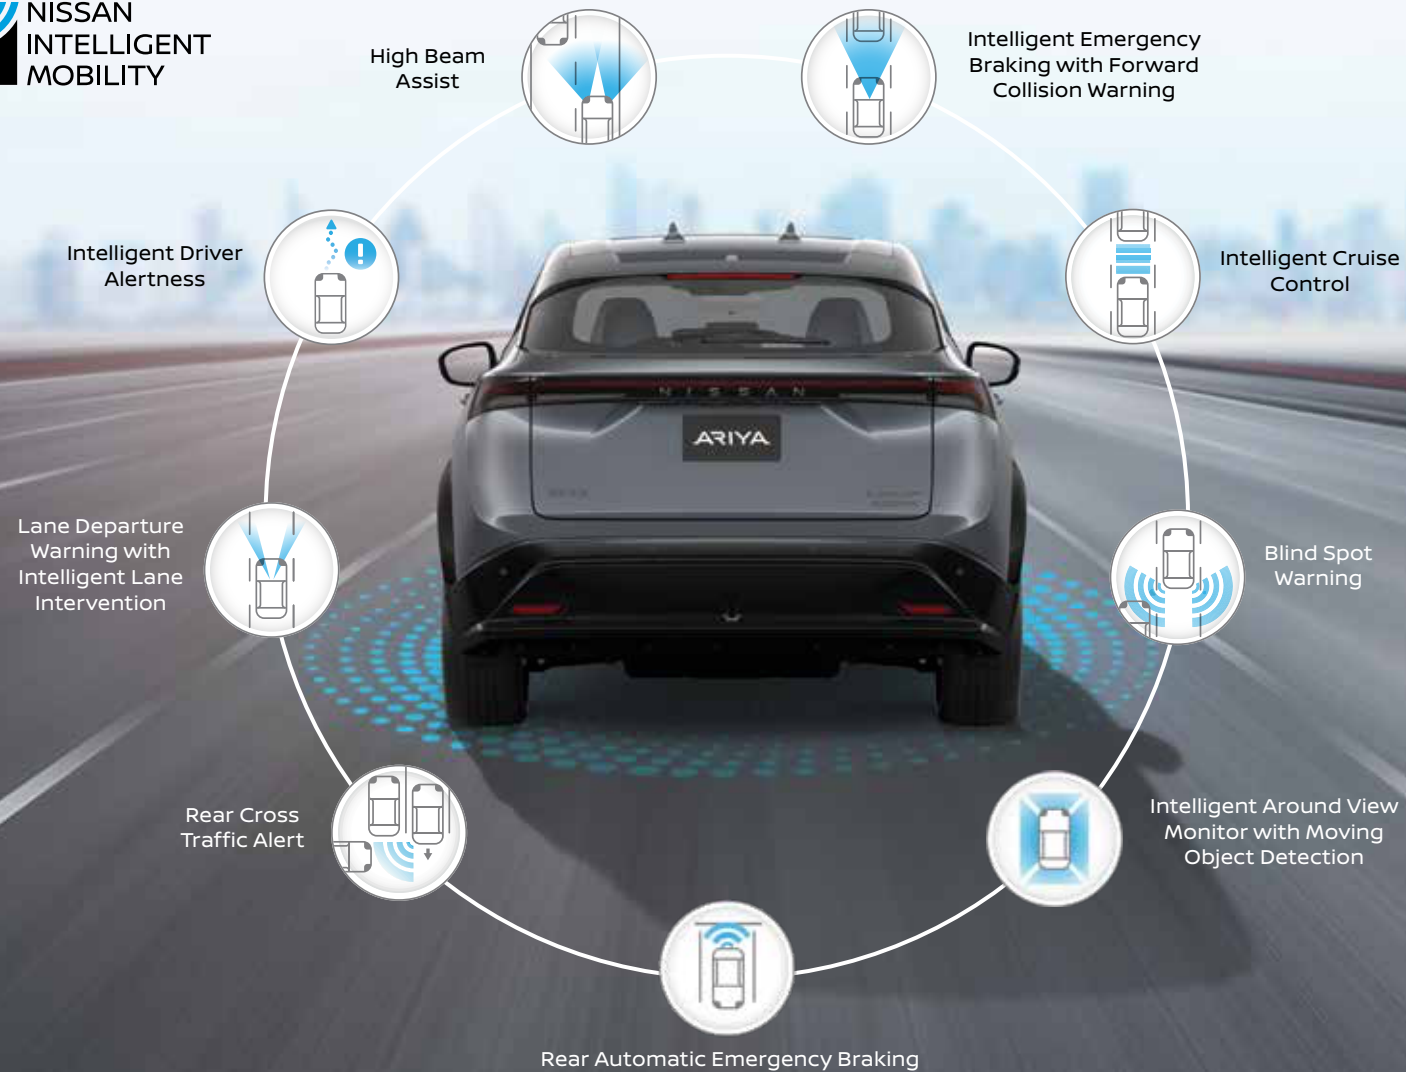

66kWh ARIYA

Type 2 AC
Wallbox Charger
Charge overnight
from 10% to 100%
in about 10 hours.

CCS-2 DC
Quick Charger
Charge from 10%
to 80% in as little
as 35 minutes.

Intelligence that looks out for your safety

ARIYA has been designed to protect you with advanced safety technologies. This intelligent safety system watches the road for obstructions, alerts you to hazards and steps in to avoid or reduce the impact of a collision.

Actual specifications and features may vary from image(s) shown.
